Revisionism and Diversification in New Religious Movements

Eileen Barker, 2016-04-08 New Religious Movements tend to start their lives with a number of unequivocal statements, not only of a theological nature but also about the world and appropriate behaviours for the believer. Yet these apparently inalienable Truths and their interpretations frequently become revised, 'adjusted' or selectively adopted by different believers. This book explores different ways in which, as NRMs develop, stagnate, fade away, or abruptly cease to exist, certain orthodoxies and practices have, for one reason or another, been dropped or radically altered. Sometimes such changes are adapted by only a section of the movement, resulting in schism. Of particular concern are processes that might lead to violent and/or anti-social behaviour. As part of the Ashgate/Inform series, and in the spirit of the Inform Seminars, this book approaches its topic from a wide range of perspectives. Contributors include academics, current and former members of NRMs, and members of 'cult-watching' movements. All the contributions are of a scholarly rather than a polemic nature, and brought together by Eileen Barker, the founder of Inform.

The Political Economy of Aid in Palestine Sahar Taghdisi-

Rad, 2010-10-04 Despite for many years receiving the highest per capita aid worldwide, the economies of the West Bank and Gaza Strip have failed to achieve any lasting developmental outcomes and suffer from major weaknesses which undermine their very survival. This book argues that the dominant, mainstream approach to the study of aid and aid effectiveness is theoretically and empirically inadequate for a comprehensive understanding

and analysis of the workings of aid in developing countries, particularly those undergoing conflict. This book examines the nature of donor operations in Palestine, highlighting the political and ideological determinants of aid allocation and effectiveness, and focussing on the role of trade-related donor assistance in Palestine, more commonly known as Aid for Trade. It discusses how such trade-related assistance is only another instance of donors working 'around' the conflict, as opposed to taking it into account; and how aid to Palestine cannot bring about significant improvement as long as the Palestinian economy is fundamentally affected by Israeli occupation, settlements and blockade. It argues that unless restructured and more carefully targeted, aid can only act as a temporary relief mechanism. Furthermore, the book sheds light on critical areas within Palestinian territories that are in need of development and require significant and immediate attention at both national and international level.

The Extraordinary Book of Native American Lists Arlene B.

Hirschfelder,Paulette Fairbanks Molin,2012 Although Native Americans are one of the most studied people in our society, they too often remain the least understood and visible. Fiction and stereotypes abound, obscuring substantive and fascinating facts about Native societies. The Extraordinary Book of Native American Lists remedies this problem by compiling fun, unique, and significant facts about Native groups into one volume,

complete with references to additional online and print resources.

Finding Our True Home Thich Nhat Hanh, 2001-08-09 Finding Our True Home presents a new definitive translation of the Amitabha Sutra along with Thich Nhat Hanh's first commentary on one of the most practiced forms of Buddhism in the world, the Pure Land school. Introduced in the Buddha's own lifetime, Pure Land practice puts us in touch with the beauty in our own world and brings us the security, solidity, and freedom we need in order to truly enjoy it. Realizing that Buddha is within us, we see that the Pure Land (paradise) is here and now, rather than in the future. Finding Our True Home will open a new Dharma door to many students of meditation.

MEDINFO 2019: Health and Wellbeing e-Networks for All L. Ohno-Machado, B. Séroussi, 2019-11-12 Combining and integrating cross-institutional data remains a challenge for both researchers and those involved in patient care. Patient-generated data can contribute precious information to healthcare professionals by enabling monitoring under normal life conditions and also helping patients play a more active role in their own care. This book presents the proceedings of MEDINFO 2019, the 17th World Congress on Medical and Health Informatics, held in Lyon, France, from 25 to 30 August 2019. The theme of this year's conference was 'Health and Wellbeing: E-Networks for All', stressing the increasing importance of networks in healthcare on the one hand, and the patient-centered perspective on the other. Over 1100 manuscripts were submitted to the conference and, after a thorough review process by at least three reviewers and assessment by a scientific program committee member, 285 papers and 296 posters were accepted, together with 47 podium

abstracts, 7 demonstrations, 45 panels, 21 workshops and 9 tutorials. All accepted paper and poster contributions are included in these proceedings. The papers are grouped under four thematic tracks: interpreting health and biomedical data, supporting care delivery, enabling precision medicine and public health, and the human element in medical informatics. The posters are divided into the same four groups. The book presents an overview of state-of-the-art informatics projects from multiple regions of the world; it will be of interest to anyone working in the field of medical informatics.

Think Bayes Allen B. Downey,2021-05-18 If you know how to program, you're ready to tackle Bayesian statistics. With this book, you'll learn how to solve statistical problems with Python code instead of mathematical formulas, using discrete probability distributions rather than continuous mathematics. Once you get the math out of the way, the Bayesian fundamentals will become

clearer and you'll begin to apply these techniques to real-world problems. Bayesian statistical methods are becoming more common and more important, but there aren't many resources available to help beginners. Based on undergraduate classes taught by author Allen B. Downey, this book's computational approach helps you get a solid start. Use your programming skills to learn and understand Bayesian statistics Work with problems involving estimation, prediction, decision analysis, evidence, and Bayesian hypothesis testing Get started with simple examples, using coins, dice, and a bowl of cookies Learn computational methods for solving real-world problems

God's Word on Canvas Joe Garland, Cindy Garland, Jim Eichenberger, 2010-06 For centuries, the Bible's dramatic accounts have inspired artists to express the beauty, emphasize the power, and elaborate on the meaning of God's Word. Each elective study in the Through Artists' Eyes series is designed to help people connect classic art to the Bible and then apply the truths discovered to their own lives. In God's Word on Canvas you'll experience the artistry of six classic paintings while discovering and discussing the scriptural inspiration behind each one. You'll explore the themes of hope, belief, purpose, God's will, strength, and the future. Each of the six sessions includes:

- Preparing the Canvas—an introductory, group-building activity that gives members an opportunity to share opinions about the main theme of study
- Painting the Big Picture—an examination of the work, life, and thoughts of the artist
- Framing the Art—a Bible study that places the work of the artist within biblical context
- Adding It to the Gallery—discussion questions that

encourage group members to apply the principles of the study to daily life. Additionally, each study features margin notes, tips for projecting the art, definitions of art terms, and suggested supplemental resources for further exploration.
