International Energy and Poverty Lakshman Guruswamy, 2015-08-20 Around 2.8 billion people globally, also known as the Other Third or energy poor, have little or no access to beneficial energy that meets their needs for cooking, heating, water, sanitation, illumination, transportation, or basic mechanical power. This book uniquely integrates the hitherto segmented and fragmented approaches to the challenge of access to energy. It provides theoretical, philosophical and practical analysis of energy for the low energy (non-hydrocarbon based) Other Third of the world, and how the unmet needs of the energy poor might be satisfied. It comprehensively addresses the range of issues relating to energy justice and energy access for all, including affordable - sustainable energy technologies (ASET's). The book breaks new ground by crafting a unified and cohesive framework for analysis and action that explains the factual and socio-political phenomenon of the energy poor, and demonstrates why clean energy is a primary determinant of their human progress. This is a must-read for all scholars, students, professionals and policy makers working on energy policy, poverty, and sustainable energy technologies.

EU Justice and Home Affairs Strategy in the Western Balkans Florian Trauner, 2008 The states of the Western Balkans constitute a major source of 'soft security' threats to the EU. The EU attaches a great deal of importance to this subject, as reflected by the fact that justice and home affairs is officially one of the most prominent areas of cooperation in the region. This paper aims at elaborating on this process and poses as its key analytical question: What are the actual routes of influence through which the EU can bring these states closer to EU standards in justice and home affairs? The analysis presents the EU's pre-accession strategy as one of the chief mechanisms for exerting influence on the domestic political processes and structures of the Western Balkan states.

Yet the application of the EU's pre-accession framework to this regional setting suffers from two major shortcomings, namely the EU's 'commitment deficit', which generates doubts about the credibility of the EU's membership promise, and the uncertain time frame within which compliance with EU rules will be rewarded. To counterbalance these shortcomings, the EU uses its visa regime for the region as a threat and main incentive for strengthening reform efforts. The analysis concludes with the argument that this strategy creates tension with the broader objectives for the region. Although the EU's overall aim is to integrate these countries and to support them in their transformation towards stable democracies and open, European-oriented societies, its visa regime functions as an obstacle to this very aim by confining the movement of persons, such that they lose sight of the wider horizon.

Handbook of Research on Transnational Higher Education Mukerji, Siran, 2013-08-31 The integration of new technology and global collaboration has undoubtedly transformed learning in higher education from the traditional classroom setting into a domain of support services, academic programs, and educational products which are made available to learners. The Handbook of Research on Transnational Higher Education is a unique compilation of the most recent research done by higher education professionals in the areas of policy, governance, technology, marketing, and leadership development. This publication succeeds in highlighting the most important strategies and policies for professionals, policymakers, administrators, and researchers interested in higher education management.

Sought Through Prayer and Meditation Geno W., 2010-01-28 An inspiring collection of meditations, prayers, and insights designed to facilitate the weekly practice of the 11th step, heightening our conscious contact with God as we understand him. Each year, hundreds of men and

women cross the threshold of the Wolfe Street Center in Little Rock, Arkansas. Many of them attend the Hour of Power, a weekly Sunday morning meeting focused on heightening one's spiritual awareness and growth by focusing on the Eleventh Step of Alcoholics Anonymous: Sought through prayer and meditation to improve our conscious contact with God as we understood Him, praying only for knowledge of His will for us and the power to carry that out. This special book, designed for weekly study, offers a prayer, a meditation, and related insights from the discussions that emerged during the Hour of Power. Sought Through Prayer and Meditation brings the insights of the collective consciousness of the Wolfe Street groups to recovering people everywhere. This book reminds us that if we are vigilant in our spiritual pursuit, we may well achieve what is promised: a glimpse of that ultimate reality which is God's kingdom. (Geno W.)

European Foreign and Security Policy Catherine Gegout,2010-01-01 The first book to offer a theory explaining European Union decision-making in foreign and security policies, European Foreign and Security Policy also provides a detailed and practical analysis of how the Common Foreign and Security Policy really works, before and since the ratification of the Lisbon Treaty. 'Decision-making in the European Union is a process often characterized by obscurity and complexity. In European Foreign and Security Policy, Catherine Gegout explains, with a high degree of clarity, the real-world mechanisms by which agreements are reached among members.'

The Pineapple, 2nd Edition Garth M Sanewski,Duane P Bartholomew,Robert E Paull,2018-11-30 Completely updated with new content and full-colour figures throughout, the second edition of this successful book continues to provide a comprehensive coverage of pineapple breeding, production and yield. Pineapple is an increasingly important crop and demand for fresh pineapple is steadily

growing; stakeholders in the value chain are worldwide. The Pineapple: Botany, Production and Uses provides essential coverage from botany through to postharvest handling and provides the technical information required by all those working with the crop. The second edition: - Contains new chapters on organic production and production for other uses (fibre and ornamentals). - Includes major updates to content on taxonomy, biotechnology, cultural systems, nutrition, varieties and genetic improvement. - Explores physiological changes associated with the year-round growing of pineapple in addition to the associated cultural practices and mineral nutrition. - Considers the impacts of climate change and environmental issues on pineapple crops, and relevant mitigation strategies. - Looks at the effects of new cultivars and technologies on cultural practices and plant nutrition. Written by an international team of experts, this book is an essential resource for researchers, growers and all those involved in the pineapple industry.

Sustainable Tourism: Breakthroughs in Research and Practice Management Association, Information Resources,2018-12-07 Many countries rely on cultural sites and destinations to support their economies. However, they are faced with the ongoing challenge of sustaining tourist attractions and maintaining the equilibrium between the local community and tourist populations. Sustainable Tourism: Breakthroughs in Research and Practice features current research that takes an in-depth look at cooperative strategies and governance for conserving and promoting tourism within both developed and developing economies. Highlighting a range of topics such as tourism development, environmental protection, and responsible hospitality, this publication is an ideal reference source for entrepreneurs, business managers, economists, business professionals, policymakers, academicians, researchers, and graduate-level students interested in the latest research on sustainable tourism.

Tourism and Opportunities for Economic Development in Asia Ordóñez de Pablos, Patricia,Aung, Zeyar Myo,2017-01-25 The growing market of tourism in Asian countries has caused significant changes to the economy, transportation, and safety for citizens. With the ubiquity of tourism, there is now an increasing need for resources to assist in the challenges that arise. Tourism and Opportunities for Economic Development in Asia is a key resource on the priorities, challenges, and strategies in the globalized economy of the Asian tourism market. Highlighting multidisciplinary

studies on cultural tourism, gastronomy, and hospitality management, this publication is an ideal reference source for academicians, researchers, politicians, policy makers, and information technology directors actively involved in the tourism industry.

Advanced Methodologies and Technologies in Engineering and Environmental Science

Khosrow-Pour, D.B.A., Mehdi, 2018-09-07 The ever-increasing awareness and growing focus on environmental issues such as climate change and energy use is bringing about an urgency in expanding research to provide possible solutions to these problems. Through current engineering research and emerging technologies, scientists work to combat modern environmental and ecological problems plaguing the globe. *Advanced Methodologies and Technologies in Engineering and Environmental Science* provides emerging research on the current and forthcoming trends in engineering and environmental sciences to resolve several issues plaguing researchers such as fossil fuel emission and climate change. While highlighting these challenges, including chemical toxicity environmental responsibility, readers will learn how engineering applications can be used across disciplines to aid in reducing environmental hazards. This book is a vital resource for engineers, researchers, professors, academicians, and environmental scientists seeking current research on how engineering tools and technologies can be applied to environmental issues.

Affective Tourism Dorina Maria Buda, 2015-05-15 This book brings together, explores and expands socio-spatial affect, emotion and psychoanalytic drives in tourism for the first time. Affect is to be found in visceral intensities and resonances that circulate around and shape encounters between and amongst tourists, local tourism representatives and places. When affect manifests, it can 'take shapes' in the form of emotions such as fun, joy, fear, anger and the like. When it remains

a visceral force of latent bodily responses, affect overlaps with drives as expounded in psychoanalysis. The aim of the title, therefore, is to explore how and in what ways affects, emotions and drives are felt and performed in tourism encounters in places of socio-political turmoil such as Jordan, Palestine/Israel, with a detour to Iraq. Affective Tourism is highly innovative as it offers a new way of theorising tourism encounters bringing together, critically examining and expanding three areas of scholarship: affective and emotional geographies, psychoanalytic geographies and dark tourism. It has relevance for tourism industries in places in the proximity of ongoing conflicts as it provides in-depth analyses of the interconnections between tourism, danger and conflict. Such understandings can lead to more socio-culturally and politically-sustainable approaches to planning, development and management of tourism. This ground breaking book will be of valuable reading for students and researchers from a number of fields such as tourism studies, geography, anthropology, sociology and Middle Eastern studies.

Business Impacts of COVID-19 Joanna Duda, Tomasz Bernat, 2023-07-21 The coronavirus disease (COVID-19) pandemic has caused serious disruptions to the economy and business activities. The

COVID-19 crisis has also exposed important weaknesses in business and supply chains. It pointed to specific sectors of the economy, primarily related to services, that suffered the most. On the other hand, it has highlighted the great flexibility of the activities of entrepreneurs in their attempts to fight the crisis. The role of government has also been important in tackling this pandemic crisis to contain the epidemic and adopt activities to help entrepreneurs who were most affected by the crisis. Numerous national aid and recovery packages have been announced to support businesses and workers. At the same time, financial decisions were made at the international level, resulting in the mobilization of huge funds that were intended to support the functioning of enterprises. This book shares observations and conclusions from contemporary research and analyses, as well as from personal experiences in creating and implementing anti-crisis solutions in economies and enterprises caused by the COVID-19 pandemic on the economy and its entities. It will be of interest to researchers, academics, policymakers, and students in the fields of international business, economics, crisis management, and entrepreneurship.

Handbook of Research on Green Economic Development Initiatives and Strategies

Erdo?du, M. Mustafa, Arun, Thankom, Ahmad, Imran Habib, 2016-06-27 Climate change is one of the most pressing issues facing the world today, as it affects all sectors of life, be it global economics or human rights activism; timely action is required to avoid global catastrophe. Understanding the importance of climate change mitigation, renewable energies, clean technologies, and green development has become necessary for effective leadership. The Handbook of Research on Green Economic Development Initiatives and Strategies provides the necessary information to reduce the climate change vulnerability of socio-economic systems in the most cost-effective manner. This handbook of research is ideal for policy makers, non-governmental organizations (NGOs),

government agencies, businesses, and professionals looking to temper the effects of climate change.

Geography of World Pilgrimages Lucrezia Lopez, 2023-07-01 This book points out how pilgrimage studies rely on interdisciplinary academic interests, being always more determined by anthropological, social, cultural and economic factors. The volume gathers interdisciplinary contributions revealing different approaches and academic interests when researching pilgrimage. Finally, the proposal introduces a comparative international breath to reflect upon such complex phenomenon that since Antiquity still impregnates the history of human being across the world. As pilgrimage studies are closely related to mobility issues, how the contemporary mobile world is altering and re-signifying pilgrimage dynamics and meanings will also be discussed in detail. The term “pilgrimage” evokes key concepts deriving from different fields, all of them collected in the final glossary. The primary audience of this work are academics and researchers from different fields involved in pilgrimage studies. The work may also be useful in teaching (advanced) university courses.

Global Perspectives on Literary Tourism and Film-Induced Tourism Baleiro, Rita, Pereira, Rosária, 2021-12-10 At the end of the 20th century, the traditional forms of tourism transformed; they expanded by the introduction of new postmodern tourist forms, bringing innovative offers to the marketplace. Two of these new fast-growing forms are literary tourism and film-induced tourism, both of which fall under the umbrella of cultural tourism. Both niches of cultural tourism share the need to create products and experiences that meet the tourists’ expectations. Global Perspectives on Literary Tourism and Film-Induced Tourism discusses literary tourism and film-induced tourism and documents the advances in research on the intersections of literature, film, and the act of traveling. Covering a wide range of topics from film tourism destinations to digital literary tourism, this book is

ideal for travel agents, tourism agencies, tour operators, government officials, postgraduate students, researchers, academicians, cultural development councils and associations, and policymakers.
