Autonomous Control for a Reliable Internet of Services Ivan Ganchev,R. D. van der Mei,Hans van den Berg,2018-05-30 This open access book was prepared as a Final Publication of the COST Action IC1304 "Autonomous Control for a Reliable Internet of Services (ACROSS)". The book contains 14 chapters and constitutes a show-case of the main outcome of the Action in line with its scientific goals. It will serve as a valuable reference for undergraduate and post-graduate students, educators, faculty members, researchers, engineers, and research strategists working in this field. The

explosive growth of the Internet has fundamentally changed the global society. The emergence of concepts like SOA, SaaS, PaaS, IaaS, NaaS, and Cloud Computing in general has catalyzed the migration from the information-oriented Internet into an Internet of Services (IoS). This has opened up virtually unbounded possibilities for the creation of new and innovative services that facilitate business processes and improve the quality of life. However, this also calls for new approaches to ensuring the quality and reliability of these services. The objective of this book is, by applying a systematic approach, to assess the state-of-the-art and consolidate the main research results achieved in this area.

Cybersecurity Framework Manufacturing Profile National Institute of Standards, 2017-05-31 March 2017 If you like this book (or the Kindle version), please leave positive review. This document provides the Cybersecurity Framework implementation details developed for the manufacturing environment. The Manufacturing Profile of the Cybersecurity Framework can be used as a roadmap for reducing cybersecurity risk for manufacturers that is aligned with manufacturing sector goals and industry best practices. The Profile gives manufacturers: * A method to identify opportunities for improving the current cybersecurity posture of the manufacturing system * An evaluation of their ability to operate the control environment at their acceptable risk level * A standardized approach to preparing the cybersecurity plan for ongoing assurance of the manufacturing system's security Why buy a book you can download for free? First you gotta find it and make sure it's the latest version (not always easy). Then you gotta print it using a network printer you share with 100 other people - and its outta paper - and the toner is low (take out the toner cartridge, shake it, then put it back). If it's just 10 pages, no problem, but if it's a 250-page book, you will need to punch 3 holes in all those pages and put it in a 3-ring binder. Takes at least an hour. An engineer that's paid \$75 an hour has to do this himself (who has assistant's anymore?). If you are paid more than \$10 an hour and use an ink jet printer, buying this book will save you money. It's much more cost-effective to just order the latest version from Amazon.com This book is published by 4th Watch Books and includes copyright material. Interagency Report on the Status of International Cybersecurity Standardization for the Internet of Things (IoT) Mike Hogan, 2018 The Interagency International Cybersecurity Standardization Working Group (IICS WG) was established in December 2015 by the National Security Council's Cyber Interagency Policy Committee. Its purpose is to coordinate on major issues in international cybersecurity standardization and thereby enhance U.S. federal agency participation in the process. Effective U.S. Government participation involves coordinating across the federal government and working with the U.S. private sector. The U.S. relies more heavily on the private sector for standards development than do many other countries. Companies and industry groups, academic institutions, professional societies, consumer groups, and other interested parties are major contributors to this process. Further, the many Standards Developing Organizations (SDOs) which provide the infrastructure for the standards development are overwhelmingly private sector organizations. On April 25, 2017, the IICS WG established an Internet of Things (IoT) Task Group to determine the current state of international cybersecurity standards development for IoT. This report is intended for use by the working group member agencies to assist them in their standards planning and to help coordinate U.S. Government participation in international cybersecurity standardization for IoT. Other organizations may also find this document useful in their planning.

Public Libraries and the Internet John Carlo Bertot Ph.D., Charles R. McClure, Paul T. Jaeger, 2010-11-11 This book is a timely and detailed exploration of the impact and issues of the Internet in public libraries and their implications for society, policy, and professional practice. *Public Libraries and the Internet: Roles, Perspectives, and Implications* explores the impact of the Internet and the expansion of the networked environment on U.S. public libraries through more than a dozen essays written by leading scholars and administrators. Notwithstanding the far-reaching changes wrought by the Internet, this is the first attempt to provide a comprehensive exploration of the subject over time and across areas of practice. This wide-ranging volume, edited by the authors of several national studies tracking the use and involvement of public libraries with the Internet since 1994, offers both description and assessment. It discusses the ways in which the roles and services of public libraries have changed as a result of the Internet and offers a perspective on the meaning and impact of these changes. Perhaps most critically, it also suggests possible futures and opportunities as public libraries continue to evolve in this networked environment.

Secure Data Management in Decentralized Systems Ting Yu, Sushil Jajodia, 2007-05-11 The field of database security has expanded greatly, with the rapid development of global inter-networked infrastructure. Databases are no longer stand-alone systems accessible only to internal users of organizations. Today, businesses must allow selective access from different security domains. New data services emerge every day, bringing complex challenges to those whose job is to protect data security. The Internet and the web offer means for collecting and sharing data with unprecedented flexibility and convenience, presenting threats and challenges of their own. This book identifies and addresses these new challenges and more, offering solid advice for practitioners and

researchers in industry.

Cybersecurity in Poland Katarzyna Chałubińska-Jentkiewicz, 2022 This open access book explores the legal aspects of cybersecurity in Poland. The authors are not limited to the framework created by the NCSA (National Cybersecurity System Act - this act was the first attempt to create a legal regulation of cybersecurity and, in addition, has implemented the provisions of the NIS Directive) but may discuss a number of other issues. The book presents international and EU regulations in the field of cybersecurity and issues pertinent to combating cybercrime and cyberterrorism. Moreover, regulations concerning cybercrime in a few select European countries are presented in addition to the problem of collision of state actions in ensuring cybersecurity and human rights. The advantages of the book include a comprehensive and synthetic approach to the issues related to the cybersecurity system of the Republic of Poland, a research perspective that takes as the basic level of analysis issues related to the security of the state and citizens, and the analysis of additional issues related to cybersecurity, such as cybercrime, cyberterrorism, and the problem of collision between states ensuring security cybernetics and human rights. The book targets a wide range of readers, especially scientists and researchers, members of legislative bodies, practitioners (especially judges, prosecutors, lawyers, law enforcement officials), experts in the field of IT security, and officials of public authorities. Most authors are scholars and researchers at the War Studies University in Warsaw. Some of them work at the Academic Centre for Cybersecurity Policy - a thinktank created by the Ministry of National Defence of the Republic of Poland. .

Operator Handbook Joshua Picolet, 2020-03-18 The Operator Handbook takes three disciplines (Red Team, OSINT, Blue Team) and combines them into one complete reference guide. The book contains 123 individual cheat sheet references for many of the most frequently used tools and techniques by practitioners. Over 400 pages of content to assist the most seasoned cybersecurity veteran or someone just getting started in the career field. The goal of combining all disciplines into one book was to remove the artificial barriers that only certain knowledge exists within a Team. The reality is today's complex digital landscape demands some level of knowledge in all areas. The Operator culture should mean a well-rounded team member no matter the Team you represent. All cybersecurity practitioners are Operators. The Blue Team should observe and understand Red Team tactics, Red Team should continually push collaboration with the Blue Team, and OSINT should continually work to peel back evidence of evil doers scattered across disparate data sources. In the spirit of having no separation, each reference is listed in alphabetical order. Not only does this remove those team separated notions, but it also aids in faster lookup. We've all had the same experience where we knew there was an NMAP Cheat Sheet but did it fall under Networking, Windows, or Tools? In the Operator Handbook it begins with N so flip to the N's section. Also almost every topic is covered in How to exploit X and How to defend X perspectives. Tools and topics covered: Cloud (AWS, Azure, GCP), Windows, macOS, Linux, Android, iOS, DevOps (Docker, Kubernetes), OSINT, Ports, Forensics, Malware Resources, Defender tools, Attacker tools, OSINT tools, and various other supporting tools (Vim, iptables, nftables, etc...). This handbook was truly meant to be a single source for the most common tool and techniques an Operator can encounter while on the job. Search Copy Paste L33t.
