Healthcare Technology Management - A Systematic Approach Francis Hegarty, John Amoores, Paul Blackett, Justin McCarthy, Richard Scott, 2017-01-06 Healthcare Technology Management: A Systematic Approach offers a comprehensive description of a method for providing safe and cost effective healthcare technology management (HTM). The approach is directed to enhancing the value (benefit in relation to cost) of the medical equipment assets of healthcare organizations to best support patients, clinicians and other care providers, as well as financial stakeholders. The authors propose a management model based on interlinked strategic and operational quality cycles which, when fully realized, delivers a comprehensive and transparent methodology for implementing a HTM programme throughout a healthcare organization. The

approach proposes that HTM extends beyond managing the technology in isolation to include advancing patient care through supporting the application of the technology. The book shows how to cost effectively manage medical equipment through its full life cycle, from acquisition through operational use to disposal, and to advance care, adding value to the medical equipment assets for the benefit of patients and stakeholders. This book will be of interest to practicing clinical engineers and to students and lecturers, and includes self-directed learning questions and case studies. Clinicians, Chief Executive Officers, Directors of Finance and other hospital managers with responsibility for the governance of medical equipment will also find this book of interest and value. Daughters of Infamy David Kilmer, 2011 On December 7, 1941 the Japanese Navy attacked the American Pacific Fleet at Pearl Harbor, Hawai'i. They believed, and the perception remains, that they succeeded in severely crippling the Navy. *Daughters of Infamy* destroys that myth and shows that the vast majority of warships in the harbor suffered no damage at all. One battleship that was sunk was raised and was present in Tokyo Bay in 1945 to watch the Japanese surrender. This is the true story of the ships that survived Pearl Harbor and how they met the enemy and helped to win the war in the Pacific. (Dust Jacket)

Papa Sartre 'Alī Badr, 2009, □□□ □□□□ After a failed study mission in France, Abd al-Rahman returns home to Iraq to launch an existentialist movement akin to that of his hero. Convinced that it falls upon him to introduce his country's intellectuals to Sartre's thought, he feels especially

qualified by his physical resemblance to the philosopher (except for the crossed eyes) and by his marriage to Germaine, who he claims is the great man's cousin. Meanwhile, his wealth and family prestige guarantee him an idle life spent in drinking, debauchery, and frequenting a well-known nightclub. But is his suicide an act of philosophical despair, or a reaction to his friend's affair with Germaine? A biographer chosen by his presumed friends narrates the story of a somewhat bewildered young man who-like other members of his generation-was searching for a meaning to his life. This parody of the abuses and extravagances of pseudo-philosophers in the Baghdad of the sixties throws into relief the Iraqi intellectual and cultural life of the time and the reversal of fortune of some of Iraq's wealthy and powerful families.--Publisher description.

Cairo Cosmopolitan Diane Singerman, Paul Amar, 2009-08-01 Bringing together a distinguished interdisciplinary group of scholars, this volume explores what happens when new forms of privatization meet collectivist pasts, public space is sold off to satisfy investor needs and tourist gazes, and the state plans for Egypt's future in desert cities while stigmatizing and neglecting Cairo's popular neighborhoods. These dynamics produce surprising contradictions and juxtapositions that are coming to define today's Middle East. The original publication of this volume launched the Cairo School of Urban Studies, committed to fusing political-economy and ethnographic methods and sensitive to ambivalence and contingency, to reveal the new contours and patterns of modern power emerging in the urban frame. Contributors: Mona Abaza, Nezar AlSayyad, Paul Amar, Walter Armbrust, Vincent Battesti, Fanny Colonna, Eric Denis, Dalila ElKerdany, Yasser Elsheshtawy, Farha Ghannam, Galila El Kadi, Anouk de Koning, Petra Kuppinger, Anna Madoeuf, Catherine Miller, Nicolas Puig, Said Sadek, Omnia El Shakry, Diane Singerman, Elizabeth A. Crisis Management Challenges in Kaliningrad Eugene Krasnov, Anna Karpenko, 2016-04-22

Crisis Management Challenges in Kaliningrad captures the evolving nature of the types of crises faced by a society as it transforms and evolves. Once the westernmost bastion of the Soviet Union and now the westernmost part of the Russian Federation, the Kaliningrad Oblast remains cut off from direct land communication with mainland Russia and provides a condensed, real-life laboratory in which to observe changing political, technological and economic priorities in Post-Soviet society. Expert contributors from the region chart the tensions, problems and opportunities created by the collapse of the Soviet Union in December 1991 and examine the change in status and situation of the Kaliningrad Oblast. By looking at a selection of economic, environmental and social crises a historical link between the Soviet and Post-Soviet eras is formed and rigorously examined.

Manning the Future Legions of the United States Donald Vandergriff, 2008-10-30 An Industrial Age model continues to shape the way the Army approaches its recruiting, personnel management, training, and education. This outdated personnel management paradigm—designed for an earlier era—has been so intimately tied to the maintenance of Army culture that a self-perpetuating cycle has formed, diminishing the Army's attempts to develop adaptive leaders and institutions. This cycle can be broken only if the Army accepts rapid evolutionary change as the norm of the new era. Recruiting the right people, then having them step into an antiquated organization, means that many of them will not stay as they find their ability to contribute and develop limited by a centralized, hierarchical organization. Recruiting and retention data bear this out. Several factors have combined to force the Army to think about the way it develops and nurtures its leaders. Yet, Vandergriff maintains, mere modifications to today's paradigm may not be enough. Today's Army has to do more than post rhetoric about adaptability on briefing slides and in literature. One cannot divorce the way the Army accesses, promotes, and selects its leaders from its leadership-development model. The Army cannot expect to maintain leaders who grasp and practice adaptability if these officers encounter an organization that is neither adaptive nor innovative.

Instead, Army culture must become adaptive, and the personnel system must evolve into one that nurtures adaptability in its policies, practices, and beliefs. Only a detailed, comprehensive plan where nothing is sacred will pave the way to cultural evolution.

Arcadian Visions Allan R. Ruff, 2015-10-31 This book is about Arcadia and the pastoral tradition; what it has meant for successive generations and their vision of the landscape, as well as the implications this has had for its design and management. Today the concept of Arcadia, and way it has shaped our landscape, is dimly perceived and little understood by landscape architects and those responsible for the management of land. This is in marked contrast to previous centuries when the vision of Arcadia and the pastoral was implanted by education among the more privileged in society. Young men spent many hours translating and learning by rote the words of Virgil and other classical authors and on the Grand Tour they would be introduced to work of painters like Poussin and Claude and their interpretations of the Ideal pastoral landscape. Today Arcadia holds as powerful an influence as at any time in the past and it is important that we plan our urban environment in ways that harmonize with the natural world. *Arcadian Visions* provides an alternative landscape history for all those involved with the landscape - either through its design, management, use or enjoyment. It begins by examining the origins of Arcadia and the pastoral in the classical poetry of Theocritus and Virgil, and the effects of, and on, Christianity before outlining its development in renaissance Italy and subsequently in the Netherlands, America and England. It concludes by looking at how Arcadian ecology is bringing about a reappraisal of the pastoral in the 21st century.

The Poor in Liberation Theology Tim Noble, 2014-10-14 Liberation theology has, since its beginnings over forty years ago, placed the poor at the heart of theology and revealed the ideologies

underlying both society and church. Meanwhile, over this period, the progressive church appears to have stagnated and the poor of Latin America have turned increasingly to neo-Pentecostalism. 'The Poor in Liberation Theology' questions whether the effect of liberation theology is to provide a pathway to God or really to construct idols out of the poor. Combining the conceptual language of the philosophers Jean-Luc Marion and Emmanuel Levinas with the methodology of the liberation theologian Clodovis Boff, the volume outlines how liberation theology can work to ensure the poor do not become an ideological construct but remain icons of God. Drawing on a wealth of material from Latin American and Europe, the book demonstrates the continuing validity and importance of liberation theology and its further potential when engaged with contemporary philosophy.

Media and Mass Atrocity Allan Thompson, 2019-04-05 When human beings are at their worst – as they most certainly were in Rwanda during the 1994 genocide – the world needs the institutions of journalism and the media to be at their best. Sadly, in Rwanda, the media fell short. *Media and Mass Atrocity* revisits the case of Rwanda, but also examines how the nexus between media and mass atrocity has been shaped by the dramatic rise of social media. It has been twenty-five years since Rwanda slid into the abyss. The killings happened in broad daylight, but many of us turned away. A quarter century later, there is still much to learn about the relationship between the media and genocide, an issue laid bare by the Rwanda tragedy. *Media and Mass Atrocity* revisits the debate over the role of traditional news media in Rwanda, where, confronted by the horrors taking place, international news media, for the most part, turned away, and at times muddled the story when they did pay attention. Hate-media outlets in Rwanda played a role in laying the groundwork for genocide, and then actively encouraged the extermination campaign. The news media not only failed to fully grasp and communicate the genocide, but mostly overlooked the war crimes committed

during the genocide and in its aftermath by the Rwandan Patriotic Front. The global media landscape has been transformed since Rwanda. We are now saturated with social media, generated as often as not by non-journalists. Mobile phones are everywhere. And in many quarters, the traditional news media business model continues to recede. Against that backdrop, it is more important than ever to examine the nexus between media and mass atrocity. The book includes an extensive section on the echoes of Rwanda, which looks at the cases of Darfur, the Central African Republic, Myanmar, and South Sudan, while the impact of social media as a new actor is examined through chapters on social media use by the Islamic State and in Syria and in other contexts across the developing world. It also looks at the aftermath of the genocide: the shifting narrative of the genocide itself, the evolving debate over the role and impact of hate media in Rwanda, the challenge of digitizing archival records of the genocide, and the fostering of free and independent media in atrocity's wake. The volume also probes how journalists themselves confront mass atrocity and examines the preventive function of media through the use of advanced digital technology as well as radio programming in the Lake Chad Basin and the Democratic Republic of Congo. Media and Mass Atrocity questions what the lessons of Rwanda mean now, in an age of communications so dramatically influenced by social media and the relative decline of traditional news media.

Innovations in Global Mental Health Samuel O. Okpaku, 2021-11-02 Over the course of the last decade, political and mental entities at large have embraced global mental health: the idea that psychiatric health is vital to improved quality of life. Physicians globally have implemented guidelines recommended by the National Institute of Mental Health (NIMH) in 2007, thereby breaking down barriers to care and improving quality of life in areas where these practices have been implemented. Programs for training and education have expanded as a result. Clinicians

benefit more from both local resources in some regions as well as in international collaboration and technological advancements. Even amidst all of these positive outcomes, clinicians still face some stumbling blocks. With worldwide statistics estimating that 450 million people struggle with mental, neuropsychiatric, and neurological disorders—25 percent of the world's non-communicable disease burden—rising to these challenges prove to be no small feat, even in wealthy Western nations. Various articles and books have been published on global mental health, but few of them thoroughly cover the clinical, research, innovative, and social implications as they pertain to psychiatry; often, only one of these aspects is covered. A comprehensive text that can keep pace with the rapidly evolving literature grows more and more valuable each day as clinicians struggle to piece together the changes around the world that leave open the possibility for improved outcomes in care. This book seeks to boldly rectify this situation by identifying innovative models of service delivery, training, education, research funding, and payment systems that have proven to be exemplary in implementation and scalability or have potential for scalability. Chapters describe specific barriers and challenges, illuminating effective strategies for improved outcomes. This text is the first peer-reviewed resource to gather prestigious physicians in global mental health from around the world and disseminate their expertise in the medical community at large in a format that is updateable, making it a truly cutting-edge resource in a world constantly changed by medical, scientific, and technological advances. *Innovations in Global Mental Health* is the ultimate resource for psychiatrists, psychologists, primary care physicians, hospitalists, policy makers, and all medical professionals at the forefront of global mental health and its implications for the future.

The Palgrave Handbook of Conflict and History Education in the Post-Cold War Era

Luigi Cajani, Simone Lässig, Maria Repoussi, 2019-06-28 This Handbook provides a systematic and analytical approach to the various dimensions of international, ethnic and domestic conflict over the uses of national history in education since the end of the Cold War. With an upsurge in political, social and cultural upheaval, particularly since the fall of state socialism in Europe, the importance of history textbooks and curricula as tools for influencing the outlooks of entire generations is thrown into sharp relief. Using case studies from 58 countries, this book explores how history education has had the potential to shape political allegiances and collective identities. The contributors highlight the key issues over which conflict has emerged – including the legacies of socialism and communism, war, dictatorships and genocide – issues which frequently point to tensions between adhering to and challenging the idea of a cohesive national identity and historical narrative. Global in scope, the Handbook will appeal to a diverse academic audience, including historians, political scientists, educationists, psychologists, sociologists and scholars working in the field of cultural and media studies.
