The Titanic and the Indifferent Stranger Paul Lee 2009 Even the staunchest of landlubbers knows what rockets at sea mean... or do they? A short space of time after the fatal collision with an iceberg, the Titanic's crew sent rockets aloft to attract the attention of a ship seen just a few miles. But that ship never responded ... and 1500 people died in the frigid waters. This book details the scandal of the Californian, blamed by many for being that very unresponsive stranger. Rockets were seen and ignored...but was the Captain guilty of mass murder? Did more than 1000 people needlessly die? Why was the wireless operator not awakened? Could the Californian have saved anyone? And why is this story, neglecting the ethical controversy surrounding salvage, the single most divisive issue in the Titanic research community?

UFO Religions Christopher Partridge 2012-11-12
The spectre of the UFO, as popularized by shows such as The X-Files, has brought an astonishing slant to the face of modern religious practice. But what motivates the fantastical and sometimes sinister beliefs of UFO worshippers? **UFO Religions** critically examines some of the fascinating issues surrounding UFO worship - abduction narratives, UFO-based interpretations of other religions, the growth of pseudo-sciences purporting to explain UFOs, and the responses of the core scientific community to such claims.

Focusing on contemporary global UFO groups including the Raelian Movement, Heaven's Gate, Unarius and the Ansaaru Allah Community, it gives a clear profile of modern UFO controversies and beliefs.

Local Energy Communities Gilles Debizet 2022-09-06 This book draws on social science analysis to understand the ongoing dynamics within and surrounding local energy communities in reliably electrified countries: Belgium, Canada, Colombia, France, Germany, India, the Netherlands, Spain, Switzerland and the United Kingdom. It offers a comprehensive overview of recent results and thus outlines a diversity of drivers and levers for scaling up energy communities or, at least, local energy sharing. Analysing the main types of energy communities such as collective self-consumption, citizen cooperatives and peer-to-peer digital platforms, the book does not only raise new questions for social scientists, but also offers a comprehensive overview for all those contributing to the circular economy and the decentralization of energy production in inhabited areas where energy consumption is concentrated. This book provides input for the ongoing debates in many European countries implementing the national law on the European directives for energy communities. Furthermore, without evading the antagonism between cooperative and market approaches, or the contradictions between different issues, the book outlines the innovative decision-making tools that can facilitate the development of local energy

production and sharing systems. As well as being of interest to postgraduates and researchers in the field of energy studies, this book will be vital to energy professionals looking to support local energy communities' decision-making and design, who wish to consider sociological, organizational and territorial dimensions.

Mysticism, Myth and Celtic Identity Marion Gibson 2013 *Mysticism, Myth and Celtic Identity* explores how the mythical and mystical past informs national imaginations. Building on notions of invented tradition and myths of the nation, it looks at the power of narrative and fiction to shape identity, with particular reference to the British and Celtic contexts. The authors consider how aspects of the past are reinterpreted or reimagined in a variety of ways to give coherence to desired national groupings, or groups aspiring to nationhood and its 'defence'. The coverage is unusually broad in its historical sweep, dealing with work from prehistory to the contemporary, with a particular emphasis on the period from the eighteenth century to the present. The subject matter includes notions of ancient deities, Druids, Celticity, the archaeological remains of pagan religions, traditional folk tales, racial and religious myths and ethnic politics, and the different types of returns and hauntings that can recycle these ideas in culture. Innovative and interdisciplinary, the scholarship in *Mysticism, Myth and Celtic Identity* is mainly literary but also geographical and historical and draws on religious studies, politics and the social sciences. Thus the collection offers a stimulatingly broad number of new viewpoints on a matter of great topical relevance: national identity and the politicization of its myths.

Ghost Ship A.D.A France-Williams 2020-07-10 The Church is very good at saying all the right things about racial equality. But the reality is that the institution has utterly failed to back up these good intentions with demonstrable efforts to reform. It

is a long way from being a place of black flourishing. Through conversation with clergy, lay people and campaigners in the Church of England, A.D.A France-Williams issues a stark warning to the church, demonstrating how black and brown ministers are left to drown in a sea of complacency and collusion. While sticking plaster remedies abound, France-Williams argues that what is needed is a wholesale change in structure and mindset. Unflinching in its critique of the church, *Ghost Ship* explores the harrowing stories of institutional racism experienced then and now, within the Church of England. Far from being an issue which can be solved by simply recruiting more black and brown clergy, says France-Williams, structural racism requires a wholesale dismantling and reassembling of the ship - before it is too late.

Passport to World Band Radio 1998 Lawrence Magne 1997-09-16 Elegant rusticity meets unpretentious luxury in the work of this award-winning architecture firm. Howard Backen, award-winning principal of the architecture firm Backen Gillam Kroeger, is at the center of a popular movement in home design that emphasizes comfort over pretension and elegant simplicity over complication that tends to serve the ego of architects. This volume, the first on his work and that of the firm, is an artful exploration of that this aesthetic, featuring farmhouses in the

Napa Valley, hilltop homes, seaside retreats, and lakeside hideaways. Throughout the work, a sense of intimacy, warmth, and informality pervades. Natural materials, such as wood, stone, and brick form the foundations, walls, and ceilings of these subtly luxurious spaces, while nature itself plays a considered role that is at once complementary and also intricately conjoined with the work. Long vistas open outward toward sun-drenched valleys from the window-lined wall of a bedroom in one home, while more immediate scenes of steeply rising hillsides and hidden lakes appear from just beyond the back stoop--and the rough-hewn-board dock--of another. Sensitive, alluring, and wonderfully resonant with the suggestion of invitation, the work of Backen Gillam Kroeger is both thrilling to the eye and restorative to the soul.

Gender Inclusive Adam Jones 2008-12-02 *Gender Inclusive* offers a challenging and unconventional reinterpretation of gender and mass violence. Compiling essays and excerpts drawn from nearly two decades of Adam Jones's writing on gender and politics, this stimulating and diverse collection of essays explores vital issues surrounding 'gendercide' (gender-selective mass killing) including: How gender shapes men and women as victims and perpetrators of mass violence, including genocide. The range of gender-selective atrocities inflicted upon males, especially the gendercidal killing of civilian men of "battle age." The victimization of women and girls worldwide, including the structural forms of violence ("gendercidal institutions") directed against them. Genocidal violence throughout modern history, with a particular focus on the Balkans and Rwanda. In-depth critiques of prevailing gender framings in academic scholarship, mass media, and the policy sphere. Adam Jones - recently selected as "one of fifty key thinkers in Holocaust and genocide studies" - contests prevailing interpretations of gender and violence, arguing that they fail to capture the broad range of gendered experience. His global-historical treatment is essential reading for

Post-Object Fandom Rebecca Williams 2016-07-28 Fandom is generally viewed as an integral part of everyday life which impacts upon how we form emotional bonds with ourselves and others in a modern, mediated world. Whilst it is inevitable for television series to draw to a close, the reactions of fans have rarely been considered. Williams explores this everyday occurrence

through close analysis of television fans to examine how they respond to, discuss, and work through their feelings when shows finish airing. Through a range of case studies, including *The West Wing* (NBC, 2000-2006), *Lost* (ABC 2004-2010), *Buffy the Vampire Slayer* (1997-2003), *Doctor Who* (BBC 1963-1989; 2005-), *The X-Files* (FOX, 1993-2002), *Firefly* (FOX, 2002) and *Sex and the City* (HBO, 1998-2004), Williams considers how fans prepare for the final episodes of shows, how they talk about this experience with fellow fans, and how, through re-viewing, discussion and other fan practices, they seek to maintain their fandom after the show's cessation.

Tracing Your Naval Ancestors Simon Fowler
2011-12-13 This concise guide to naval history and naval records is essential reading and reference for anyone researching the fascinating story of Britain's navy and the men and women who served in it. The book also covers the specialist and auxiliary services associated with the navy among them the Royal Marines, the Fleet Air Arm, the naval dockyards, the WRNS and the Fleet Auxiliary. In each section he explains which records survive, where they can be found and how they can be used for research. He also recommends resources available online as well as books and memoirs. His handbook is a valuable research tool for anyone who is keen to find out about the career of an ancestor who served in the Royal Navy or was connected with it.

Le digital au secours de l'Afrique Sophonie Koboude
2021-02-10 À chaque époque de l'histoire de l'humanité, la combinaison de quelques innovations de rupture suscite un bouleversement des interactions humaines, provoquant ainsi une modification en profondeur des structures de production et de consommation. La synergie entre la microélectronique et l'informatique a favorisé l'émergence d'un Nouveau Monde : le digital. Ce monde, dans lequel la frontière entre le virtuel et le réel s'amenuise continuellement et dans lequel également l'information circule en temps réel, a changé les rapports sociaux et les édifices

économiques. L'on peut raisonnablement craindre que ce Nouveau Monde soit une étape supplémentaire dans le déclassement du continent africain. L'Afrique est assurément un véritable laboratoire d'expérimentations et de déploiements des usages du digital, mais elle peine à se servir des effets d'entraînement du digital pour doper sa croissance économique. Ce livre vise à montrer en quoi le digital et l'économie numérique peuvent contribuer à soutenir les ambitions de développement et d'industrialisation des pays africains.

Art After Conceptual Art Alexander Alberro 2006-10-27 Art After Conceptual Art tracks the various legacies of conceptualist practice over the past three decades. The anthology introduces and develops the idea that Conceptual art generated several different, and even contradictory, forms of art practice. Whereas some of these art modes contested commonplace assumptions of what art is, others served to buttress those beliefs. The bulk of the volume features newly written and highly innovative essays challenging standard historicizations of the legacy of Conceptualism, as well as the critical impact of these art practices on art since the 1970s. The essays explore topics as diverse as the interrelationships between Conceptualism and institutional critique, neoexpressionist painting and conceptualist paradigms, Conceptual art's often-ignored complicity with design and commodity culture, the specific forms of identity politics taken up by the reception of Conceptual art, and Conceptualism's North/South and East/West dynamics. A few texts that continue to be crucial for critical debates within the fields of conceptual and postconceptual art practice, history, and theory have been reprinted in order to convey the vibrant and ongoing discussion on the status of art after Conceptual art. The present volume aims to trigger an exploration of the relationship between postconceptualist practices and the beginnings of contemporary art. The Generali Foundation Collection Series introduces important themes from this collection of contemporary art, without dealing explicitly with the collected artworks. Instead, it explores those discourses that have been crucial for the formation of art practices central to the Generali Foundation Collection. Furthermore, it makes visible their social, historical, and theoretical contexts, and the relevant shifts and disruptions within them.

Among the Scientologists Donald A. Westbrook 2018-11-01 The Church of Scientology is one of the most recognizable American-born new religions, but perhaps the least understood. With academic and popular interest on the rise, many

books have been written about Scientology and surely more will follow. Although academics have begun to pay more attention to Scientology, the subject has received remarkably little qualitative attention. Indeed, no work has systematically addressed such questions as: what do Scientologists themselves have to say about their religion's history, theology, and practices? How does Scientology act as a religion for them? What does "lived religion" look like for a Scientologist? This is not so much a book about the Church of Scientology, its leaders, or its controversies, as it is a compilation of narratives and histories based on the largely unheard or ignored perspectives of Scientologists themselves. Drawing on six years of interviews, fieldwork, and research conducted among members of the Church of Scientology, this groundbreaking work examines features of the new religion's history, theology, and praxis in ways that move discussion beyond apostate-driven and exposé accounts.

CHOICE Magazine Most available cryptology books primarily focus on either mathematics or history. Breaking this mold, *Secret History: The Story of Cryptology* gives a thorough yet accessible treatment of both the mathematics and history of cryptology. Requiring minimal mathematical prerequisites, the book presents the mathematics in sufficient detail and weaves the history throughout the chapters. In addition to the fascinating historical and political sides of cryptology, the author—a former Scholar-in-Residence at the U.S. National Security Agency (NSA) Center for Cryptologic History—includes interesting instances of codes and ciphers in crime, literature, music, and art. Following a mainly chronological development of concepts, the book focuses on classical cryptology in the first part. It covers Greek and Viking cryptography, the Vigenère cipher, the one-time pad, transposition ciphers, Jefferson's cipher wheel, the Playfair cipher, ADFGX, matrix encryption, World War II cipher systems (including a detailed examination of Enigma), and many other classical methods introduced before World War II. The second part of the book examines modern cryptology. The author looks at the work of Claude Shannon and the origin and current status of the NSA, including some of its Suite B algorithms such as elliptic curve cryptography and the Advanced Encryption Standard. He also details the controversy that surrounded the Data Encryption Standard and the early years of public key cryptography. The book not only provides the how-to of the Diffie-Hellman key exchange and RSA algorithm, but also covers many attacks on the latter. Additionally, it discusses Elgamal, digital signatures, PGP, and stream ciphers and explores future directions such as quantum cryptography and DNA computing. With numerous real-world examples and extensive references, this book skillfully balances the historical aspects of cryptology with its mathematical details. It provides readers with a sound foundation in this dynamic field.
