*The Belt and Road Initiative and the Politics of Connectivity*  
Bhumitra Chakma, Xiudian Dai, 2022-09-03 This volume analyses New Delhi's reaction to China's Belt and Road Initiative (BRI) and the rise of politics of connectivity and infrastructure building which has heightened Sino-Indian rivalry in South Asia and the Indian Ocean Region (IOR). It can be evidenced that the BRI has transformed the Sino-Indian dynamics from a 'managed rivalry' to an intense geo-political competition. It is contended that competition is inevitable when two powers rise in the same neighbourhood. The Indian government has opposed the BRI since its inception noting that the 'BRI violates India's sovereignty and territorial integrity' because one of the flagship BRI projects - the China-Pakistan Economic Corridor (CPEC) - runs through (Pakistan-controlled) Kashmir which India claims to be its own territory. It has consistently maintained that China's 'connectivity initiatives must be based on universally recognized international norms, good governance, rule of law, openness, transparency and equality, and must be pursued in a manner that respects sovereignty and territorial integrity' of other states. Beyond those stated reservations, New Delhi is concerned about the BRI infrastructure and connectivity projects in the smaller South Asian countries and the Indian Ocean littoral states. India has traditionally viewed South Asia and the IOR as its backyard over which it has historically maintained a position of influence. It is apprehensive that the BRI projects will enhance Beijing's stature and undermine India's influence in the region. In eleven chapters including Introduction and Conclusion, this book explores the dimensions of the rivalry and analyses the causes, dynamics and implications of an accelerated Sino-Indian competition.

### **IBM z/OS V2R2 Communications Server TCP/IP**

**Implementation: Volume 2 Standard Applications** Bill White,Octavio Ferreira,Teresa Missawa,Teddy Sudewo,IBM Redbooks,2016-09-21 For more than 50 years, IBM® mainframes have supported an extraordinary portion of the world's computing work, providing centralized corporate databases and mission-critical enterprise-wide applications. IBM System z®, the latest generation of the IBM distinguished family of mainframe systems, has come a long way from its IBM System/360 heritage. Likewise, its IBM z/OS® operating system is far superior to its predecessors in providing, among many other capabilities, world-class and state-of-the-art support for the TCP/IP Internet Protocol suite. TCP/IP is a large and evolving collection of communication protocols that are managed by the Internet Engineering Task Force (IETF), an open, volunteer organization. Because of its openness, the TCP/IP protocol suite has become the foundation for the set of technologies that form the basis of the Internet. The convergence of IBM mainframe capabilities with Internet technology, connectivity, and standards (particularly TCP/IP) is dramatically changing the face of information technology and driving requirements for even more secure, scalable, and highly available mainframe TCP/IP implementations. The IBM z/OS Communications

Server TCP/IP Implementation series provides understandable, step-by-step guidance for enabling the most commonly used and important functions of z/OS Communications Server TCP/IP. This IBM Redbooks® publication provides useful implementation scenarios and configuration recommendations for many of the TCP/IP standard applications that z/OS Communications Server supports.

India's Approach to Border Management Pushpita Das, 2022-12-29 This book attempts to provide a comprehensive

understanding of the circumstances which have shaped India's approach towards its international borders and the framework it has developed to better manage its borders. The book argues that persistence of various cross-border threats and challenges and an absence of robust intra-regional trade among its neighbouring countries forced India to employ a security-centric and unilateral approach to border management with emphasis on hardening the borders to cross-border trade and travel and keeping the border areas underdeveloped to act as a buffer against external conventional threats. Besides discussing the threats and challenges that India faces along the borders, the book aims to develop an understanding of India's border management practices by analysing various programmes and initiatives such as the raising of border guarding forces; building of physical and electronic fences; the establishment of modern facilities for smoothening legitimate cross-border travel; the development of the border areas through special programmes; and increasing trade and connectivity as well as other cooperative bilateral mechanisms. Print edition not for sale in South Asia (India, Sri Lanka, Nepal, Bangladesh, Pakistan and Bhutan).

### **Reframing the Buffer State in Contemporary**

**International Relations** Bibek Chand, 2023-05-17 This book explores buffer states' agency beyond being highly interactive spaces for the competing strategic and security interests of larger powers. Analyzing 21 political events, the author offers a new conceptual framework for the buffer state, which emphasizes strategic utility and agency. Applying this to the case study of Nepal as a buffer state between India and China, he offers a systematic analysis of Sino-Indian interests in the wider region, and Nepal's interactions with and reactions to them, and argues that the buffer state in contemporary international relations is

characterized by intense competitive overtures from its contending neighboring states. However, the buffer state is not just a spectator but an active participant that consistently assesses and reassesses its geopolitical position in between much larger competing powers. This reading offers a new understanding of the buffer state as a highly dynamic political space wherein the levels of influence and strategies of bigger powers can be examined. Aimed at a multidisciplinary audience, this book will be of particular interest to scholars, practitioners and students of international relations, security studies, strategic studies, and Asian Studies.

*India's Great Power Politics* Jo Inge Bekkevold, S.

Kalyanaraman, 2020-12-22 This book examines India's foreign and defence policy changes in response to China's growing economic and military power and increased footprint across the Indo-Pacific. It further explores India's role in the rivalry between China and the United States. The book looks at the strategic importance of the Indian Ocean Region in the Indo-Pacific geopolitical landscape and how India is managing China's rise by combining economic cooperation with a wide set of balancing strategies. The authors in this book critically analyse the various tools of Indian foreign policy, including defence posture, security alignments, and soft power diplomacy, among others, and discuss the future trajectory of India's foreign policy and the factors which will determine the balance of power in the region and the potential risks involved. The book provides detailed insights into the multifaceted and complex relationship between India and China and will be of great interest to researchers and students of international relations, Asian studies, political science, and economics. It will also be useful for policymakers, journalists, and think tanks interested in the India-China relationship.

**Characterisation of Ferroelectric Bulk Materials and Thin Films** Markys G. Cain, 2014-06-02 This book presents a comprehensive review of the most important methods used in the

characterisation of piezoelectric, ferroelectric and pyroelectric materials. It covers techniques for the analysis of bulk materials and thick and thin film materials and devices. There is a growing demand by industry to adapt and integrate piezoelectric materials into ever smaller devices and structures. Such applications development requires the joint development of reliable, robust, accurate and – most importantly – relevant and applicable measurement and characterisation methods and models. In the past few years there has been a rapid development of new techniques to model and measure the variety of properties that are deemed important for applications development engineers and scientists. The book has been written by the leaders in the field and many chapters represent established measurement best practice, with a strong emphasis on application of the methods via worked examples and detailed experimental procedural descriptions. Each chapter contains numerous diagrams, images, and measurement data, all of which are fully referenced and indexed. The book is intended to occupy space in the research or technical lab, and will be a valuable and practical resource for students, materials scientists, engineers, and lab technicians.

*Soil- Water- Root Processes* Stephen H. Anderson, 2020-01-22  
Rapid advances in tomography and imaging techniques and their successful application in soil and plant science are changing our sciences today. Many more articles using imaging and tomography are being published currently compared to 20 years ago.

*Soil-Water-Root Processes: Advances in Tomography and Imaging* is a unique assemblage of contributions exploring applications of imaging and tomography systems in soil science—it provides an updated collection of X-ray computed tomography, synchrotron microtomography, neutron imaging, magnetic resonance imaging, geophysical imaging tools, and other tomography techniques for evaluating soils and roots. Exciting new procedures and applications have been developed, with the promise to propel forward our understanding of soil and plant properties and

processes.
