Cybersecurity Framework Manufacturing Profile National Institute of Standards,2017-05-31 March 2017 If you like this book (or the Kindle version), please leave positive review. This document provides the Cybersecurity Framework implementation details developed for the manufacturing environment. The Manufacturing Profile of the Cybersecurity Framework can be used as a roadmap for reducing cybersecurity risk for manufacturers that is aligned with manufacturing sector goals and industry best practices. The Profile gives manufacturers:* A method to identify opportunities for improving the current cybersecurity posture of the manufacturing system* An evaluation of their ability to operate the control environment at their acceptable risk level* A standardized approach to preparing the cybersecurity plan for ongoing assurance of the manufacturing system's security Why buy a book you can download for free? First you gotta find it and make sure it's the latest version (not always easy). Then you gotta print it using a network printer you share with 100 other people - and its outta paper - and the toner is low (take out the toner cartridge, shake it, then put it back). If it's just 10 pages, no problem, but if it's a 250-page book, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. An engineer that's paid $75 an hour has to do this himself (who has assistant's anymore?). If you are paid more than $10 an hour and use an ink jet printer, buying this book will save you money. It's much more cost-effective to just order the latest version from Amazon.com This book is published by 4th Watch Books and includes copyright material. Health Program Planning, Implementation, and Evaluation Lawrence W. Green,Andrea Carlson Gielen,Judith M. Ottoson,Darleen V. Peterson,Marshall W. Kreuter,2022-02-08 A time-tested, landmark approach to health promotion and communication projects and everything that goes into making them successful. For more than 40 years, the PRECEDE-PROCEED model, developed in the early 1970s by Lawrence W. Green and first published as a text in 1980 with Marshall W. Kreuter, Sigrid G. Deeds, and Kay B. Partridge, has been effectively applied worldwide to address a broad range of health issues: risk factors like tobacco and lack of exercise, social determinants of health such as lack of access to transportation and safe housing, and major disease challenges like heart disease and guinea worm disease. In Health Program Planning, Implementation, and Evaluation, Green and his team of senior editors and chapter authors combine their expertise to offer a high-level guide to public health programming. This guide aligns with foundational public health competencies required by increasingly rigorous certification and accreditation standards. Driven by the coronavirus pandemic and a looming climate crisis, the book addresses the rapid changes in modern-day conceptions of disease prevention and health promotion. Today's public health practitioners and researchers are often called upon to address a complex web of factors, including population inequities, that influence health status, from biology to social and structural determinants. Program and policy solutions to population health challenges require systematic planning, implementation, and evaluation. Providing students with knowledge, skills, and a range of tools, the book recognizes new approaches to communication and fresh methods for reaching a greater diversity of communities. The authors highlight the importance of starting the population health planning process with an inclusive assessment of the social needs and quality-of-life concerns of the community. They explain how to assess health problems systematically in epidemiological terms and address the behavioral and environmental determinants of the most important and changeable health problems. They also cover procedures for assessing and developing the capacity of communities and organizations to implement and evaluate programs. Drawing on more than 1,200 published applications of the PRECEDE-PROCEED model, Health Program Planning, Implementation, and Evaluation features numerous case studies and contributions from internationally recognized experts, including governmental, academic, and community public health leaders, giving readers a thorough and well-rounded view of the subject. Ultimately, it is an up-to-date powerhouse for community and global health promotion at all levels. Contributors: Faten Ben Abdelaziz, John P. Allegrante, Patricia Chalela, Cam Escoffery, Maria E.
