Good Economics for Hard Times Abhijit V. Banerjee 2019-11-12 The winners of the Nobel Prize show how economics, when done right, can help us solve the thorniest social and political problems of our day. Figuring out how to deal with today's critical economic problems is perhaps the great challenge of our time. Much greater than space travel or perhaps even the next revolutionary medical breakthrough, what is at stake is the whole idea of the good life as we have known it. Immigration and inequality, globalization and technological disruption, slowing growth and accelerating climate change--these are sources of great anxiety across the world, from New Delhi and Dakar to Paris and Washington, DC. The resources to address these challenges are there--what we lack are ideas that will help us jump the wall of disagreement and distrust that divides us. If we succeed, history will remember our era with gratitude; if we fail, the potential losses are incalculable. In this revolutionary book, renowned MIT economists Abhijit V. Banerjee and Esther Duflo take on this challenge, building on cutting-edge research in economics explained with lucidity and grace. Original, provocative, and urgent, *Good Economics for Hard Times* makes a persuasive case for an intelligent interventionism and a society built on compassion and respect. It is an extraordinary achievement, one that shines a light to help us appreciate and understand our precariously balanced world.

The Least Cost Path From Landscape Genetics to Landscape Genomics Samuel A. Cushman
2018-08-03 Ecosystems are the stage on which the play of evolution is acted, and ecosystems are complex, spatially structured and temporally varying. The purpose of this Research Topic is to explore critical challenges and opportunities for the transition from landscape genetics to landscape genomics. Landscape genetics has focused on the spatial analysis of small genetic datasets, typically comprised of less than 20 microsatellite markers, taken from clusters of individuals in putative populations or distributed individuals across landscapes. The recent emergence of large scale genomic datasets produced by next generation sequencing methods poses tremendous challenge and opportunity to the field. Perhaps the greatest is to produce, process, curate, archive and analyze spatially referenced genomic datasets in a way such that research is led by a priori hypotheses regarding how environmental heterogeneity and temporal dynamics interact to affect gene flow and selection. The papers in the Research Topic cover a broad range of topics under this area of focus, from reviews of the emergence of landscape genetics, to best practices in spatial analysis of genetic data. The compilation, like the emerging field itself, is eclectic and illustrates the scope of both the challenges and opportunities of this emerging field.

Developments and Advances in Defense and

Security Álvaro Rocha 2023-03-02 This book gathers the proceedings of the Multidisciplinary International Conference of Research Applied to Defense and Security (MICRADS 2022), held at Escuela Naval de Suboficiales ARC "Barranquilla," in Barranquilla, Colombia, during July 11-13, 2022. It covers a broad range of topics in systems, communication, and defense; strategy and political-administrative vision in defense; and engineering and technologies applied to defense. Given its scope, it offers a valuable resource for practitioners, researchers, and students alike.

O DIREITO TRIBUTÁRIO NA PRÁTICA DOS TRIBUNAIS SUPERIORES: SISTEMA

TRIBUTÁRIO NACIONAL E CÓDIGO TRIBUTÁRIO NACIONAL EM DE TATHIANE DOS SANTOS

PISCITELLI 2017-10-06 A Série GVlaw, editada pelo Programa de Educação Executiva da DIREITO GV (GVlaw), investe na ampla difusão do conhecimento produzido na Escola e no emprego de métodos participativos de ensino. Serve de suporte para uma prática pedagógica que aposta na autonomia discente, buscando superar a visão que assume o professor como detentor de todas as respostas e o aluno como espectador passivo de conhecimentos transmitidos por seus mestres. O livro é coordenado pela Professora TATHIANE PISCITELLI, com a participação de juristas renomados: Daniel Monteiro Peixoto, Eurico Marcos Diniz de Santi, Francisco Secaf Alves Silveira, German Alejandro San Martín Fernández, Guilherme Lautenschlaeger Novello, Karem Jureidini Dias, Marcelo Guerra Martins, Renato Lopes Becho, Roberto Fleury de Arruda Camargo, Roberto França de Vasconcellos, Roberto Quiroga Mosquera e Vanessa Rahal Canado. A obra aborda temas gerais da ciência tributária, sempre trazendo o tratamento jurisprudencial acerca do tema. São tratados temas cotidianos para os advogados militante na área, como a imunidade dos livros eletrônicos, natureza jurídica dos emolumentos judiciais e extrajudiciais, regulação de condutas, sigilo bancário, ISS, lei de responsabilidade fiscal, planejamento tributário, incidência do ICMS na importação, responsabilidade tributária dos sócios e de terceiros, decadência, entre outros.

Holding Familiar Marco Túlio Freire 2022-03-10

Hoje muito se fala de Holdings, em especial a patrimonial e familiar, e tal termo geralmente é vinculado com uma expressão: BLINDAGEM PATRIMONIAL. Por esse e por outros motivos (sendo mito ou não) esse livro foi escrito! Pois quando o assunto é HOLDING muito se fala... mas muito pouco se sabe de fato! O intuito desse livro é, além de dar noções básicas sobre o que é e como funciona uma holding, mostrar se a blindagem patrimonial é real de fato (e se é legal). Verá também a importância de ter em mente que, para se criar uma holding, não existe fórmula mágica. Cada holding é única! E em alguns casos a holding pode não ser a melhor opção! E tem que ser criada por uma equipe multidisciplinar, sendo por profissionais jurídicos, contábeis e administrativos. Nesse livro você terá uma visão geral, sem juridiquês confuso e complicado, com linguagem simples e acessível, das noções básicas de uma holding.

World Development Indicators 2016 World Bank 2016-04-29 World Development Indicators 2016 provides a compilation of relevant, high-quality, and internationally comparable statistics about global development and the fight against poverty. It is intended to help policymakers, students, analysts, professors, program managers, and citizens find and use data related to all aspects of development, including those that help monitor progress toward the World Bank Group's two goals of ending poverty and promoting shared prosperity. Six themes are used to organize indicators—world view, people, environment, economy, states and markets, and global links. WDI 2016 includes: •A selection of the most popular indicators across 214 economies and 14 country groups organized into six WDI themes •A new section on the Sustainable Development Goals (SDGs) has replaced the one on Millennium Development Goals (MDGs). •The SDG section covers all 17 goals, and important targets to achieve these goals. Each goal has been presented in a maximum 2-page spread with selected indicators to explain the targets. •Each of the remaining sections includes an introduction, a map, a table of the most relevant and popular indicators for that theme together with a discussion of indicator compilation methodology

•A user guide describing resources available online and on mobile apps. Download the WDI DataFinder Mobile App and other Data Apps at data.worldbank.org/apps. WDI DataFinder is a mobile app for browsing the current WDI database on smartphones and tablets, using iOS and Android, available in four languages: English, French, Spanish, and Chinese. Use the app to:

- Browse data using the structure of the WDI
- Visually compare countries and indicators
- Create, edit, and save customized tables, charts, and maps
- Share what you create on Twitter, Facebook, and via email

Federalismo Fiscal e impactos das contribuições de Seguridade Social a partir da Constituição de 1988

André Mendes de Moura 2020-10-15 Dentre muitos desafios, a Constituição de 1988, ao apreciar a necessidade de ampliação do sistema de arrecadação tributária, deparou-se com dois objetos de deliberação: aperfeiçoamento do federalismo fiscal, mediante fortalecimento da autonomia financeira dos entes subnacionais e redução das desigualdades regionais, com o robustecimento dos mecanismos de transferências intergovernamentais, e o surgimento de uma nova ordem social, que deu origem ao conceito de seguridade social, abrangendo a previdência social, a assistência social e a saúde, sob as premissas de diversidade da base de financiamento e universalidade de acesso. Ambas as diretrizes demandariam um aporte significativo de recursos, que teve como desdobramento um novo desenho na estrutura de arrecadação, concretizado de maneira desintegrada, resultando em dois sistemas paralelos e conflitantes. Nos trinta anos que se sucederam à edição da Carta de 1988, não obstante o aumento de arrecadação de receitas tributárias por parte do governo central, as receitas não foram transferidas de maneira proporcional para os governos subnacionais. A falta de integração na construção dos dois sistemas resultou em vantagens para o governo central instituir contribuições de seguridade social, não sujeitas à partilha de receitas aos entes federados, em detrimento dos impostos, submetidos à repartição, situação que foi potencializada com a criação de mecanismos de

desvinculação das receitas de seguridade social e por mudanças no contexto econômico e político. O resultado foi um impacto negativo no mecanismo de transferências intergovernamentais, afastando a pretensão de se aperfeiçoar o federalismo fiscal. *Think Stats* Allen B. Downey 2014-10-16 If you know how to program, you have the skills to turn data into knowledge, using tools of probability and statistics. This concise introduction shows you how to perform statistical analysis computationally, rather than mathematically, with programs written in Python. By working with a single case study throughout this thoroughly revised book, you'll learn the entire process of exploratory data analysis—from collecting data and generating statistics to identifying patterns and testing hypotheses. You'll explore distributions, rules of probability, visualization, and many other tools and concepts. New chapters on regression, time series analysis, survival analysis, and analytic methods will enrich your discoveries. Develop an understanding of probability and statistics by writing and testing code Run experiments to test statistical behavior, such as generating samples from several distributions Use simulations to understand concepts that are hard to grasp mathematically Import data from most sources with Python, rather than rely on data that's cleaned and formatted for statistics tools Use statistical inference to answer questions about real-world data

Abuse and Power Carter Page 2020-08-25 The chickens are coming home to roost for the corrupt officials, mainstream media, and Democratic operatives who ruined the life of an innocent American in an attempt to subvert our democracy. Carter Page, the man at the center of one of the worst scandals in our country's history, reveals how our nation's top law enforcement officials abused their power and framed an innocent American citizen in their effort to take down Donald Trump. Page's gripping account, which shows that the rot goes deeper than anyone realized, names the men and women who tried to pull off a coup and didn't care who got hurt.

Management and Public Health Response, Volume II (volume I.A) Thomas Rawson 2023-05-31 Almost nine months since the first recorded case, the novel betacoronavirus; severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2), has now passed 18 million confirmed cases. The multi-disciplinary work of researchers worldwide has provided a far deeper understanding of COVID-19 pathogenesis, clinical treatment and outcomes, lethality, disease-spread dynamics, period of infectivity, containment interventions, as well as providing a wealth of relevant epidemiological data. With 27 vaccines currently undergoing human trials, and countries worldwide continuing to battle case numbers, or prepare for resurgences, the need for efficient, high-quality pipelines for peer-reviewed research remains as crucial as ever.

Конституционный принцип противодействия коррупции. Монография Лафитский В.И. 2019-02-25 В книге исследуются истоки и эволюция конституционно-правового отражения феномена коррупции в основных законах разных эпох, социально-экономических формаций, религиозных и правовых традиций; выявляются конституционные модели, методы и средства борьбы с коррупцией; на основе анализа текстов конституций, документов учредительных (конституционных) собраний, доктринальных работ обосновывается конституционный принцип противодействия коррупции как одна из универсальных идей и ценностей современного конституционно-правового развития.

O impacto dos instrumentos desburocratizantes na celeridade processual da Corregedoria da Receita Federal do Brasil Luciano Rosa Vicente 2022-03-22 Entre 2006 e 2019 introduziram-se no Sistema Correccional do Poder Executivo Federal alguns instrumentos voltados à desburocratização e aceleração processual. Este estudo tratou dos reflexos desses instrumentos na celeridade processual da Corregedoria da Receita Federal do Brasil (Coger-

RFB), com o objetivo de descobrir o quanto eles foram efetivos. O estudo justificou-se porque a celeridade processual é uma preocupação da administração pública e da sociedade, pois a melhor justiça é aquela que não tarda. A pesquisa foi aplicada, descritiva, explicativa, quantitativa, qualitativa e empírica, com técnica de documentação indireta. Colheram-se os dados no "Painel Correição em Dados" da CGU, nos "Relatórios de Desempenho" da Coger-RFB, na normatização de regência, na jurisprudência, na doutrina, em consultas a órgãos públicos e em análises processuais. Iniciou-se comparando a celeridade processual da Coger-RFB com outras unidades correccionais e em seguida elaborou-se um método para aferir a influência da condução processual com maior segurança jurídica na agilidade dos processos. Estudaram-se as ferramentas desburocratizantes e seus reflexos no galope processual, medindo o tempo de tramitação dos processos antes e depois das medidas, concluindo-se que trouxeram outros benefícios, mas não agilidade.

Computational Science and Its Applications - ICCSA 2020 Osvaldo Gervasi 2020-10-01 The seven volumes LNCS 12249-12255 constitute the refereed proceedings of the 20th International Conference on Computational Science and Its Applications, ICCSA 2020, held in Cagliari, Italy, in July 2020. Due to COVID-19 pandemic the conference was organized in an online event. Computational Science is the main pillar of most of the present research, industrial and commercial applications, and plays a unique role in exploiting ICT innovative technologies. The 466 full papers and 32 short papers presented were carefully reviewed and selected from 1450 submissions. Apart from the general track, ICCSA 2020 also include 52 workshops, in various areas of computational sciences, ranging from computational science technologies, to specific areas of computational sciences, such as software engineering, security, machine learning and artificial intelligence, blockchain technologies, and of applications in many fields.

Unstructured Data Analysis Matthew Windham 2018-09-14 Unstructured data is the most voluminous form of data in the world and several

elements are critical for any advanced analytics practitioner leveraging SAS software to effectively address the challenge of deriving value from that data. This book covers the five critical elements of entity extraction, unstructured data, entity resolution, entity network mapping and analysis, and entity management. By following examples of how to apply processing to unstructured data, readers will derive tremendous long-term value from this book as they enhance the value they realize from SAS products.

Micropollutants in wastewater in four arctic cities

Maria Dam 2017-12-18 The four Nordic cities included in the present study form a gradient both in climate, from oceanographic temperate in Tórshavn at 62° N to arctic in Tromsø at 69.70°N, and in population, from less than 6000 inhabitants in Sisimiut to close to 120 000 in Reykjavík. The cities are different and far apart but products from the sea has been mainstay to the economy and societal development. Thus, the management of sewage from the municipalities must maintain a clean and healthy marine environment. The wastewater treatment varies, from screening on fine mesh, via septic tank based purification solutions, to no purification at all. We measured the contaminants in wastewater streams and in recipient samples, and with that in hand assessed whether the wastewater treatment appeared sufficient, and if not, which mitigating solutions could be relevant for wastewater purification optimisation.

Some Nudity, Porn and Adultery May Be OK

Dr. Arnold David Coleman 2015-11-30 Most men may be unaware that their struggles with porn and adultery might be related to the unrealistic biased ban on multiple wives and concubines. Men today are increasingly refusing to commit to only one woman for the rest of their life. This book may provide sufficient information and resource recommendations to empower anyone to better understand and manage their heterosexual relationships (and their children, if any) so that they will soon become non-oppressive and non-abusive, as well as honest, honorable, respectable, and trustworthy.

Elder Abuse XinQi Dong 2017-02-22 This book provides a global comprehensive and systematic

state-of-the review of this field that fills the gaps between research, practice, and policy. The book addresses the epidemiology of the issue and the global prevalence of elder abuse in both developed and developing countries, which synthesizes the most up-to-date data about risk factors and protective factors associated with elder abuse and consequences of elder abuse; clinical assessment and management of elder abuse, including screening, detection, management of elder abuse, and the role of decision making capacity and forensic approaches; practice and services that describe adult protective services, legal justice, elder court systems, and guardianship system; elder abuse and culture, which provides more in-depth anthropological and ethnographic experiences; policy issues, which highlights the elder justice movement, GAO reports, elder justice act, older American act and elder justice coordinating council; and future directions, which explores translational research, practice, education/training and policy issues surrounding elder abuse. Elder Abuse: Research, Practice and Policy is a useful resource for aging researchers, social services, general internists, family medicine physicians, social workers, nurses, and legal professionals interested in the issues of elder abuse.

Clinical Psychology and Adolescent Girls in a Postfeminist Era

Rosalyn H. Shute 2018-02-02 Adolescent girls' wellbeing is under threat. They face pressure to achieve academically while simultaneously negotiating a life dominated by social media, an unrelenting focus on appearance, cyberbullying, sexual harassment and ready access to pornography characterised by male violence to women. The sociocultural environment presents significant risks for girls' mental health, yet clinical psychology remains largely focused on the individual. Cultural factors are also overshadowed by postfeminist forces and a renewed emphasis on biological determinants of psychological sex differences. Clinical Psychology and Adolescent Girls in a Postfeminist Era goes back to first principles and revisits the question of the place of nature and nurture in children's development, in the light of what we know today from

about neural plasticity, dynamic systems and gender socialisation. Feminism and its sometimes uncomfortable relationship with psychology is discussed, as are the meaning and implications of 'postfeminism', and whether girls have 'special strengths'. Practice principles and specific ideas for practice with today's girls are all included. Finally, there is a complementary chapter on working with adolescent boys. Feminist writings about psychotherapy (with women) had their heyday some time ago, and some see boys as the ones who now need special attention. This book contends that the changing pressures of today's western world call for a renewed interest in specialised practice with girls, taking account of up-to-date theories about child development, and exploring the idea of expanding clinical practice beyond the individual.

Terrorism and Asylum James C. Simeon

Understanding E-Government in Europe Paul G. Nixon 2010-01-04 Explains the challenges that governments face and how various factors play a role before we can even begin to speak of successful transferral to e-government. Presenting a multi-disciplinary approach, this book analyses a range of challenges spanning from those of a technological and managerial nature to those of political and legal nature.

Music Festivals and the Politics of Participation Roxy Robinson 2016-04-29 The spread of UK music festivals has exploded since 2000. In this major contribution to cultural studies, the lid is lifted on the contemporary festival scene. Gone are the days of a handful of formulaic, large events dominating the market place. Across the country, hundreds of 'boutique' gatherings have popped up, drawing hundreds of thousands of festival-goers into the fields. Why has this happened? What has led to this change? In her richly detailed study, industry insider Dr Roxy Robinson uncovers the dynamics that have led to

the formation and evolution of the modern festival scene. Tracing the history of the culture as far back as the fifties, this book examines the tensions between authenticity and commerce as festivals grew into a widespread, professionalized industry. Setting the scene as a fragmented, yet highly competitive market, *Music Festivals and the Politics of Participation* examines the emergence of key trends with a focus on surrealist production and popular theatricality. For the first time, the transatlantic relationship between British promoters and the social experiment-come-festival Burning Man is documented, uncovering its role in promoting a politics of participation that has dramatically altered the festival experience. Taking an in-depth approach to examining key events, including the fastest growing independent music festival in recent years (Hampshire's BoomTown Fair) the UK market is shown to have produced a scene that champions co-production and the democratization of festival space. This is a vital text for anyone interested in British culture.

Pharmaceutical Residues in Freshwater: Hazards and Policy Responses Organisation for Economic Co-Operation and Development (OECD) 2020-07-15 This report calls for a better understanding of the effects of pharmaceutical residues in the environment, greater international collaboration and accountability distribution, and policy actions to prevent and remedy emerging concerns. Laboratory and field tests show traces of oral contraceptives causing the feminisation of fish and amphibians, and residues of psychiatric drugs altering fish behaviour. Antimicrobial resistance, linked to the overuse of antibiotics, has rapidly escalated into a global health crisis. Unless adequate measures are taken to manage the risks, pharmaceutical residues will increasingly be released into the environment as ageing populations, advances in healthcare, and intensification of meat and fish production spur the demand for pharmaceuticals worldwide. The report outlines a collective, life-cycle approach to managing pharmaceuticals in the environment. A policy mix of source-directed, use-orientated and end-of-pipe measures, involving several policy sectors, can help to improve health and protect the environment.

Brillouin Scattering Part 1 2022-06-24 Brillouin Scattering, Volume 109 in the Semiconductors and Semimetal series, marks the centenary of Leon Brillouin's seminal 1922 paper which provided a detailed theory of the effect that now bears his name. Stimulated Brillouin Scattering (SBS) is the strongest third order optical nonlinearity and plays an important role in contemporary science and applications, particularly lasers, communications, and fibre optics, as well as playing a new role in experimental physics and the life sciences. This volume provides a foundational perspective on Brillouin scattering, starting with a historical review of Brillouin scattering, the theory of SBS and the convergence between SBS and Optomechanics. We then consider SBS in several different waveguide geometries, including photonic crystal fibres, integrated optics and superfluids. Filosofia, Teoria Geral e Direito Tributário

Adriano Luiz Batista Messias 2023-04-03 A

presente obra foi concebida das construções de raciocínios, diálogos e discussões travadas no Grupo de Estudos do Instituto Brasileiro de Estudos Tributários - IBET de Florianópolis, SC, dirigidos e incentivados pelo ilustre Bruce Bastos Martins, cujo empenho culminou em profundos debates sobre Filosofia, Teoria Geral e Direito Tributário ao longo dos quatro anos de sua existência, com encontros quinzenais, em que foram estudadas obras de juristas como Lourival Vilanova e Paulo de Barros Carvalho, sem perder de vista o fundamento filosófico que as acompanham. Tendo como objetivo fomentar a reflexão a respeito de temas de Teoria Geral do Direito, especialmente no campo de construção das normas tributárias, do ponto de vista do método do Construtivismo Lógico-Semântico e da Filosofia da Linguagem, o Grupo de Estudos do IBET Florianópolis se viu na contingência de lançar mão desta obra conjunta, a fim de propagar as ideias a todos os níveis acadêmicos, cujos trabalhos se deram em homenagem ao seu idealizador, um ser com uma das mentes mais brilhantes que conhecemos, cujos pensamentos inquietos, de um verdadeiro filósofo, demonstram seu imenso arsenal jurídico, destacando-se no meio acadêmico. Por outro lado, não seriam poucas as palavras para descrever toda a admiração que temos, o que torna a tarefa sempre incompleta, pois a linguagem não consegue descrever o real em sua plenitude.

Engineering Unesco 2010-01-01 This report reviews engineering's importance to human, economic, social and cultural development and in addressing the UN Millennium Development Goals. Engineering tends to be viewed as a national issue, but engineering knowledge, companies, conferences and journals, all demonstrate that it is as international as science. The report reviews the role of engineering in development, and covers issues including poverty reduction, sustainable development, climate change mitigation and adaptation. It presents the various fields of engineering around the world and is intended to identify issues and challenges facing engineering, promote better understanding of engineering and its role, and highlight ways of

making engineering more attractive to young people, especially women.--Publisher's description.

The Gospel of Wealth Essays and Other Writings Andrew Carnegie 2006-09-26

Words of wisdom from American philanthropist Andrew Carnegie focusing on Carnegie's most famous essay, "The Gospel of Wealth," this book of his writings, published here together for the first time, demonstrates the late steel magnate's beliefs on wealth, poverty, the public good, and capitalism. Carnegie's commitment to ensuring and promoting the welfare of his fellow human beings through philanthropic deeds ranged from donations to universities and museums to establishing more than 2,500 public libraries in the English-speaking world, and he gave away more than \$350 million toward those efforts during his lifetime. The Gospel of Wealth is an eloquent testament to the importance of charitable giving for the public good. For more than seventy years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 1,700 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors, as well as up-to-date translations by award-winning translators.

American Military History: Volume 1 Richard W. Stewart 2009-05-01 Provides the U.S. Army with a comprehensive but brief account of its past. This is the first of two volumes. It covers the Army's history from its birth in 1775 to the eve of WW1, when the U.S. had become a world power. Contents: What is military history?, theory and practice of war, and the American military system; The colonial beginnings; The American Revolution, first phase; The winning of independence, 1777-1783; The formative years, 1783-1812; The War of 1812; Toward a professional army; The Mexican War and after; The Civil War; The inter-war years, 1865-1898; The Army in the Indian Wars, 1865-1890;

Emergence to world power, 1898-1902; and Transitional change, and the road to war, 1902-1917. Dozens of maps and illustrations.
Human Rights and Comparative Foreign Policy David P. Forsythe 2006-09-30 Human Rights And Comparative Foreign Policy Is The First Book In English To Examine The Place Of Human Rights In The Foreign Policies Of A Wide Range Of States During Contemporary Times. The Book Is Also Unique In Utilizing A Common Framework Of Analysis For All 10 Of The Country Or Regional Studies Covered. This Framework Treats Foreign Policy As The Result Of A Two -Level Game In Which Both Domestic And Foreign Factors Have To Be Considered. Leading Experts From Around The World Analyze Both Liberal Democratic And Other Foreign Policies On Human Rights. A General Introduction And A Systematic Conclusion Add To The Coherence Of The Project. The Authors Note The Increasing Attention Given To Human Rights Issues In Contemporary Foreign Policy. At The Same Time, They Argue That Most States, Including Liberal Democratic States That Identify With Human Rights, Are Reluctant Most Of The Time To Elevate Human Rights Concerns To A Level Equal To That Of Traditional Security And Economic Concerns. When States Do Seek To Integrate Human Rights With These And Other Concerns, The Result Is Usually Great Inconsistency In Patterns Of Foreign Policy. The Book Further Argues That Different States Bring Different Emphases To Their Human Rights Diplomacy, Because Of Such Factors As National Political Culture And Perceived National Interests. In The Last Analysis States Can Be Compared Along Two Dimensions Pertaining To Human Rights: Extent To Which They Are Oriented Toward An International Rather Than National Conception Of Rights; And Extent To Which They Are Oriented Toward International Rather Than National Action To Protect Human Rights.

visual and current content that appeals to both researchers and practitioners in process safety. This new release contains unique chapters on offshore safety, offshore platform safety, human factors in offshore operation, marine safety, safety during well drilling and operation, safety during processing (top side), safety during transportation of natural resources (offshore pipeline), and regulatory context Helps acquaint the reader/researcher with the fundamentals of process safety Provides the most recent advancements and contributions on the topic from a practical point-of-view Presents users with the views/opinions of experts in each topic Includes a selection of the author(s) of each chapter from among the leading researchers and/or practitioners for each given topic

The Impact of Health Insurance in Low- and Middle-Income Countries Maria-Luisa Escobar 2011-01-01 Over the past twenty years, many low- and middle-income countries have experimented with health insurance options. While their plans have varied widely in scale and ambition, their goals are the same: to make health services more affordable through the use of public subsidies while also moving care providers partially or fully into competitive markets. Colombia embarked in 1993 on a fifteen-year effort to cover its entire population with insurance, in combination with greater freedom to choose among providers. A

decade later Mexico followed suit with a program tailored to its federal system. Several African nations have introduced new programs in the past decade, and many are testing options for reform. For the past twenty years, Eastern Europe has been shifting from government-run care to insurance-based competitive systems, and both China and India have experimental programs to expand coverage. These nations are betting that insurance-based health care financing can increase the accessibility of services, increase providers' productivity, and change the population's health care use patterns, mirroring the development of health systems in most OECD countries. Until now, however, we have known little about the actual effects of these dramatic policy changes. Understanding the impact of health insurance-based care is key to the public policy debate of whether to extend insurance to low-income populations—and if so, how to do it—or to serve them through other means. Using recent household data, this book presents evidence of the impact of insurance programs in China, Colombia, Costa Rica, Ghana, Indonesia, Namibia, and Peru. The contributors also discuss potential design improvements that could increase impact. They provide innovative insights on improving the evaluation of health insurance reforms and on building a robust knowledge base to guide policy as other countries tackle the health insurance challenge.
