World Culture Report 2000 Unesco, 2000

Globalisation has caused an increase in the amount of cultural mingling. For some people diversity is seen as richness but for others there have been problems of identity and hence conflict. This world survey looks at the current debates, cultural policies, national identity and methods of measuring culture. It is backed up by statistical tables and cultural indicators and includes a CD-ROM of cultural resources on the Web.

Childlessness in Europe: Contexts, Causes, and Consequences Michaela Kreyenfeld, Dirk Konietzka, 2017-01-11

This book is published open access under a CC BY 4.0 license. This open access book provides an overview of childlessness throughout Europe. It offers a collection of papers written by leading demographers and sociologists that examine contexts, causes, and consequences of childlessness in countries throughout the region. The book features data from all over Europe. It specifically highlights patterns of childlessness in Germany, France, the United Kingdom, Finland, Sweden, Austria and Switzerland. An additional chapter on childlessness in the United States puts the European experience in perspective. The book offers readers such insights as the determinants of lifelong childlessness, whether governments can and should counteract increasing childlessness, how the phenomenon differs across social strata and the role economic uncertainties play. In addition, the book also examines life course dynamics and biographical patterns, assisted reproduction as well as the consequences of childlessness. Childlessness has been increasing rapidly in most European countries in recent decades. This book offers readers expert analysis into this issue from leading experts in the field

of family behavior. From causes to consequences, it explores the many facets of childlessness throughout Europe to present a comprehensive portrait of this important demographic and sociological trend.

Get Better Faster Paul Bambrick-Santoyo, 2016-07-25 Effective and practical coaching strategies for new educators plus valuable online coaching tools Many teachers are only observed one or two times per year on average—and, even among those who are observed, scarcely any are given feedback as to how they could improve. The bottom line is clear: teachers do not need to be evaluated so much as they need to be developed and coached. In *Get Better Faster: A 90-Day Plan for Coaching New Teachers*, Paul Bambrick-Santoyo shares instructive tools of how school leaders can effectively guide new teachers to success. Over the course of the book, he breaks down the most critical actions leaders and teachers must take to achieve exemplary results. Designed for coaches as well as beginning teachers, *Get Better Faster* is an integral coaching tool for any school leader eager to help their teachers succeed. *Get Better Faster* focuses on what's practical and actionable which makes the book's approach to coaching so effective. By practicing the concrete actions and micro-skills listed in *Get Better Faster*, teachers will markedly improve their ability to lead a class, producing a steady chain reaction of future teaching success. Though focused heavily on the first 90 days of teacher development, it's possible to implement this work at any time. Junior and experienced teachers alike can benefit from the guidance of *Get Better Faster* while at the same time closing existing instructional gaps. Featuring valuable and practical online training tools available at <http://www.wiley.com/go/getbetterfaster>, *Get*

Better Faster provides agendas, presentation slides, a coach's guide, handouts, planning templates, and 35 video clips of real teachers at work to help other educators apply the lessons learned in their own classrooms. Get Better Faster will teach you: The core principles of coaching: Go Granular; Plan, Practice, Follow Up, Repeat; Make Feedback More Frequent Top action steps to launch a teacher's development in an easy-to-read scope and sequence guide It also walks you through the four phases of skill building: Phase 1 (Pre-Teaching): Dress Rehearsal Phase 2: Instant Immersion Phase 3: Getting into Gear Phase 4: The Power of Discourse Perfect for new educators and those who supervise them, Get Better Faster will also earn a place in the libraries of veteran teachers and school administrators seeking a one-stop coaching resource.

Foundations of Web Design Thomas

Michaud, 2013-08-08 If you are a beginner who needs a solid grounding in the best practices for creating websites, this book is for you. Written by innovative curriculum developer and university web instructor Thomas Michaud, this book provides an accessible yet comprehensive look at web design and front-end coding, covering HTML, CSS, design principles and more. You'll learn HTML semantics, structure, and validation, and how to separate content from design using CSS (levels 1, 2, and 3). Online videos and code examples let you follow along and practice with the code. Some of the other things you'll learn about include: • text elements, links, objects, and tables • using the box model for background images, padding, borders, and margins • fixed vs. liquid page layout • choosing between different navigation models • creating and styling forms • interactive design with JavaScript and jQuery Foundations of Web Design is an indispensable resource to quickly take you from sketching to coding.

Human-Computer Interaction. Applications and Services Masaaki Kurosu, 2014-06-09 The 3-volume set LNCS 8510, 8511 and 8512 constitutes the refereed proceedings of the 16th International Conference on Human-Computer Interaction, HCII 2014, held in Heraklion, Crete, Greece in June 2014. The total of 1476 papers and 220 posters presented at the HCII 2014 conferences was carefully reviewed and selected from 4766 submissions. These papers address the latest research and development efforts and highlight the human aspects of design and use of computing systems. The papers thoroughly cover the entire field of human-computer interaction, addressing major advances in knowledge and effective use of computers in a variety of application areas.

Keeping Watch A. Walter Dorn, 2011 Knowledge is power. In the hands of UN peacekeepers, it can be a power for peace. Lacking knowledge, peacekeepers often find themselves powerless in the field, unable to protect themselves and others. The United Nations owes it to the world and to its peacekeepers to utilize all available tools to make its monitoring and surveillance work more effective. Keeping Watch explains how technologies can increase the range, effectiveness, and accuracy of UN observation. Satellites, aircraft, and ground sensors enable wider coverage of many areas, over longer periods of time, while decreasing intrusiveness. These devices can transmit and record imagery for wider dissemination and further analysis, and as evidence in human rights cases and tribunals. They also allow observation at a safe distance from dangerous areas, especially in advance of UN patrols, humanitarian convoys, or robust forces. While sensor technologies have been increasing exponentially in performance while decreasing rapidly in price, however, the United Nations continues to use technologies from the 1980s. This book identifies potential problems and pitfalls with modern technologies and the challenges to incorporate them into the UN system. The few cases of technologies effectively harnessed in the field are examined, and creative recommendations are offered to overcome the institutional inertia and widespread misunderstandings about how technology can complement human initiative in the quest for peace in war-torn lands. Walter Dorn is one of the most thoughtful and knowledgeable analysts of peacekeeping and security policy, and this book makes an important contribution to a field that needs far more public discussion.--The Hon. Bob Rae, MP for Toronto Centre and Liberal Foreign Affairs critic

The Frontiers of Language and Nationality in

Europe Leon Dominian, 2020-05-09 This book has been considered by academicians and scholars of great significance and value to literature. This forms a part of the knowledge base for future generations. So that the book is never forgotten we have represented this book in a print format as the same form as it was originally first published. Hence any marks or annotations seen are left intentionally to preserve its true nature.

Globalisation and Labour Ronaldo Munck, 2002-07 Intellectual fashion likes to see us as consumers, but the world of production and services still needs workers. Globalization has been driven by the transnational corporations search for cheap labour, but little attention has been paid to the consequent changes in the world of work. Ronaldo Munck argues that the national period in labour history is decisively over.

Vaccines: A Biography Andrew W. Artenstein, 2009-12-11 Why another book about vaccines? There are already a few extremely well-written medical textbooks that provide comprehensive, state-of-the-art technical reviews regarding vaccine science. Additionally, in the past decade alone, a number of engrossing, provocative books have been published on various related issues ranging from vaccines against specific diseases to vaccine safety and policy. Yet there remains a significant gap in the literature - the history of vaccines. *Vaccines: A Biography* seeks to fill a void in the extant literature by focusing on the history of vaccines and in so doing, recounts the social, cultural, and scientific history of vaccines; it places them within their natural, historical context. The book traces the lineage - the "biography" - of individual vaccines, originating with deeply rooted medical problems and evolving to an eventual conclusion. Nonetheless, these are not "biographies" in the traditional sense; they do

not trace an individual's growth and development. Instead, they follow an idea as it is conceived and developed, through the contributions of many. These are epic stories of discovery, of risk-takers, of individuals advancing medical science, in the words of the famous physical scientist Isaac Newton, "by standing on the shoulders of giants." One grant reviewer described the book's concept as "triumphalist"; although meant as an indictment, this is only partially inaccurate.

Recalibrating U.S. Strategy toward Russia

Kathleen H. Hicks, Lisa Sawyer Samp, 2017-04-12
These are turbulent times for American foreign policy. Nowhere are the challenges facing the United States more evident than in U.S. policy toward Russia. Drawing on scholars across several disciplines and perspectives, CSIS conducted a year-long study that sought to achieve two goals. First, to provide policymakers with a clearer understanding of Russia's strategic motivations and objectives, along with the tools it uses to advance its goals. Second, to lay out a comprehensive strategy to secure U.S. and transatlantic interests in the face of the complex Russia challenge set.

New Insights into Anxiety Disorders Federico Durbano, 2013-03-20
This book collects the contributions of a number of clinical psychiatrists all over the world, interested in developing basic research about anxiety and in applying it in clinical contexts. It is divided into four sections, covering general issues about anxiety (ethological and developmental ones), basic research issues on specific aspects of anxiety (bioanatomical ones, correlation with personality structure and so on), and new clinical and therapeutical proposals and hypothesis. Each author summarized the clinical importance of his work, underlining the clinical pitfalls of this publication.

British Smooth-bore Artillery David McConnell, Canadian Parks Service. National Historic Parks and Sites, 1988 Under its mandate to interpret Canadian history to the public, Environment Canada - Parks initiated an extensive study of the technology of British ordnance c1710-1860s to aid in the re-creation of period settings at a number of British military sites in Canada, and to provide a manual for the reconstruction of pieces of artillery, their carriages and platforms. The study covers the production of ordnance, the history of the development and design of various pieces (guns, mortars, howitzers, carronades), their carriages and platforms, and the development of gunpowder, cartridges, fuses, and projectiles.

Rob|Arch 2012 Sigrid Brell-Cokcan, Johannes Braumann, 2013-12-16 This volume collects about 20 contributions on the topic of robotic construction methods. It is a proceedings volume of the robarch2012 symposium and workshop, which will take place in December 2012 in Vienna. Contributions will explore the current status quo in industry, science and practitioners. The symposium will be held as a biennial event. This book is to be the first of the series, comprising the current status of robotics in architecture, art and design.

Textile Conservation Frances Lennard, Patricia Ewer, 2010-09-08 Textile Conservation: Advances in Practice demonstrates the development in the role and practice of the textile conservator and captures the current diversity of textile conservators' work. The book focuses on four major factors which have influenced development in textile conservation practice since the 1980s: the

changing context, an evolution in the way conservators think about objects, the greater involvement of stakeholders, and technical developments. These are all integral to effective conservation decision-making. • Includes case studies from the UK, USA and mainland Europe and Asia • Assesses the conservation of objects in some of the world's major cultural institutions • Highly illustrated in full colour to show the effect of conservation in practice Textile Conservation is a reference manual for textile conservators, textile conservation students and museum and heritage professionals.

Food Colour and Appearance Hutchings, 2012-12-06 Much of man's behaviour is controlled by appearance, but the appearance of his food is of paramount importance to his health and well-being. In day-to-day survival and marketing situations, we can or not most foods are fit to eat from their optical tell whether properties. Although vision and colour perception are the means by which we appreciate our surroundings, visual acceptance depends on more than just colour. It depends on total appearance. In the recent past the food technologist has been under pressure to increase his/her understanding of first, the behaviour of raw materials under processing, and second, the behaviour and motivation of his/her customers in a growing, more discriminating, and worldwide market. The chapters which follow describe the philosophy of total appearance, the factors comprising it, and its application to the food industry. Included are: considerations of the

evolutionary, historical, and cultural aspects of food appearance; the physics and food chemistry of colour and appearance; the principles of sensory appearance assessment and appearance profile analysis, as well as instrumental measurement; the interaction of product appearance, control, and acceptance in the varied environments of the laboratory, production line, supermarket, home and restaurant. A broad examination has been made in an attempt to get into perspective the importance of appearance to all sectors of the industry.

The mycotoxin factbook D. Barug, D.

Bhatnagar, H.P. van Egmond, J.W. van der Kamp, W.A. van Osenbruggen, A. Visconti, 2023-08-28 Mycotoxins are poisonous chemical compounds produced by certain fungi. There are many such compounds, but only a few of them are regularly found in food and animal feedstuffs. Nevertheless, those that do occur in food and feed have great significance in the health of humans and livestock. The effects of some mycotoxins are acute, with symptoms of severe illness appearing very quickly. Other mycotoxins have longer term chronic or cumulative effects on health, including the induction of cancers and immune deficiency. Information about mycotoxins is far from complete, but enough is known to identify them as a serious problem in many parts of the world, causing significant economic losses in addition to their negative health effects. 'The mycotoxin factbook' is aimed at the latest developments to combat the mycotoxin problem. The book contains the peer-reviewed papers of the third conference of the World Mycotoxin Forum. The various chapters focus on mycotoxin food and feed risks in the context of human nutrition and animal feeding. Topics dealt with in 'The mycotoxin factbook' are: - Regulatory issues, international developments and the impact on world trade - The latest information on major mycotoxins and emerging problems in the food chain - The impact

of mycotoxins in the feed chain - New developments in mycotoxin prevention - Trends in mycotoxin analysis 'The mycotoxin factbook' is a valuable resource for researchers and professionals from the food and feed industry as well as from the scientific community. This book is an ideal supplement to 'Meeting the mycotoxin menace' as published in 2004.
