Common and Uncommon Quotes: A Theory and History of Epigraphs Jared A. Griffin, 2023-03-07 'Common and Uncommon Quotes: A Theory and History of Epigraphs' is a prolegomenon to the study of epigraphic paratextuality. Building on the work of Gerard Genette's paratextual studies, this volume contextualizes and traces the practice of epigraphy in Anglophone literary history, from the fifteenth to the early twentieth century. This study explores how epigraphs are used by author-functions as a hermeneutic for their text and to establish ethos with their audience, and how that paratextual relationship changed as publishing opportunities and literacy rates grew over four centuries. The first broad-reaching study of this kind, 'Common and Uncommon Quotes' seeks to understand how epigraphs work: through their privilege on the page, their appeal to conjured ideas of the past, and their calls to citizenship.

Constantius III Ian Hughes, 2022-01-31 The acclaimed historian "rescues from an undeserved obscurity one of Rome's emperors . . . A simply fascinating and extraordinary historical study" (Midwest Book Review). Constantius is an important, but almost forgotten, figure. He came to the fore in or around 410 when he was appointed Magister Militum (Master of Troops) to Honorius, the young Emperor of the Western Roman Empire. His predecessor, Stilicho, had been murdered by his own troops and much of Gaul and Hispania had been overrun by barbarians or usurpers. One by one Constantius eliminated the usurpers and defeated or came to terms with the various invading groups. Most notoriously, he allowed the Visigoths to settle in Gaul in return for their help in defeating the Vandals and Alans who had seized parts of Hispania, a decision with far-reaching consequences. Constantius married Honorius' sister and was eventually proclaimed his co-emperor. However, the Eastern Roman Emperor, Honorius' nephew, refused to accept his appointment and Constantius was preparing a military expedition to enforce this recognition when he died suddenly, having been emperor for just seven months. Ian Hughes considers his career, assessing his actions in the context of the difficult situation he inherited.

Ethnicity, Class, and Nationalism Anton L. Allahar, 2005-06-28 In the interest of locating race and ethnicity as sociological and political categories that are inimical to contemporary conceptions of the nation state, editor Anton L. Allahar explores the geopolitics of the Caribbean through a comparative focus. The result is a study that is unique in scope and also in its level of scholarly reflection. This book is the first of its kind. It is essential reading for anyone interested in advancing their analysis of political, economic, social, and cultural thought in the Caribbean and other former colonial modern nations.

The Councils of the Catholic Church: Nicea to Now Frances Spilman, 2015-09-14 When you think of the Councils of the Church, you probably imagine a group of Cardinals and Bishops quietly discussing obtuse theological doctrines which have no practical implications. Perhaps a loud cough is heard once in a while but, on the whole, it is a staid affair. Actually, the Councils were anything but impractical or quiet. There were loud disagreements and accusations of heresy. The Council members cared deeply about the religious and social problems of their day, arguing for months, sometimes years, in order to find a solution. Each chapter of the book contains a discussion of why the Council was called and what happened at the Council, as well as Biblical references and prayers. You shall meet many saints (from Saint Francis to Saint Nick) as well as a few characters not so holy. Each Council has its own exciting story but each has a unifying theme in the Church's unending mission to guide souls to God.

Business-to-Business Mario Glowik, Sarah Maria Bruhs, 2014-06-05 Contemporary business-to-business (B2B) industries consist of networks of customers, competitors and other stakeholders. Firms which manage their relationships with these important stakeholders are more likely to enjoy a sustained competitive advantage in the international business environment. This book is the first to provide a comprehensive overview of the field from a broad and accessible perspective. The authors bring an authoritative, scholarly understanding to the subject, taking readers through the entire process of creating, developing and maintaining B2B networks. Case studies illustrating each chapter include: Apple, Panasonic, Johnson & Johnson, Epson and Samsung. In providing a single and explicit established academic framework for understanding business networks in a global setting, this book is vital reading for students and researchers involved with international management, international marketing and strategic management.

The Corrupter of Boys Dyan Elliott, 2020-11-27 In the fourth century, clerics began to distinguish themselves from members of the laity by virtue of their augmented claims to holiness. Because clerical celibacy was key to this distinction, religious authorities of all stripes—patristic authors, popes, theologians, canonists, monastic founders, and commentators—became progressively sensitive to sexual scandals that involved the clergy and developed sophisticated tactics for concealing or dispelling embarrassing lapses. According to Dyan Elliott, the fear of scandal dictated certain lines of action and inaction, the consequences of which are painfully apparent today. In *The Corrupter of Boys*, she demonstrates how, in conjunction with the requirement of clerical celibacy, scandal-averse policies at every conceivable level of the ecclesiastical hierarchy have enabled the widespread sexual abuse of boys and male adolescents within the Church. Elliott examines more than a millennium's worth of doctrine and practice to uncover the origins of a culture of secrecy and concealment of sin. She charts the continuities and changes, from late antiquity into the high Middle Ages, in the use of boys as sexual objects before focusing on four specific milieus in which boys and adolescents would have been especially at risk in the high and later Middle Ages: the monastery, the choir, the schools, and the episcopal court. *The Corrupter of Boys* is a work of stunning breadth and discomfiting resonance, as Elliott concludes that the same clerical prerogatives and privileges that were formulated in late antiquity and the medieval era—and the same strategies to cover up the abuses they enable—remain very much in place.

The Development of Institutions of Human Rights L. Barria, S. Roper, 2010-06-07 During the transition to democracy, states have used various mechanisms to address previous human rights abuses including trials, truth and reconciliation commissions and internationalized tribunals. This volume analyzes the transitional justice choices made by four countries: Argentina, Bosnia-Herzegovina (BiH), Sierra Leone and East Timor.

A Military Life of Constantine the Great Ian Hughes, 2021-01-13 A new analysis of the strengths, organization, weapons, and tactics of the Roman army Constantine inherited and his military reforms. Much of Constantine I's claim to lasting fame rests upon his sponsorship of Christianity, and many works have been published assessing whether his apparent conversion was a real religious experience or a cynical political maneuver. However, his path to sole rule of the Roman Empire depended more upon the ruthless application of military might than upon his espousal of Christianity. He fought numerous campaigns, many against Roman rivals for Imperial power, most famously defeating Maxentius at the Battle of the Milvian Bridge. In this new study, Ian Hughes assesses whether Constantine would have deserved the title "the Great" for his military achievements alone, or whether the epithet depends upon the gratitude of Christian historians. All of Constantine's campaigns are narrated and his strategic and tactical decisions analyzed. The organization, strengths, and weaknesses of the Roman army he inherited are described and the effect of both his and his predecessors' reforms discussed. The result is a fresh analysis of this pivotal figure in European history from a military perspective.

Clark, 2015-08-28 The Changing Politics of Organic Food in North America explores the political dynamics of the remarkable transition of organic food from a fringe fad in the 1960s to a multi-billion dollar industry in the 2000s. The Politics of Cyberconflict Athina Karatzogianni, 2006-09-27 The Politics of Cyberconflict focuses on the implications that the phenomenon of cyberconflict (conflict in computer mediated environments and the internet) has on politics, society and culture. Athina Karatzogianni proposes a new framework for analyzing this new

phenomenon, which distinguishes between two types of cyberconflict, ethnoreligious and sociopolitical, and uses theories of conflict, social movement and the media. A comprehensive survey of content, opinion and theory in several connected fields, relating not only to information warfare and cyberconflict, but also social movements and ethnoreligious movements is included. Hacking between ethnoreligious groups, and the use of the internet in events in China, the Israel-Palestine conflict, India-Pakistan conflict, as well as the antiglobalization and antiwar movements and the 2003 Iraq War are covered in detail. This is essential reading for all students of new technology, politics, sociology and conflict studies.

The Mariner's Mirror Leonard George Carr Laughton, Roger Charles Anderson, William Gordon Perrin, 2000

In the Shadow of the Sword Tom Holland, 2012-05-15 The acclaimed author of *Rubicon* and other superb works of popular history now produces a thrillingly panoramic (and incredibly timely) account of the rise of Islam. No less significant than the collapse of the Roman Republic or the Persian invasion of Greece, the evolution of the Arab empire is one of the supreme narratives of ancient history, a story dazzlingly rich in drama, character, and achievement. Just like the Romans, the Arabs came from nowhere to carve out a stupefyingly vast dominion—except that they achieved their conquests not over the course of centuries as the Romans did but in a matter of decades. Just like the Greeks during the Persian wars, they overcame seemingly insuperable odds to emerge triumphant against the greatest empire of the day—not by standing on the defensive, however, but by hurling themselves against all who lay in their path.

Brother-Making in Late Antiquity and Byzantium Claudia Rapp, 2016-02-01 Among medieval Christian societies, Byzantium is unique in preserving an ecclesiastical ritual of adelphopoiesis, which pronounces two men, not related by birth, as brothers for life. It has its origin as a spiritual blessing in the monastic world of late antiquity, and it becomes a popular social networking strategy among lay people from the ninth century onwards, even finding application in recent times. Located at the intersection of religion and society, brother-making exemplifies how social practice can become ritualized and subsequently subjected to attempts of ecclesiastical and legal control. Controversially, adelphopoiesis was at the center of a modern debate about the existence of same-sex unions in medieval Europe. This book, the first ever comprehensive history of this unique feature of Byzantine life, argues persuasively that the ecclesiastical ritual to bless a relationship between two men bears no resemblance to marriage. Wide-ranging in its use of sources, from a complete census of the manuscripts containing the ritual of adelphopoiesis to the literature and archaeology of early monasticism, and from the works of hagiographers, historiographers, and legal experts in Byzantium to comparative material in the Latin West and the Slavic world, *Brother-Making in Late Antiquity and Byzantium* examines the fascinating religious and social features of the ritual, shedding light on little known aspects of Byzantine society.

The Geopolitics of Mineral Resources for Renewable Energy Technologies Marjolein de Ridder, 2013-08-08 Which minerals are critical for the transition to renewable energy? How will future energy and mineral demand develop? And what will be the implications for international relations?

State Behavior and the Nuclear Nonproliferation Regime Jeffrey R. Fields, 2014 This is the first book-length study of why states sometimes ignore, oppose, or undermine elements of the nuclear nonproliferation regime—even as they formally support it. These essays show that success must be measured not only by how many states join the effort but also by how they participate once they join.

The Arguments of Aquinas J.J. MacIntosh, 2017-04-07 *The Arguments of Aquinas* is intended for readers with philosophical interests, who may not be specialists in medieval philosophy. Some think that a medieval saint must be, as such, wrong, dated, and boring; others feel that a saint, any saint, must be right, relevant, and inspirational. Both groups are likely to misread Aquinas, if indeed they read him at all. The works of great philosophers are products of their times, but that does not lessen their value for us. We profit by reading the works of St Thomas in the same interested but critical way that we read the works of our contemporaries. MacIntosh does not hesitate to compare Thomas's arguments with those of later philosophers as well as with those of his contemporaries and earlier philosophers. He chooses topics from a variety of still interesting problem areas: the existence and attributes of God, including God's foreknowledge and human free will, causality and the origin of the universe, time and necessity, human souls, angels, and the problem of evil. Additionally, the volume looks at his views on honesty and lying, and on human sexuality, on which he is, as ever, philosophically interesting whether or not we accept his conclusions.

Risky Work Environments Pascal Béguin, 2017-05-15 *Risky Work Environments* provides new insights into the multiple and dynamic trajectories of both near misses and mistakes in complex work environments, based on actual case examples. It also studies the interactions between various activity systems or work practices (design, maintenance, incident investigation, regulation, operation) and their consequences for operational performance. The role of rules and regulations is explored, considering the consequences of deviations and the limitations of enforced compliance. Further, the book explains how to search for, think about and act on information about vulnerability, near misses and mistakes in a way that emphasizes accountability in ways that are not punitive but instead responsible, innovative and provide opportunities for learning. Writing from different disciplines and theoretical perspectives, the contributors analyse working in risky environments which include air traffic control, offshore mining, chemical plants, neo-natal intensive care units, ship piloting and emergency call dispatch centres. In each chapter the authors present rich empirical data and their analyses illustrate a variety of ways in which, despite imperfect systems, safety and resilience is created in human action. In the chapters where the focus is on error or mistakes, the analysis undertaken reveals the logic of actions undertaken at the time as well as their constraints. The contributors are all active researchers within their disciplines and come from Australia, Finland, France, Norway and the Netherlands. The book will be of direct interest to safety scientists, researchers and scientists, as well as human factors practitioners working in complex technological systems.

Why Mary? Sharon F. Lawlor, 2017-08-30 Throughout the world one can find evidence of the love people have for Mary, the mother of Jesus, whom many know as the Savior of the world. From magnificent cathedrals to small roadside shrines where the faithful followers of Mary leave flowers and prayers, the devotion to Mary is evident.

Rosaries can be seen in the hands of her followers in nearly every continent, and the number of people who seek her intercession on their behalf continues to grow. Where did this love for the mother of Jesus Christ begin? The Gospel of Luke, chapter 1, records Marys visit to her cousin Elizabeth. Elizabeth addresses Mary as blessed among women. Mary states, All generations will count me blessed, because she was chosen by God to bear the long-awaited, prophesied Messiah, the Savior of the world. These two statements point to recognition of the singular blessing God gave to this one woman among all the women who ever lived: she would bear the Son of God, Jesus Christ, who would be born to a virgin, Mary, and would not have an earthly fatherjust as God had prophesied in Genesis 3:15. Yet, the recognition of Gods blessing on Marythat He chose her to bear His only begotten Songoes beyond mere acknowledgment in the hearts and actions of those who adore her.
