Reflective Teaching in Higher Education Paul Ashwin, David Boud, Susanna Calkins, Kelly Coate, Fiona Hallett, Greg Light, Kathy Luckett, Iain MacLaren, Katarina Mårtensson, Jan McArthur, Velda McCune, Monica McLean, Michelle Tooher, 2020-02-20 Reflective Teaching in Higher Education is the definitive textbook for those wanting to excel at teaching in the sector. Informed by the latest research in this area, the book offers extensive support for those at the start of an academic career and career-long professionalism for those teaching in higher education. Written by an international collaborative author team of experts led by Paul Ashwin, Reflective Teaching in Higher Education offers two levels of support: - practical guidance for day-to-day teaching, covering key issues such as strategies for improving learning, teaching and assessment, curriculum design, relationships, communication, and inclusion - evidence-informed 'principles' to aid understanding of how theories can effectively inform teaching practices, offering ways to develop a deeper understanding of teaching and learning in higher education In addition to new case studies from a wider variety of countries than ever before, this new edition includes discussion of: - What is meant by 'agency' - Gender, ethnicity, disability and university teaching - Digital learning spaces and social media - Teaching career development for academics - Decolonising the curriculum - Assessment and feedback practices - Teaching excellence and 'learning gain' - 2015 UN General Assembly 2030 Agenda for Sustainable Development reflectiveteaching.co.uk provides a treasure trove of additional support. It includes supplementary sector specific material to support for considering questions around society's educational aims, and much more besides.

Innovations in Asian Higher Education Zhou Zhong, Hamish Coates, Shi Jinghuan, 2019-10-16 This Asian Higher Education Outlook (AHEO) series is produced in collaboration with the Asian Universities Alliance (AUA), a network of 15 leading universities. This book focuses on education innovation in the world's biggest higher education region. With contributions from every AUA university, the book articulates innovations in teaching innovation, reforms in doctoral education, and maturing forms of online and mobile education. The book reveals the growing role universities are playing in sustainable development, charts strategies for boosting universities' social contributions, and reviews the futures being designed by these leading universities. The book offers case studies and authoritative insights from primary research, and reveals trends in policy and practice. It is a must-read for people working anywhere in the world with an interest in higher education.

Leadership in Higher Education from a Transrelational Perspective Christopher M. Branson, Maureen Marra, Margaret Franken, Dawn Penney, 2018-04-05 There is an abundance of research saying that not only is leadership in higher education ineffective but also that it actually undermines the essential work that should be happening in universities. Christopher M. Branson, Maureen Marra, Margaret Franken and Dawn Penney provide a new insight into leadership that has proven to be far more effective for all involved – the transrelational approach to leadership. This new way of leading places an emphasis on the importance of the relationships that the leader develops with each and every person they are leading. However, in order to apply this new way of leading, higher education institutions must change some of the key ways they work. This book provides direction in how this can happen, what benefits would result, and offers a view on what the future for higher education might be if such changes to leadership are not made. Leadership in Higher Education from a Transrelational Perspective both critiques the likely implications of adopting this transrelational form of leadership into a higher educational institution and discusses the implications of not doing so. Although a transrelational approach to leadership might seem daunting for higher education institutions to adopt, is there any other choice? The authors argue that it is inconceivable for institutions founded upon promoting human development as a consequence of research to ignore such research that not only questions the suitability of current leadership practices but also offers a more effective alternative.

The Veiled Web Catherine Asaro, 2022-09-27 “A near-future layering of East and West, of religion and technology . . . and of love and its loss—all woven into an intriguing tapestry.” —Diana Gabaldon, bestselling author of the Outlander series Winner of the Homer Award for Best Science Fiction Novel A renowned prima ballerina, Lucia del Mar is far more comfortable expressing herself through dance than with words. Shy and introverted, she spends most of her spare time on her laptop. Still, Lucia’s job forces her out of her comfort zone, which is how she winds up at a White House reception where she meets Rashid al-Jazari, the wealthy CEO of a multinational corporation. Although attracted to him, Lucia can’t help but feel awkward and shrugs off their encounter as a one-time event. Not realizing he feels a similar attraction, she never imagines Rashid will seek out her performances; he is the last person she expects to see when her dance company

travels to Italy. Their reunion takes an even more unexpected turn when they're both drugged and kidnapped. Although they overcome their abductors, it leaves them stranded in North Africa. For her own safety, Lucia agrees to marry Rashid, at least for the time being. As she recovers at his family compound in Morocco, reeling from their brush with danger, she struggles to fit into a culture she knows nothing about—and to deal with her growing feelings for Rashid. At the same time, at his secret office there, Rashid is developing a dramatic leap forward in artificial intelligence combined with virtual reality. He finds himself plunged into a fight for control of his work against powerful international forces, and caught in the middle, Lucia is swept into that battle . . . “A terrific novel, ripping a path from today’s headlines to tomorrow’s realities.” —Robert J. Sawyer, Nebula Award-winning author

UAT Defined Rob Cimperman, 2006-11-28 This is the eBook version of the printed book. This digital Short Cut provides a concise and supremely useful guide to the emerging trend of User Acceptance Testing (UAT). The ultimate goal of UAT is to validate that a system of products is of sufficient quality to be accepted by the users and, ultimately, the sponsors. This Short Cut is unique in that it views UAT through the concept that the user should be represented in every step of the software delivery lifecycle—including requirements, designs, testing, and maintenance—so that the user community is prepared, and even eager, to accept the software once it is completed. Rob Cimperman offers an informal explanation of testing, software development, and project management to equip business testers with both theory and practical examples, without the overwhelming details often associated with books written for professional testers. Rather than simply explaining what to do, this resource is the only one that explains why and how to do it by addressing this market segment in simple, actionable language. Throughout the author’s considerable experience coordinating UAT and guiding business testers, he has learned precisely what testers do and do not intuitively understand about the software development process. UAT Defined informs the reader about the unfamiliar political landscape they will encounter. Giving the UAT team the tools they need to comprehend the process on their own saves the IT staff from having to explain test management from the beginning. The result is a practice that increases productivity and eliminates the costs associated with unnecessary mistakes, tedious rework, and avoidable delays. Chapter 1 Introduction Chapter 2 Defining UAT—What It Is...and What It Is Not Chapter 3 Test Planning—Setting the Stage for UAT Success Chapter 4 Building the Team—Transforming Users into Testers Chapter 5 Executing UAT—Tracking and Reporting Chapter 6 Mitigating Risk—Your Primary Responsibility

For the Record National Research Council, Division on Engineering and Physical Sciences, Computer Science and Telecommunications Board, Commission on Physical Sciences, Mathematics, and Applications, Committee on Maintaining Privacy and Security in Health Care Applications of the National Information Infrastructure, 1997-07-09 When you visit the doctor, information about you may be recorded in an office computer. Your tests may be sent to a laboratory or consulting physician. Relevant information may be transmitted to your health insurer or pharmacy. Your data may be collected by the state government or by an organization that accredits health care or studies medical costs. By making information more readily available to those who need it, greater use of computerized health information can help improve the quality of health care and reduce its costs. Yet health care organizations must find ways to ensure that electronic health information is not improperly divulged. Patient privacy has been an issue since the oath of Hippocrates first called on physicians to keep silence on patient matters, and with highly sensitive data—genetic information, HIV test results, psychiatric records—entering patient records, concerns over privacy and security are growing. *For the Record* responds to the health care industry's need for greater guidance in protecting health information that increasingly flows through the national information infrastructure—from patient to

provider, payer, analyst, employer, government agency, medical product manufacturer, and beyond. This book makes practical detailed recommendations for technical and organizational solutions and national-level initiatives. For the Record describes two major types of privacy and security concerns that stem from the availability of health information in electronic form: the increased potential for inappropriate release of information held by individual organizations (whether by those with access to computerized records or those who break into them) and systemic concerns derived from open and widespread sharing of data among various parties. The committee reports on the technological and organizational aspects of security management, including basic principles of security; the effectiveness of technologies for user authentication, access control, and encryption; obstacles and incentives in the adoption of new technologies; and mechanisms for training, monitoring, and enforcement. For the Record reviews the growing interest in electronic medical records; the increasing value of health information to providers, payers, researchers, and administrators; and the current legal and regulatory environment for protecting health data. This information is of immediate interest to policymakers, health policy researchers, patient advocates, professionals in health data management, and other stakeholders.
