**Nanotheranostics for Cancer Applications** Prakash Rai, Stephanie A. Morris, 2018-11-12 This book is the first to focus specifically on cancer nanotheranostics. Each of the chapters that make up this comprehensive volume is authored by a researcher, clinician, or regulatory agency member known for their expertise in this field. Theranostics, the technology to simultaneously diagnose and treat a disease, is a nascent field that is growing rapidly in this era of personalized medicine. As the need for cost-effective disease diagnosis grows, drug delivery systems that can act as multifunctional carriers for imaging contrast and therapy agents could provide unique breakthroughs in oncology. Nanotechnology has enabled the development of smart theranostic platforms that can concurrently diagnose disease, start primary treatment, monitor response and initiate secondary treatments if required. In oncology, chemotherapeutics have been routinely used. Some drugs have proven effective but all carry risks of adverse side

effects. There is growing interest in using remotely triggered drug delivery systems to limit cytotoxicity in the diseased area. This book reviews the use of theranostic nanoparticles for cancer applications over the past decade. First, it briefly discusses the challenges and limitations of conventional cancer treatments, and presents an overview of the use of nanotechnology in treating cancer. These introductory chapters are followed by those exploring cancer diagnosis and a myriad of delivery methods for nanotherapeutics. The book also addresses multifunctional platforms, treatment monitoring, and regulatory considerations. As a whole, the book aims to briefly summarize the development and clinical potential of various nanotheranostics for cancer applications, and to delineate the challenges that must be overcome for successful clinical development and implementation of such cancer theranostics.

Whitfield, PhD, 2013-07-28 The array of topics covered is amazing, making this book a valuable, significant resource for many disciplines...This multidisciplinary review of the literature on minority aging presents the scholarship related to public health and 'social, behavioral, and biological concerns' of aged minorities like no other publication. Graduate students will certainly be well-served by this book, as would faculty teaching aging at both undergraduate and graduate levels...Highly recommended.--Choice: Current Reviews for Academic Libraries ...while practitioners of gerontology,

family medicine, and any professional involved in the care of the elderly will find some practical guidance in the second part of the book, it will really earn a place on the bookshelf of anyone and everyone with an interest in US sociology and the development of public policy for the elderly. With the general aging of the population and the book's accentuation of current issues, this outstanding review will become an indispensable tool.

**Healthy Aging Research** This text provides up-to-date, multidisciplinary, and comprehensive information about aging among diverse racial and ethnic populations in the United States. It is the only book to focus on paramount public health issues as they relate to older minority Americans, and addresses social, behavioral, and biological concerns for this population. Additionally, the book incorporates the work of both established and emerging scholars to provide the broadest possible knowledge base on the needs of and concerns for this rapidly growing population. Chapters focus on subject areas that are recognized as being critical in understanding the well being of minority elders. These include sociology (Medicare, SES, work and retirement, social networks, context/neighborhood, ethnography, gender, demographics), psychology (cognition, stress, mental health, personality, sexuality, religion, neuroscience, discrimination), medicine/nursing/public health (mortality and morbidity, disability, health disparities, long-term care, genetics, dietary issues, health interventions, physical functioning), social work (caregiving, housing, social services, end-of-life care), and many other topics. The book focuses on the needs of four major ethnic groups:

Asian/Pacific Islander, Hispanic/Latino, African American, and Native American. Key Features: Provides current, comprehensive information about minority aging through a multidisciplinary lens Integrates information from scholars in gerontology, anthropology, psychology, public health, sociology, social work, biology, medicine, and nursing Emphasizes the principal public health issues concerning minority elders Offers “one-stop shopping” regarding the development of a substantial knowledge base about minority aging Includes recent progressive research pertaining to the social, cultural, psychological and health needs of elderly minority adults in the US

**The Making of the Global Nuclear Order in the 1970s** David Holloway,Leopoldo Nuti,2020-12-17 This collection of essays offers a fresh look at the 1970s, the crucial decade when the nuclear non-proliferation regime took shape. Exploring a broad array of newly declassified archival sources from different countries across the globe, and moving freely across methodological and national barriers, historians from Europe, North and South America, Asia and Africa discuss the making of the global nuclear order from truly international and transnational perspectives. The result is a fascinating and innovative

volume which will remain an essential reference for historians of the nuclear age, of the cold war, and more generally of the evolution of the international system in the second half of the twentieth century. The chapters in this book were originally published as a special issue of The International History Review.
