*Inside the Mind of Marine Le Pen* Michel Eltchaninoff,2018 What drives Marine Le Pen and France's Front National? Has her party really changed its ways, or is she merely rebranding its old ideas and policies for a new era? In the age of Brexit and Trump, France too has seen a growing audience for identity-based politics. Under 'Marine', the FN is enjoying unprecedented success. But what's her secret? This is a probing investigation into the philosophy of Marine Le Pen's FN. It seeks answers in her speeches, in the history of French nationalism and in revealing interviews with those on the far right-including Jean-Marie Le Pen himself. Michel Eltchaninoff exposes a vision of France tyrannized by liberalism and seduced by the offer of an uncompromising alternative: a Republic 'beyond Left and Right', defined by its enemies and aligned with Putin's Russia. Whatever Marine Le Pen is thinking, she has not forgotten the FN's roots. The French far right is now stronger than ever.

*Health Care for Older Adults* Francisco José Tarazona Santabalbina,Sebastià J Santaeugènia Gonzàlez,José Viña,2021-09-29 In recent decades, life expectancy has been increasing. This is a historical milestone in the history of humanity. We have never lived so long before. In these circumstances, giving the best care to older adults efficiently is one of the greatest challenges of developed countries. This book explores different initiatives that result in the improvement of health conditions of older adults, such as multicomponent physical exercise programs, interventions that try to avoid loneliness and social isolation, and multidisciplinary assessment, and the treatment of frailty and other geriatric syndromes, of the elderly in various settings such as the Emergency Unit, Orthogeriatrics, and Oncogeriatrics. This book offers different manuscripts to readers, each trying to improve life satisfaction, quality of life, and life expectancy in older adults in different scenarios. It is up to us to achieve these goals. We are sure that these interesting chapters will contribute to improving clinical practices. Following the completion of the Special Issue Health Care for Older Adults for the international Journal of Environmental Research and Public Health, the Guest Editors felt the satisfaction of having reached 18 published manuscripts and the possibility of transforming this volume into a book. This book was born from the need to show how health and social advances have increased human longevity as never before. We live longer, knowing more and more the epigenetic mechanisms of this longevity, as extended aging also coexists with the least favorable aging trajectories. Among them, a syndrome stands out from the gerontological and geriatric perspective: frailty. Due to the pandemic, a social problem has increased its presence in clinical practice: ageism. Older adults have found it difficult to access the necessary clinical resources due to the simple matter of age. However, at this moment, we are able to detect and to reverse frailty. In the same way, we should aim to prevent loneliness and social isolation, involved in social frailty. Geriatric syndromes are underdiagnosed and undertreated, but clinical and geriatric knowledge provide diagnostic tools and non-pharmacological approaches to prevent and to treat them. All health professionals working together in an interdisciplinary team could improve the clinical practices to develop a quality health care for older adults, improving their life satisfaction and quality of life perception too.

**Introduction to Forensic Psychology** Curt R. Bartol,Anne M. Bartol,2018-01-16 The text provides a great, general overview of different areas of criminal and civil forensic psychology. —Apryl Alexander, PsyD, Clinical Assistant Professor, University of Denver Written by authors with extensive experience in the field and in the classroom, Introduction to Forensic Psychology: Research and Application, Fifth Edition demonstrates how to analyze psychological knowledge and research findings and then apply these findings to the civil and criminal justice systems. Focusing on research-based forensic practice and practical application, this text uses real-life examples and case law discussions to define and explore forensic psychology. This text introduces students to emerging specializations within forensic psychology, including investigative psychology, family forensic psychology, and police and public safety psychology. Students will develop a multicultural perspective with an ethnic and racial sensitivity, which is critical to the successful practice of forensic psychology. New to the Fifth Edition: Updated statistics, research, and case law, such as recent Aid in Dying legislation, as well as analysis of recent events, help students see the real-world applications to current events. Updated Focus boxes empower students to dig deeper into current issues, such as mental health courts, community-oriented policing, child abduction, hate crimes, the death penalty, and more. All Focus boxes also contain discussion questions for students to debate in a classroom setting. All new From My Perspective boxes provide students with information about career choices as well as helpful advice about pursuing their goals. Increased attention to immigration-related issues offers students additional insights into immigration proceedings and ways to consult with the courts. Additional coverage of human trafficking and online sexual predators enables students to better understand the psychological effects on victims and the services available to help. Current research on violent video games, cyberbullying, and cyberstalking provides real examples of the effects of violent media. New research on juveniles allows students to see the important contributions of neuropsychologists, particularly in terms of brain development in adolescents and promising community-based treatment approaches for juveniles.
