OECD Digital Government Studies Digital Government Review of Latin America and the Caribbean Building Inclusive and Responsive Public Services OECD,CAF Development Bank of Latin America,2023-09-08 This report explores how governments in Latin America and the Caribbean can use digital technology and data to foster responsiveness, resilience and proactiveness in the public sector.

Research Handbook on E-Government Welch, Eric W.,2021-10-15 E-government is an increasingly well-established and wide-ranging field, in which there has been an explosion of new technologies, applications, and data resulting in new challenges and opportunities for e-government research and practice. This Research Handbook advances research in the field of e-government by first recognizing its roots and documenting its growth and progress. It investigates the advent and implications of new technologies, and structures the content around core topics of service, management, engagement and access. Two additional sections examine the role of e-government in developing countries and smart cities.

OECD Public Governance Reviews The Strategic and Responsible Use of Artificial Intelligence in the Public Sector of Latin America and the Caribbean OECD,CAF Development Bank of Latin America,2022-03-22 Governments can use artificial intelligence (AI) to design better policies and make better and more targeted decisions, enhance communication and engagement with citizens, and improve the speed and quality of public services. The Latin America and the Caribbean (LAC) region is seeking to leverage the immense potential of AI to promote the digital transformation of the public sector.

Routledge Handbook of Water Law and Policy Alistair Rieu-Clarke,Andrew Allan,Sarah Hendry,2017-02-24 Water plays a key role in addressing the most pressing global challenges of our time, including climate change adaptation, food and energy security, environmental sustainability and the promotion of peace and stability. This comprehensive handbook explores the pivotal place of law and policy in efforts to ensure that water enables positive responses to these challenges and provides a basis for sound governance. The book reveals that significant progress has been made in recent decades to strengthen the governance of water resource management at different scales, including helping to address international and sub-national conflicts over transboundary water resources. It demonstrates that ‘effective’ laws and policies are fundamental drivers for the safe, equitable and sustainable utilization of water. However, it is also shown that what might constitute an effective law or policy related to water resources management is still hotly debated. As such, the handbook provides an important and definitive reference text for all studying water governance and management.

Human Rights Approaches to Climate Change Sumudu Atapattu,2015-10-16 Despite the clear link between climate change and human rights with the potential for virtually all protected rights to be undermined as a result of climate change, its catastrophic impact on human beings was not really understood as a human rights issue until recently. This book examines the link between climate change and human rights in a comprehensive manner. It looks at human rights approaches to climate change, including the jurisprudential bases for human rights and the environment, the theoretical framework governing human rights and the environment, and the different approaches to this including benchmarks. In addition to a discussion of human rights implications of international environmental law principles in the climate change regime, the book explores how the human rights framework can be used in relation to mitigation, adaption, and adjudication. Other chapters examine how vulnerable groups –women, indigenous peoples and climate refugees – would be disproportionately affected by climate change. The book then goes on to discuss a new category of people created by climate change, those who will be rendered stateless as a result of states disappearing and displaced by climate change, and whether human rights law can adequately address these emerging issues.

Climate Change Remedies Jaap Spier,Ulrich Magnus,2014-07-01 Climate change poses very serious risks to mankind. Adaptation and damages are emphasised more and more. Although adaptation is important, priority should be given to prevention (mitigation). The contributions in this volume emanate from an international research project that deals with a legal kaleidoscope of legal issues and focuses primarily on preventive remedies. The contributions of Spier and Magnus tackle injunctive relief and discuss the myriad of legal questions courts have to answer if they are willing to grant injunctive relief. This part of the book addresses procedural, private international and substantive law. Kemp’s contribution discusses the role criminal law could play to come to grips with the threats of climate change. So far, the greater part of the debate is about the United States, Europe and, increasingly, Asia. Ruppel fills this gap by painting an African perspective.

Conflict-sensitive adaptation to climate change in Africa Urmilla Bob,Salomé Bronkhorst,2014-09-08 In preparation for COP17 (17th Conference of the Parties) to the United Nations Framework Convention on Climate Change (UNFCCC), the African Centre for the Constructive Resolution of Disputes (ACCORD) in Durban, held a two- day expert seminar to identify issues and recommendations for ensuring that adaptation to climate change is conflict-sensitive ...papers presented during the meeting were peer-reviewed and compiled for this pertinent book. -- ACCORD.

The Securitization of Climate Change: Australian and United States' Military Responses (2003 - 2013) Michael Durant Thomas,2017-07-25 This book examines how the armed forces of the United States and Australia have responded to the threat posed by climate change to national security. Drawing on established securitisation frameworks (‘Copenhagen’ and ‘Paris’ Schools), the author uses a combination of quantitative and qualitative techniques to systematically examine more than 3,500 speeches, policies and doctrinal articles since 2003. Importantly, the author undertakes an examination of the intersection between the political and the military spheres, probing the question of how ideology has influenced the military’s uptake on the issue. In this context, the author identifies the difficulty of an ostensibly apolitical institution responding to what has become both a hyper-political issue and an unprecedented security threat. A close examination of the key political actors – their intent, outlook and political mandate for broader climate action – is therefore crucial to understanding the policy freedom and constraints within which military leaders operate. The book consists of eight chapters divided into four parts, focusing on: perspectives and methodological insights; empirical case studies; case study comparison; and concluding observations. • Offers a rare and systematic examination of military climate policy by a military officer from Australia• Identifies a divergence of Australian military climate policy from that of the US military during the Obama Administration• Develops a unique method that quantifies climate security, enabling a graphical representation for quick and ready reference ideally suited to policy-makers

Human Health and Ecological Integrity Laura Westra,Colin L. Soskolne,Donald W. Spady,2012-05-31 The connection between environment and health has been well studied and documented, particularly by the World Health Organization. It is now being included in some legal instruments, although for the most part caselaw does not explicitly make that connection. Neither the right to life nor the rights to health or to normal development are actually

cited in the resolution of cases and in judges' decisions. This volume makes the connection explicit in a broad review of human rights and legal issues associated with public health and the environment. It will be particularly useful as many legal instruments emphasize the right to 'development' without fully discussing the necessary safety and public health aspects, and the respect for the ecology of any area where such 'development' (often unwanted by local or indigenous communities) is to be located. Climate change is another pressing variable that is considered, and several chapters address the interface between human health and ecological conditions. Overall the book integrates perspectives from a wide range of disciplines, including ethics, ecology, public health and epidemiology, and human rights and law.

New Dynamics in US-China Relations Mingjiang Li, Kalyan M. Kemburi, 2014-10-17 Washington's strategic pivot to Asia and Beijing's pursuit of new strategic and security interests in the region have led to increasing tensions between the two powers. US leaders have stressed that their increased interest in Asia is driven by a desire to benefit from the thriving regional economies, as well as to play the leading role in maintaining peace and stability in the region. However, Beijing is particularly concerned about US efforts to consolidate its alliances and deepen security partnerships with a number of regional states. Given the centrality of the two powers to the strategic stability and economic development of the region, these new dynamics in US-China relations must be properly understood and appropriately handled. This book examines the growing Sino-US strategic rivalry in the Asia-Pacific alongside the strategies employed in the management of this relationship. In turn, it illuminates the sources of conflict and cooperation in US-China relations, looking specifically at maritime disputes, economic relations, energy security, non-traditional security, defence and strategic forces, and Taiwan. Finally, it explores the role of regional states in shaping US-China relations, and in doing so covers the influence of Japan, India, the Korean Peninsula, the Philippines, Vietnam, Myanmar, and Cambodia. With chapters from leading scholars and analysts this book deals with a diverse range of issues including strategic rivalry, expanding regional trade relations, non-traditional security issues, the role of energy security, maritime security and how Asian states view their relations with the US and China respectively. *New Dynamics in US-China Relations* will be of huge interest to students and scholars of Asian politics, US politics, international relation and security studies, as well as practitioners involved in framing and implementing foreign, security and economic policy pertaining to the Asia Pacific.

The Securitization of Foreign Aid Stephen Brown, Jörn Grävingholt, 2016-02-17 Security concerns increasingly influence foreign aid: how Western countries give aid, to whom and why. With contributions from experts in the field, this book examines the impact of security issues on six of the world's largest aid donors, as well as on key crosscutting issues such as gender equality and climate change.

International Water Law and the Quest for Common Security Bjorn-Oliver Magsig, 2015-03-24 The world's freshwater supplies are increasingly threatened by rapidly increasing demand and the impacts of global climate change, but current approaches to transboundary water management are unsustainable and may threaten future global stability and international security. The absence of law in attempts to address this issue highlights the necessity for further understanding from the legal perspective. This book provides a fresh conceptualisation of water security, developing an operational methodology for identifying the four core elements of water security which must be addressed by international law: availability; access; adaptability; and ambit. The analysis of the legal framework of transboundary freshwater management based on this contemporary understanding of water security reveals the challenges and shortcomings of the current legal regime. In order to address these shortcomings, the present mindset of prevailing rigidity and state-centrism is challenged by examining how international legal instruments could be crafted to advance a more flexible and common approach towards transboundary water interaction. The concept of considering water security as a matter of 'regional common concern' is introduced to help international law play a more prominent role in addressing the challenges of global water insecurity. Ways for implementing such an approach are proposed and analysed by looking at international hydropolitics in Himalayan Asia. The book analyses transboundary water interaction as a 'case study' for advancing public international law in order to fulfil its responsibility of promoting international peace and security.

Climate Migration and Security Ingrid Boas, 2015-05-01 Climate migration, as an image of people moving due to sea-level rise and increased drought, has been presented as one of the main security risks of global warming. The rationale is that climate change will cause mass movements of climate refugees, causing tensions and even violent conflict. Through the lens of climate change politics and securitisation theory, Ingrid Boas examines how and why climate migration has been presented in terms of security and reviews the political consequences of such framing exercises. This study is done through a macro-micro analysis and concentrates on the period of the early 2000s until the end of September 2014. The macro-level analysis provides an overview of the coalitions of states that favour or oppose security framings on climate migration. It shows how European states and the Small Island States have been key actors to present climate migration as a matter of security, while the emerging developing countries have actively opposed such a framing. The book argues that much of the division between these states alliances can be traced back to climate change politics. As a next step, the book delves into UK-India interactions to provide an in-depth analysis of these security framings and their connection with climate change politics. This micro-level analysis demonstrates how the UK has strategically used security framings on climate migration to persuade India to commit to binding targets to reduce their greenhouse gas emissions. The book examines how and why such a strategy has emerged, and most importantly, to what extent it has been successful. *Climate Migration and Security* is the first book of its kind to examine the strategic usage of security arguments on climate migration as a political tool in climate change politics. Original theoretical, empirical, and policy-related insights will provide students, scholars, and policy makers with the necessary tools to review the effectiveness of these framing strategies for the purpose of climate change diplomacy and delve into the wider implications of these framing strategies for the governance of climate change.

Yearbook on International Investment Law and Policy 2012-2013 Andrea K. Bjorklund, 2014 Today, international investment law consists of a network of multifaceted, multilayered international treaties that, in one way or another, involve virtually every country of the world. The evolution of this network raises a host of issues regarding international investment law and policy, especially in the area of international investment disputes. The *Yearbook on International Investment Law & Policy 2012-2013* monitors current developments in international investment law and policy, focusing on recent trends and issues in foreign direct investment (FDI). With contributions by leading experts in the field, this title provides timely, authoritative information on FDI that can be used by a wide audience, including practitioners, academics, researchers, and policy makers. Contributions to the *Yearbook on International Investment Law & Policy 2012-2013* cover the 2012-2013 trends in international investment agreements, the Foreign Direct Investment (FDI) trends, and the challenge of investment policies for outward FDI, as well as a review of 2012 international investment law and arbitration. This edition contains essays from the Symposium on Sustainable Development and International Investment Law: Bridging the Divide. Also included are general articles providing an analysis of arbitral tribunal practice regarding the applicable law to state contracts under the ICSID Convention in the Twenty First Century; the role of municipal laws in investment arbitration; the status of state-controlled entities under international investment law, the US and the Trans-Pacific partnership (TPP); new 2012 US Model BITs; and the Regulation of FDI in Bolivia. This volume concludes with the winning memorials from the 2012 FDI International Moot Competition.

Handbook on Climate Change and International Security Maria J. Trombetta, 2023-12-11 This topical Handbook explores the emergence of climate change as an international security issue, the threats it poses, and the political and

academic debates it has prompted. Framing climate change as a security issue, it explores the ways relevant actors, states and international organizations have conceptualized climate security and its associated threats.

A Research Agenda for Climate Justice Paul G. Harris, Climate change will bring great suffering to communities, individuals and ecosystems. Those least responsible for the problem will suffer the most. Justice demands urgent action to reverse its causes and impacts. In this provocative new book, Paul G. Harris brings together a collection of original essays to explore alternative, innovative approaches to understanding and implementing climate justice in the future. Through investigations informed by philosophy, politics, sociology, law and economics, this Research Agenda reveals how climate change is a matter of justice and makes concrete proposals for more effective mitigation.
