Statistics in Criminal Justice David Weisburd,Chester Britt,2013-12-11 Statistics in Criminal Justice takes an approach that emphasizes the application and interpretation of statistics in research in crime and justice. This text is meant for both students and researchers who want to gain a basic understanding of common statistical methods used in this field. In general, the text relies on a building-block approach, meaning that each chapter helps to prepare the student for the chapters that follow. It also means that the level of sophistication of the text increases as the text progresses. Throughout the text there is an emphasis on comprehension and interpretation, rather than computation. However, as the statistical methods discussed become more complex and demanding to compute, there is increasing use and integration of statistical software. This approach is meant to provide the reader with an accessible, yet sophisticated understanding of statistics that can be used to examine real-life criminal justice problems with popular statistical software programs. The primary goal of the text is to give students and researchers a basic understanding of statistical concepts and methods that will leave them with the confidence and the tools for tackling more complex problems on their own. New to the 4th Edition

- New chapter on experimental design and the analysis of experimental data.
- New chapter on multi-level models, including growth-curve models.
- New computer exercises throughout the text to illustrate the use of both SPSS and Stata.
- Revision of exercises at the end of each chapter that places greater emphasis on using statistical software.
- Additional resources on the text's web site for instructors and students, including answers to selected problems, syntax for replicating text examples in SPSS and Stata, and other materials that can be used to supplement the use of the text.

Punishment Without Crime Alexandra Natapoff, 2018-12-31 A revelatory account of the misdemeanor machine that unjustly brands millions of Americans as criminals. **Punishment Without Crime** offers an urgent new interpretation of inequality and injustice in America by examining the paradigmatic American offense: the lowly misdemeanor. Based on extensive original research, legal scholar Alexandra Natapoff reveals the inner workings of a massive petty offense system that produces over 13 million cases each year. People arrested for minor crimes are swept through courts where defendants often lack lawyers, judges process cases in mere minutes, and nearly everyone pleads guilty. This misdemeanor machine starts punishing people long before they are convicted; it punishes the innocent; and it punishes conduct that never should have been a crime. As a result, vast numbers of Americans -- most of them poor and people of color -- are stigmatized as criminals, impoverished through fines and fees, and stripped of drivers' licenses, jobs, and

housing. For too long, misdemeanors have been ignored. But they are crucial to understanding our punitive criminal system and our widening economic and racial divides. A Publishers Weekly Best Book of 2018
