**Achieving the Paris Climate Agreement Goals** Sven Teske, 2019-02-01 This open access book presents detailed pathways to achieve 100% renewable energy by 2050, globally and across ten geographical regions. Based on state-of-the-art scenario modelling, it provides the vital missing link between renewable energy targets and the measures needed to achieve them. Bringing together the latest research in climate science, renewable energy technology, employment and resource impacts, the book breaks new ground by covering all the elements essential to achieving the ambitious climate mitigation targets set out in the Paris Climate Agreement. For example, sectoral implementation pathways, with special emphasis on differences between developed and developing

countries and regional conditions, provide tools to implement the scenarios globally and domestically. Non-energy greenhouse gas mitigation scenarios define a sustainable pathway for land-use change and the agricultural sector. Furthermore, results of the impact of the scenarios on employment and mineral and resource requirements provide vital insight on economic and resource management implications. The book clearly demonstrates that the goals of the Paris Agreement are achievable and feasible with current technology and are beneficial in economic and employment terms. It is essential reading for anyone with responsibility for implementing renewable energy or climate targets internationally or domestically, including climate policy negotiators, policy-makers at all levels of government, businesses with renewable energy commitments, researchers and the renewable energy industry.

**Renewable Energy** Mansour Al Qubeissi, Ahmad El-Kharouf, Hakan Serhad Soyhan, 2020-09-09 The demand for secure, affordable and clean energy is a priority call to humanity. Challenges associated with conventional energy resources, such as depletion of fossil fuels, high costs and associated greenhouse gas emissions, have stimulated interests in renewable energy

resources. For instance, there have been clear gaps and rushed thoughts about replacing fossil-fuel driven engines with electric vehicles without long-term plans for energy security and recycling approaches. This book aims to provide a clear vision to scientists, industrialists and policy makers on renewable energy resources, predicted challenges and emerging applications. It can be used to help produce new technologies for sustainable, connected and harvested energy. A clear response to economic growth and clean environment demands is also illustrated.

*Services in Global Value Chains* Patrick Low, Gloria O Pasadilla, 2016-06-21

This compilation of 22 firm-specific case studies is an important contribution to the discussion of 'servicification' trends in manufacturing. 'Services have increased in importance and value in many manufacturing value chains, making companies that produce physical products look more like service enterprises. What services do global value chains use in their operations, how important are they and how do economic policies shape firms' configurations, operations, and location of global value chains? This book addresses these questions and more. The interviewed firms, based in 12 APEC economies, come from different sectors ranging from multinational automotive, construction equipment, and electrical appliance manufacturers to small and medium manufacturers of watches or chemical for water treatment. The book analyses what specific services are important in different stages of the

value chain, and whether they are typically provided in-house or outsourced.

Contents: Manufacturing-Related Services (Patrick Low and Gloria O Pasadilla) Manufacturing of Aircraft Control Systems in the Philippines (Andre Wirjo and Gloria O Pasadilla) Industrial Welding Services in Thailand (William Haines) Manufacturing of Mining and Construction Equipment (David Sit and Patrick Low) Manufacturing of Computer Servers (Yuhua Zhang) Wastewater Treatment Services (Arian Hassani and Andre Wirjo) Manufacturing of Automotive Components in the ASEAN Region (Denise Cheung) Manufacturing of Oil and Gas Industry Equipment in Singapore (Andre Wirjo and Gloria O Pasadilla) Car Manufacturing in the Philippines (Sherry Stephenson) Manufacturing of Thermal Power Generation Equipment (Gloria O Pasadilla) Production of Precision Die and Machine Parts in Thailand (Denise Cheung and Andre Wirjo) Manufacturing of Refrigerators (David Sit) Watch Manufacturing (Deborah Elms) Manufacturing of Automotive Components in Mexico: Perspectives from Three Firms (Andre Wirjo, Gloria O Pasadilla and Joel G Bassig) Manufacturing of Telecommunications Equipment (Huani Zhu and Gloria O Pasadilla) Manufacturing of Printed Circuit Boards in Canada (Ben Shepherd) Wine Industry in Chile (Karina Fernandez-Stark and Penny Bamber) Integrated Logistics Solutions Provider in Mexico (Andre Wirjo and Gloria O Pasadilla) Remanufacturing Services in the Construction Machinery Value Chain (Katherine Tait and Gary Gereffi) Manufacturing of Consumer Electronic Appliances in Indonesia (Emmanuel A San Andres) Fresh Cherry Industry in Chile (Penny Bamber and Karina Fernandez-Stark)

**Molecular Diagnostic PCR Handbook** Gerrit J. Viljoen, Louis H. Nel, John R. Crowther, 2005-07-19  
PREFACE The Joint FAO/IAEA Division of Nuclear Techniques in Food and Agriculture is involved in agricultural research and development and assists Member States of FAO and IAEA in improving strategies to ensure food security through the use of nuclear techniques and related biotechnologies, where such techniques have a valuable and often unique role. In particular, molecular diagnostic methods have rapidly evolved in the past twenty years, since the advent of the Polymerase Chain Reaction (PCR). They are used in a wide range of agricultural areas such as, improving soil and water management; producing better crop varieties; diagnosing plant and animal diseases; controlling insect pests and improving food quality and safety. The uses of nucleic acid-directed methods have increased significantly in the past five years and have made important contributions to disease control country programmes for improving national and international trade. These developments include the more routine use of PCR as a diagnostic tool in veterinary diagnostic laboratories. However, there are many problems associated with the transfer and particularly, the application of this technology. These include lack of consideration of: the establishment of quality-assured procedures, the required set-up of the laboratory and the

proper training of staff. This can lead to a situation where results are not assured. This book gives a comprehensive account of the practical aspects of PCR and strong consideration is given to ensure its optimal use in a laboratory environment. This includes the setting-up of a PCR laboratory; Good Laboratory Practice and standardised of PCR protocols.

Carbon Nanotubes M. Endo, S. Iijima, M. S. Dresselhaus, 2013-10-22 Carbon nanotubes have been studied extensively in relation to fullerenes, and together with fullerenes have opened a new science and technology field on nano scale materials. A whole range of issues from the preparation, structure, properties and observation of quantum effects in carbon nanotubes in comparison with 0-D fullerenes are discussed. In addition, complementary reviews on carbon nanoparticles such as carbon nano-capsules, onion-like graphite particles and metal-coated fullerenes are covered. This book aims to cover recent research and development in this area, and so provide a convenient reference tool for all researchers in this field. It is also hoped that this book can serve to stimulate future work on carbon nanotubes.
