**In the Flesh** Erika Zimmerman Damer, 2019-01-22 This original look at the Roman love elegies of Propertius, Tibullus, and Ovid engages postmodern and new materialist feminist theory to assert the significance in the poems of human bodies in all their vulnerability, sexiness, and materiality. This analysis underscores the impact marginalized characters such as mistresses and enslaved individuals have on the genre.

**Poet and Businessman** Leif Stenberg, 2022-08-30 A history of contemporary Kuwait as seen through the life of an individual Kuwaiti. This book reviews and analyzes the modern history of Kuwait through the life of Abd al-Aziz Sa'ud al-Babtain, a wealthy businessman, philanthropist, and poet. He is the head of a large, influential international cultural foundation based in Kuwait City. Abd al-Aziz's life story tightly interweaves with modern discussions on the history of the state of Kuwait. There are very few books taking a collective grip on the history of the state of Kuwait. Likewise, there are very few studies about the generation of Gulf individuals who experienced, benefitted from, and even suffered from the discovery of oil, and who has been a crucial part of socioeconomic and cultural developments in countries like Kuwait in recent history. By constructing a cohesive overview of the modern history of Kuwait enriched by the life of an individual that has lived through the better part of that particular history, this book fills a lacuna in contemporary scholarship on the Middle East, and especially the

Arabian or the Persian Gulf.

**The Talented Miss Farwell** Emily Gray Tedrowe,2020-09-29 Catch Me If You Can meets Patricia Highsmith in this “stylish” (New York Times Book Review) page-turner of greed and obsession, survival and self-invention that is a piercing character study of one unforgettable female con artist. At the end of the 1990s, with the art market finally recovered from its disastrous collapse, Miss Rebecca Farwell has made a killing at Christie’s in New York City, selling a portion of her extraordinary art collection for a rumored 900 percent profit. Dressed in couture YSL, drinking the finest champagne at trendy Balthazar, Reba, as she’s known, is the picture of a wealthy art collector. To some, the elusive Miss Farwell is a shark with outstanding business acumen. To others, she’s a heartless capitalist whose only interest in art is how much she can make. But a thousand miles from the Big Apple, in the small town of Pierson, Illinois, Miss Farwell is someone else entirely—a quiet single woman known as Becky who still lives in her family’s farmhouse, wears sensible shoes, and works tirelessly as the town’s treasurer and controller. No one understands the ins and outs of Pierson’s accounts better than Becky; she’s the last one in the office every night, crunching the numbers. Somehow, her neighbors marvel, she always finds a way to get the struggling town just a little more money. What Pierson doesn’t see—and can never discover—is that much of that money is shifted into a separate account

that she controls, “borrowed” funds used to finance her art habit. Though she quietly repays Pierson when she can, the business of art is cutthroat and unpredictable. But as Reba Farwell’s deals get bigger and bigger, Becky Farwell’s debt to Pierson spirals out of control. How long can the talented Miss Farwell continue to pull off her double life?

Tapping the Green Market Abraham Guillen, Sarah A Laird, Alan R Pierce, Patricia Shanley, 2012-08-21 There is a rapidly growing interest in, and demand for, non-timber forest products (NTFPs). They provide critical resources across the globe fulfilling nutritional, medicinal, financial and cultural needs. However, they have been largely overlooked in mainstream conservation and forestry politics. This volume explains the use and importance of certification and eco-labelling for guaranteeing best management practices of non-timber forest products in the field. Using extensive case studies and global profiles of non-timber forest products, this work not only seeks to further our comprehension of certification processes but also broaden understanding of non-timber forest product management, harvesting and marketing. It should be useful to forest managers, policy-makers and conservation organizations as well as for academics in these areas.

**Surface Temperature Reconstructions for the Last 2,000 Years** National Research Council, Division on Earth and Life Studies, Board on Atmospheric Sciences and Climate, Committee on Surface Temperature Reconstructions for the

Last 2,000 Years,2007-01-05 In response to a request from Congress, Surface Temperature Reconstructions for the Last 2,000 Years assesses the state of scientific efforts to reconstruct surface temperature records for Earth during approximately the last 2,000 years and the implications of these efforts for our understanding of global climate change. Because widespread, reliable temperature records are available only for the last 150 years, scientists estimate temperatures in the more distant past by analyzing proxy evidence, which includes tree rings, corals, ocean and lake sediments, cave deposits, ice cores, boreholes, and glaciers. Starting in the late 1990s, scientists began using sophisticated methods to combine proxy evidence from many different locations in an effort to estimate surface temperature changes during the last few hundred to few thousand years. This book is an important resource in helping to understand the intricacies of global climate change.

*Konzepte der ›exotischen‹ Tierwelt im Mittelalter* Stephanie Mühlenfeld, 2019-07-15 Wie fremd ein ›exotisches‹ Tier in einem mittelalterlichen Text beschrieben wird und welche proprietates dabei besonders betont werden, hängt ganz davon ab, welchen Diskursen die Darstellung unterliegt. Lassen sich in der mittelalterlichen Literatur universelle Wahrnehmungs-, Verstehens- und Deutungskonzepte erkennen, die in allen Beschreibungen ›exotischer‹ Tiere zum Tragen kommen und die auf eine kultur- und epochenübergreifende Tradition zurückgehen? Oder auch solche, die spezifisch nur in einem bestimmten mittelalterlichen Diskurs in Erscheinung treten? Um Antworten auf diese und weitere Fragen zu finden, werden im Rahmen eines interdisziplinären Untersuchungsansatzes fiktionale Texte des 12. bis 16. Jahrhunderts, (pseudo-)historische Reiseberichte des 14., 15. und frühen 16. Jahrhunderts sowie bildhafte Darstellungen von ›exotischen‹ Tieren einer vergleichenden Analyse unterzogen. How strange the description of an 'exotic' animal can be in a medieval text and which properties or proprietates are here especially stressed, depends on the respective discourses and presentations. Are there any global patterns of perception, understanding and interpretation in medieval literature that can be found in all descriptions of ›exotic‹ animals and can be traced back to a cross-cultural and cross-epochal tradition? Are there also any properties which are specific to certain medieval discourses? These issues will be addressed in the context of

an interdisciplinary study in which not only fictional texts of the 12th to 16th century, (pseudo)historical travel reports of the 14th, 15th and early 16th century but also pictures of ›exotic‹ animals will be analysed.

*The Mushroom at the End of the World* Anna Lowenhaupt Tsing, 2017-09-19 What a rare mushroom can teach us about sustaining life on a fragile planet Matsutake is the most valuable mushroom in the world—and a weed that grows in human-disturbed forests across the northern hemisphere. Through its ability to nurture trees, matsutake helps forests to grow in daunting places. It is also an edible delicacy in Japan, where it sometimes commands astronomical prices. In all its contradictions, matsutake offers insights into areas far beyond just mushrooms and addresses a crucial question: what manages to live in the ruins we have made? A tale of diversity within our damaged landscapes, *The Mushroom at the End of the World* follows one of the strangest commodity chains of our times to explore the unexpected corners of capitalism. Here, we witness the varied and peculiar worlds of matsutake commerce: the worlds of Japanese gourmets, capitalist traders, Hmong jungle fighters, industrial forests, Yi Chinese goat herders, Finnish nature guides, and more. These companions also lead us into fungal ecologies and forest histories to better understand the promise of cohabitation in a time of massive human destruction. By investigating one of the world's most sought-after fungi, *The Mushroom at the End of the World* presents an original examination into the relation between capitalist destruction and collaborative survival within

multispecies landscapes, the prerequisite for continuing life on earth.

**Think Bayes** Allen B. Downey, 2021-05-18 If you know how to program, you're ready to tackle Bayesian statistics. With this book, you'll learn how to solve statistical problems with Python code instead of mathematical formulas, using discrete probability distributions rather than continuous mathematics. Once you get the math out of the way, the Bayesian fundamentals will become clearer and you'll begin to apply these techniques to real-world problems. Bayesian statistical methods are becoming more common and more important, but there aren't many resources available to help beginners. Based on undergraduate classes taught by author Allen B. Downey, this book's computational approach helps you get a solid start. Use your programming

skills to learn and understand Bayesian statistics Work with problems involving estimation, prediction, decision analysis, evidence, and Bayesian hypothesis testing Get started with simple examples, using coins, dice, and a bowl of cookies Learn computational methods for solving real-world problems
