**Congressional Directives** United States. Government Accountability Office,2008 In recent years, congressional concern and public debate have increased about the nature and growing number of earmarks. This report seeks to provide Congress and the public with an understanding of how agencies respond to congressional funding directions by examining how selected executive branch agencies translate these directions from Congress into governmental activities. There have been numerous calls in and out of Congress for earmark reform in response to concerns about the nature and number of earmarks. Both Houses of Congress have taken steps to increase disclosure requirements. The President has also called for earmark reform. In January 2007, the Office of Management and Budget (OMB) directed agencies to collect and submit data to it on fiscal year 2005 earmarks in appropriations bills and certain authorization bills. GAO collected and analyzed information on four agencies' processes (i.e., the Department of Defense, Department of Energy, Department of Transportation, and U.S. Army Corps of Engineers' Civil Works programs). Our objectives were to identify, for these agencies, (1) their processes for identifying and categorizing congressional directives; (2) their processes for tracking, implementing, and reporting on congressional directives; and (3) agency officials' views on the trends and impact of congressional directives.

*Europeanisation of Public Law* Jacobine Elisabeth Brink,2015 The second edition of this textbook is a study about the relation between EU law and national public law. Familiar EU doctrines - on procedural autonomy, direct effect, consistent interpretation, ex officio application of European law, and state liability - are used as a starting point for examining the effects of these doctrines in the various Member States. Consideration is also given to important questions concerning the enforcement of EU law in the national legal order, the organization of the judiciary, and the influence of EU law on fundament principles of (public) law, such as legal certainty, non-discrimination, and proportionality. The book is particularly designed for advanced bachelors and masters courses on the relation between national law and EU law. Because of the many examples of national case law, the book will be most welcome to any practitioner dealing with European law in a national context.
