*Children's Contact with Incarcerated Parents* Julie Poehlmann-Tynan,2015-05-11 This Brief explores the potential effects of parent-child contact during incarceration on child and adult relationships, well-being, and parenting as well as corrections-related issues, such as institutional behavior and recidivism. It presents a literature review on what is currently known about parent-child contact during parental incarceration in addition to several empirical studies, followed by a summary, commentary, and briefing report. The empirical studies focus on contact in both jail and prison settings. Because jails in the United States handle more admissions per year than prisons – and studies of jailed parents and their children are not common in the literature – two of the three studies presented focus on jails. Following the empirical studies, a summary that includes recommendations for policy and intervention is presented, along with a commentary that explores what researchers need to do to make effective policy recommendations. This Brief is an essential resource for policy makers and related professionals, graduate students, and researchers in child and school psychology, family studies, public health, social work, law/criminal justice, and sociology.

*Emerging Market Economies and Financial Globalization* Leonardo E. Stanley,2018-03-15 In the past, foreign shocks arrived to national economies mainly through trade channels, and transmissions of such shocks took time to come into effect. However, after capital globalization, shocks spread to markets almost immediately. Despite the increasing macroeconomic dangers that the situation generated at emerging markets in the South, nobody at the North was ready to acknowledge the procyclicality of the financial system and the inner weakness of “decontrolled” financial innovations because they were enjoying from the “great moderation.” Monetary policy was primarily centered on price stability objectives, without considering the mounting credit and asset price booms being generated by market liquidity and the problems generated by this glut. Mainstream economists, in turn, were not majorly attracted in integrating financial factors in their models. External pressures on emerging market economies (EMEs) were not eliminated after 2008, but even increased as international capital flows augmented in relevance thereafter. Initially economic authorities accurately responded to the challenge, but unconventional monetary policies in the US began to create important spillovers in EMEs. Furthermore, in contrast to a previous surge in liquidity, funds were now transmitted to EMEs throughout the bond market. The perspective of an increase in US interest rates by the FED is generating a reversal of expectations and a sudden flight to quality. Emerging countries’ currencies began to experience higher volatility levels, and depreciation movements against a newly strong US dollar are also increasingly observed. Consequently, there are increasing doubts that the “unexpected” favorable outcome observed in most EMEs at the aftermath of the Global Financial Crisis (GFC) would remain.

*New Concepts on Abdominoplasty and Further Applications* Juarez M. Avelar,2016-09-24 This book documents the important advances that have been achieved in abdominoplasty over the past 15 years, in particular through the introduction of a nontraumatic approach associated with minimal morbidity owing to the avoidance of resection of abdominal panniculus and damage to the perforating vessels. The surgical principles of this procedure, including in combination with liposuction, are fully described by its developer, Juarez Avelar, with the aid of a wealth of color illustrations. A miniabdominoplasty option is also discussed and recent significant technical contributions such as various new plication techniques and means of minimizing complications are clearly presented. In addition, a series of chapters explain how the surgical principles underlying the described nontraumatic method of abdominoplasty can now be applied to other areas of the body, for example to improve rhytidoplasty, ear reconstruction, body contouring, and medial thigh lifting. This book enables the plastic surgeon to apply the latest abdominoplasty techniques effectively and safely.

**Cosmic Society** Peter Dickens,James S. Ormrod,2007-11-08 Space weaponry, satellite

surveillance and communications, and private space travel are all means in which outer space is being humanized: incorporated into society's projects. But what are the political implications of

society not only being globalized, but becoming 'cosmic'? Our ideas about society have long affected, and been affected by, our understanding of the universe: large sections of our economy and society are now organized around humanity's use of outer space. Our view of the universe, our increasingly 'cosmic' society, and even human consciousness are being transformed by new relations with the cosmos. As the first sociological book to tackle humanity's relationship with the universe, this fascinating volume links social theory to classical and contemporary science, and proposes a new 'cosmic' social theory. Written in a punchy, student-friendly style, this timely book engages with a range of topical issues, including cyberspace, terrorism, tourism, surveillance and globalization.

Government Support to Agricultural Insurance Olivier Mahul,Charles J. Stutley,2010-03-08

Governments in developing countries have been increasingly involved in the support of agricultural (crop and livestock) insurance programs in recent years. In their attempts to design and implement agricultural insurance, they have sought technical and financial assistance from the international community and particularly from the World Bank. One of the recurrent requests from governments regards international experience with agricultural insurance, not only in developed countries, where in some cases agricultural insurance has been offered for more than a century, but also in middleand low-income countries. Governments are particularly interested in the technical, operational, financial, and institutional aspects of public support to agricultural insurance. 'Government Support to Agricultural Insurance' informs public and private decision makers involved in agricultural insurance about recent developments, with a particular focus on middle- and low-income countries. It presents an updated picture of the spectrum of institutional frameworks and experiences with agricultural insurance, ranging from countries in which the public sector provides no support to those in which governments heavily subsidize agricultural insurance. This analysis is based on a survey conducted by the World Bank s agricultural insurance team in 2008 in 65 developed and developing countries. Drawing on the survey results, the book identifies some key roles governments can play to support the development of sustainable, affordable, and cost-effective agricultural insurance programs.

**Resurging Asian Giants** Klaus Gerhaeuser,Yoshihiro Iwasaki,V. B. Tulasidhar,2010-07-01 The economies of the People's Republic of China and India have seen dramatic growth in recent years. As their respective successes continue to reshape the world's economic landscape, noted Chinese and Indian scholars have studied the two countries' development paths, in particular their rich and diverse experiences in such areas as education, information technology, local entrepreneurship, capital markets, macroeconomic management, foreign direct investment, and state-owned enterprise reforms. Drawing on these studies, ADB has produced a timely collection of lessons learned that serves as a valuable refresher on the challenges and opportunities ahead for developing economies, especially those in Asia and the Pacific.

**Flood Risk Assessment and Management** Andreas H. Schumann,2011-01-04 Flood catastrophes which happened world-wide have shown that it is not sufficient to characterize the hazard caused by the natural phenomenon flood with the well-known 3M-approach (measuring,

mapping and modelling). Due to the recent shift in paradigms from a safety oriented approach to risk based planning it became necessary to consider the harmful impacts of hazards. The planning tasks changed from attempts to minimise hazards towards interventions to reduce exposure or susceptibility and nowadays to enhance the capacities to increase resilience. Scientific interest shifts more and more towards interdisciplinary approaches, which are needed to avoid disaster. This book deals with many aspects of flood risk management in a comprehensive way. As risks depend on hazard and vulnerabilities, not only geophysical tools for flood forecasting and planning are presented, but also socio-economic problems of flood management are discussed. Starting with precipitation and meteorological tools to its forecasting, hydrological models are described in their applications for operational flood forecasts, considering model uncertainties and their interactions with hydraulic and groundwater models. With regard to flood risk planning, regionalization aspects and the options to utilize historic floods are discussed. New hydrological tools for flood risk assessments for dams and reservoirs are presented. Problems and options to quantify socio-economic risks and how to consider them in multi-criteria assessments of flood risk planning are discussed. This book contributes to the contemporary efforts to reduce flood risk at the European scale. Using many real-world examples, it is useful for scientists and practitioners at different levels and with different interests.
