**Children and Peace** Nikola Balvin, Daniel J.

Christie, 2019-10-20 This open access book brings together discourse on children and peace from the 15th International Symposium on the Contributions of Psychology to Peace, covering issues pertinent to children and peace and approaches to making their world safer, fairer and more sustainable. The book is divided into nine sections that examine traditional themes (social construction and deconstruction of diversity, intergenerational transitions and memories of war, and multiculturalism), as well as contemporary issues such as Europe's "migration crisis", radicalization and violent extremism, and violence in families, schools and communities. Chapters contextualize each issue within specific social ecological frameworks in order to reflect on the multiplicity of influences that affect different outcomes and to discuss how the findings can be applied in different contexts. The volume also provides solutions and hope through its focus on youth empowerment and peacebuilding programs for children and families. This forward-thinking volume offers a multitude of views, approaches, and strategies for research and activism drawn from peace psychology scholars and United Nations researchers and practitioners. This book's multi-layered emphasis on context, structural determinants of peace and conflict, and use of research for action towards social cohesion for children and youth has not been brought together in other peace psychology literature to the same extent. *Children and Peace: From Research to Action* will be a useful resource for peace psychology academics and students, as well as social and developmental psychology academics and students, peace and development practitioners and activists,

policy makers who need to make decisions about the matters covered in the book, child rights advocates and members of multilateral organizations such as the UN.

Digital Papyrology I Nicola Reggiani, 2017-09-11 Since the very beginnings of the digital humanities, Papyrology has been in the vanguard of the application of information technologies to its own scientific purposes, for both theoretical and practical reasons (the strong awareness towards the problems of human memory and the material ways of preserving it; the need to work with a multifarious and overwhelming amount of different data). After more than thirty years of development, we have now at our disposal the most advanced tools to make papyrological studies more and more effective, and even to create a new conception of papyrology and a new model of edition of the ancient documents. At this turning point, it is important to build an epistemological framework including all the different expressions of Digital Papyrology, to trace a historical sketch setting the background of the contemporary tools, and to provide a clear overview of the current theoretical and technological trends, so that all the possibilities currently available can be exploited following uniform pathways. The volume represents an innovative attempt to deal with such topics, usually relegated into very quick and general treatments within journal articles or papyrological handbooks.

**Concepts in Enterprise Resource Planning** Ellen F. Monk, Bret J. Wagner, 2013 Show your students how to master and

maximize enterprise resource planning (ERP) software, which continues to become more critical in business today, with the latest edition of Monk/Wagner's successful CONCEPTS IN ENTERPRISE RESOURCE PLANNING, International Edition. Equip students to use ERP tools to increase growth and productivity as they learn how to effectively combine an organization's numerous functions into one comprehensive, integrated system. CONCEPTS IN ENTERPRISE RESOURCE PLANNING, 4E, International Edition reflects the latest trends and updates in ERP software while demonstrating how to make the most of this important technology. The authors introduce the basic functional areas of business and how they are related. The book demonstrates how information systems that are not effectively integrated fail to support business functions and business processes that extend across functional area boundaries. By contrast, students clearly see how integrated information systems help organizations improve business process and provide managers with accurate, consistent, and current data for making informed strategic decisions. All-new sidebar cases and real examples throughout this edition not only thoroughly introduce the practical aspects of enterprise resource planning, but also prepare readers for ongoing ERP success in business today and tomorrow.

#### Global Sustainability and the Responsibilities of Universities

Luc Weber, James J. Duderstadt, 2012 Over the past decade, the Glion Colloquium has established itself as an influential resource in addressing the challenges, roles, and responsibilities of the world's research universities. In this book, university leaders from around the world consider the role of research universities in addressing the challenges of global sustainability, including climate, environmental, economic, health, poverty, and geopolitical concerns. It was developed from topics discussed at the VIII Glion Colloquium in 2011. The book discusses not only how research universities are adapting to the imperatives of global sustainability (e.g., social diversity, resource management, academic programs, research and scholarship), but also how they can develop new curricula, student experiences, research paradigms, social engagement, and international alliances to better address the challenges of global sustainability while producing globally identified citizens. The contributors also consider the implications

of these profound economic, demographic, technological, and political changes for the sustainability of the research university itself.
