Collecting and Conserving Net Art Annet Dekker,2018-05-08 Collecting and Conserving Net Art explores the qualities and characteristics of net art and its influence on conservation practices. By addressing and answering some of the challenges facing net art and providing an exploration of its intersection with conservation, the book casts a new light on net art, conservation, curating and museum studies. Viewing net art as a process rather than as a fixed object, the book considers how this is influenced by and executed through other systems and users. Arguing that these processes and networks are imbued with ambiguity, the book suggests that this is strategically used to create suspense, obfuscate existing systems and disrupt power structures. The rapid obsolescence of hard and software, the existence of many net artworks within restricted platforms and the fact that artworks often act as assemblages that change or mutate, make net art a challenging case for conservation. Taking the performative and interpretive roles conservators play into account, the book demonstrates how practitioners can make more informed decisions when responding to, critically analysing or working with net art, particularly software-based processes. Collecting and Conserving Net Art is intended for researchers, academics and postgraduate students, especially those engaged in the study of museum studies, conservation and heritage studies, curatorial studies, digital art and art history. The book should also be interesting to professionals who are involved in the conservation and curation of digital arts, performance, media and software.

Team Geek Brian W. Fitzpatrick,Ben Collins-Sussman,2012-07-06 In a perfect world, software engineers who produce the best code are the most successful. But in our perfectly messy world, success also depends on how you work with people to get your job done. In this highly entertaining book, Brian Fitzpatrick and Ben Collins-Sussman cover basic patterns and anti-patterns for working with other people, teams, and users while trying to develop software. This is valuable information from two respected software engineers whose popular series of talks—including Working with Poisonous People—has attracted hundreds of thousands of followers. Writing software is a team sport, and human factors have as much influence on the outcome as technical factors. Even if you’ve spent decades learning the technical side of programming, this book teaches you about the often-overlooked human component. By learning to collaborate and investing in the soft skills of software engineering, you can have a much greater impact for the same amount of effort. Team Geek was named as a Finalist in the 2013 Jolt Awards from Dr. Dobb's Journal. The publication's panel of judges chose five notable books, published during a 12-month period ending June 30, that every serious programmer should read.

The Propaganda Model Today Joan Pedro-Carañana,Daniel Broudy,Jeffery Klaehn,2018-10-25 While the individual elements of the propaganda system (or filters) identified by the Propaganda Model (PM) – ownership, advertising, sources, flak and anti-communism – have previously been the focus of much scholarly attention, their systematisation in a model, empirical corroboration and historicisation have made the PM a useful tool for media analysis across cultural and geographical boundaries. Despite the wealth of scholarly research Herman and Chomsky’s work has set into motion over the past decades, the PM has been subjected to marginalisation, poorly informed critiques and misrepresentations. Interestingly, while the PM enables researchers to form discerning predictions as regards corporate media performance, Herman and Chomsky had further predicted that the PM itself would meet with such marginalisation and contempt. In current theoretical and empirical studies of mass media performance, uses of the PM continue, nonetheless, to yield important insights into the workings of political and economic power in society, due in large measure to the model’s considerable explanatory power.

Fatigue Management Amir Sharafkhaneh,Max Hirshkowitz,2018-08-23 In this soon-to-be gold-standard text, a distinguished panel of experts provides a comprehensive discussion of the various medical, neurological, psychiatric, and psychological factors underlying fatigue and sleepiness in the workplace and in patients. In reviewing current best practices in managing fatigue and sleepiness conditions to improve workplace safety, the book importantly begins with an overview of fatigue’s definitions and concepts. It then moves into discussing the historical perspective on sleepiness and fatigue, the definitions and classifications of fatigue, and assessments of fatigue in the laboratory and in clinical settings. The book continues by exploring medical causes of fatigue in detail; how medication and recreational agents may result in fatigue; and the treatment of sleep disorders. Additional topics include best practices in the treatment of narcolepsy and hypersomnia, a review of circadian rhythm and fatigue, the treatment of heart failure and improvement in fatigue, and the management of fatigue in hospitalized patients. A major contribution to the field, this invaluable title will be of significant interest to all clinicians concerned with safeguarding safety in the workplace by accurately diagnosing and managing patients with fatigue and sleepiness problems. Researchers will also find this title of great interest.

Determination of Oil and Gas Reserves Petroleum Society of CIM.,1994 The estimation, classification and reporting of oil and gas reserves and related substances has always been a vital part of the oil and gas industry. In spite of a

What Happened to the Women? Ruth Rubio-Marín,2006 What happens to women whose lives are affected by human rights violations? What happens to their testimony in court or in front of a truth commission? Women face a double marginalization under authoritarian regimes and during and after violent conflicts. Yet reparations programs are rarely designed to address the needs of women victims. What Happened to the Women? Gender and Reparations for Human Rights Violations emphasizes the necessity of a gender dimension in reparations programs to improve their handling of female victims and their families. A joint project of the International Center for Transitional Justice and Canada's International Development Research Centre, What Happened to the Women? includes studies of gender and reparations policies in Guatemala, Peru, Rwanda, Sierra Leone, South Africa, and Timor-Leste. Contributors represent a wide range of fields related to transitional justice and include international human rights lawyers, members of truth and reconciliation commissions, and NGO representatives.

Dare to Question Ted Kuntz,2018-02-06 The vaccine experiment is based upon the assumption that injecting a mixture of complex biological substances will protect humans from infectious diseases. While there is evidence that some vaccines have been effective in the suppression of some infectious diseases (measles, chicken pox, whooping cough), the total impact of the artificial stimulation of the immune system on overall health is not well understood or established. The artificial immunization program was developed in an era when virtually nothing was known about the impact of injecting these complex biochemical substances on organ systems, the neurological system, the immune system, and at the cellular level. Today there is substantial evidence of the harm caused by injecting vaccine ingredients. As more and more evidence of adverse events and injury from vaccination is acknowledged, including death, there is a growing movement to modify the official CDC vaccine schedule. Is it reasonable to consider a modified or delayed vaccine schedule in response to vaccine injury and death, or is it time to question everything about the vaccine program? This is a plea from one parent to another - dare to question.

A Global Radical Waterfront Holger Weiss,2021 This volume investigates the ambition of the Red International of Labour Unions to radicalize the global waterfront during the interwar period. The main vehicle was the International Propaganda Committee of Transport Workers, replaced in 1930 by the International of Seamen and Harbour Workers as well as their agitation and propaganda centres, the International Harbour Bureaus and the International Seamen's Clubs. The investigation scrutinizes their solidarity campaigns in support of local and national strikes as well as on their agitation against discrimination, segregation and racism within the unions, their demands to organize non-white maritime transport workers, and their calls for engagement in anti-fascist, anti-war and anti-imperialist actions--
