Public Assistance Program and Policy Guide Fema,2019-05-06 April 2018 Full COLOR 8 1/2 by 11 inches The Public Assistance Program and Policy Guide provides an overview of the Presidential declaration process, the purpose of the Public Assistance (PA) Program, and the authorities authorizing the assistance that the Federal Emergency Management Agency provides under the PA Program. It provides PA policy language to guide eligibility determinations. Overarching eligibility requirements are presented first and are not reiterated for each topic. It provides a synopsis of the PA Program implementation process beginning with pre-declaration activities and continuing through closeout of the PA Program award. When a State, Territorial, or Indian Tribal Government determines that an incident may exceed State, Territorial, Indian Tribal, and local government capabilities to respond, it requests a joint Preliminary Damage Assessment (PDA) with the Federal Emergency Management Agency (FEMA). Federal, State, Territorial, Indian Tribal, local government, and certain private nonprofit (PNP) organization officials work together to estimate and document the impact and magnitude of the incident. Carcass management guidelines Miller, L.P., Miknis, R.A. and Flory, G.A., 2020-12-28 Animal disease outbreaks pose many challenges for response authorities that can impact livelihoods, food security, and the environment. Proper disposal of animal carcasses that die or are culled during the outbreak is a key component of a successful response to a disease outbreak because it helps prevent or mitigate the further spread of pathogens and in case of zoonotic disease, to further protect human health. The practical guidelines presented hereby provide carcass and related waste management considerations and recommended procedures for use by Veterinary Services and other official response authorities when developing animal disease outbreak containment and eradication plans. The guidelines apply to animal disease outbreaks of varying sizes, whether the outbreak is isolated to a single premise or spans a region to cover numerous premises. However, they are focused on small to medium-sized holdings in countries without access to engineered landfills, rendering plants or controlled incinerators. The guidelines are written in the spirit of “keep it simple and doable”, considering the limited human and financial resources that many countries are constrained with. Its presentation and practical approach ensure that countries will find it very useful for their emergency operation procedures toolbox. Further, the guidelines directly contribute to the one-health approach by protecting the health of animals, humans, and the environment.

World Report on Ageing and Health World Health Organization, 2015-10-22 The WHO World report on ageing and health is not for the book shelf it is a living breathing testament to all older people who have fought for their voice to be heard at all levels of government across disciplines and sectors. - Mr Bjarne Hastrup President International Federation on Ageing and CEO DaneAge This report outlines a framework for action to foster Healthy Ageing built around the new concept of functional ability. This will require a transformation of health systems away from disease based curative models and towards the provision of older-person-centred and integrated care. It will require the development sometimes from nothing of comprehensive systems of long term care. It will require a coordinated response from many other sectors and multiple levels of government. And it will need to draw on better ways of measuring and monitoring the health and functioning of older populations. These actions are likely to be a sound investment in society's future. A future that gives older people the freedom to live lives that previous generations might never have imagined. The World report on ageing and health responds to these challenges by recommending equally profound changes in the way health policies for ageing populations are formulated and services are provided. As the foundation for its recommendations the report looks at what the latest evidence has to say about the ageing process noting that many common perceptions and assumptions about older people are based on outdated stereotypes. The report's recommendations are anchored in the evidence comprehensive and forward-looking yet eminently practical. Throughout examples of experiences from different countries are used to illustrate how specific problems can be addressed through innovation solutions. Topics explored range from strategies to deliver comprehensive and person-centred services to older populations to policies that enable older people to live in comfort and safety to ways to correct the problems and injustices inherent in current systems for long-term care.

Fingerprints and Other Ridge Skin Impressions Christophe Champod, Chris J. Lennard, Pierre Margot, Milutin Stoilovic, 2017-12-19 Since its publication, the first edition of Fingerprints and Other Ridge Skin Impressions has become a classic in the field. This second edition is completely updated, focusing on the latest technology and techniques—including current detection procedures, applicable processing and analysis methods—all while incorporating the expansive growth of literature on the topic since the publication of the original edition. Forensic science has been challenged in recent years as a result of errors, courts and other scientists contesting verdicts, and changes of a fundamental nature related to previous claims of infallibility and absolute individualization. As such, these factors represent a fundamental change in the way training, identifying, and reporting should be conducted. This book addresses these questions with a clear viewpoint as to where the profession—and ridge skin identification in particular—must go and what efforts and research will help develop the field over the next several years. The second edition introduces several new topics, including Discussion of ACE-V and research results from ACE-V studies Computerized marking systems to help examiners produce reports New probabilistic models and decision theories about ridge skin evidence interpretation, introducing Bayesnet tools Fundamental understanding of ridge mark detection techniques, with the introduction of new aspects such as nanotechnology, immunology and hyperspectral imaging Overview of reagent preparation and application Chapters cover all aspects of the subject, including the formation of friction ridges on the skin, the deposition of latent marks, ridge skin mark identification, the detection and enhancement of such marks, as well the recording of fingerprint evidence. The book

serves as an essential reference for practitioners working in the field of fingerprint detection and identification, as well as legal and police professionals and anyone studying forensic science with a view to understanding current thoughts and challenges in dactyloscopy.

Federalism and the Tug of War Within Erin Ryan,2012-01-12 As environmental, national security, and technological challenges push American law into ever more inter-jurisdictional territory, this book proposes a model of 'Balanced Federalism' that mediates between competing federalism values and provides greater guidance for regulatory decision-making.

The Political Economy of Workplace Injury in Canada Bob Barnetson,2010 Workplace injuries are common, avoidable, and unacceptable. The Political Economy of Workplace Injury in Canada reveals how employers and governments engage in ineffective injury prevention efforts, intervening only when necessary to maintain standard legitimacy. Barnetson sheds light on this faulty system, highlighting the way in which employers create dangerous work environments yet pour billions of dollars into compensation and treatment. Examining this dynamic clarifies the way in which production costs are passed on to workers in the form of workplace injuries.

Risk Measures with Applications in Finance and Economics Michael McAleer,Wing-Keung Wong,2019-07-23 Risk measures play a vital role in many subfields of economics and finance. It has been proposed that risk measures could be analysed in relation to the performance of variables extracted from empirical real-world data. For example, risk measures may help inform effective monetary and fiscal policies and, therefore, the further development of pricing models for financial assets such as equities, bonds, currencies, and derivative securities.A Special Issue of “Risk Measures with Applications in Finance and Economics” will be devoted to advancements in the mathematical and statistical development of risk measures with applications in finance and economics. This Special Issue will bring together the theory, practice and real-world applications of risk measures. This book is a collection of papers published in the Special Issue of “Risk Measures with Applications in Finance and Economics” for Sustainability in 2018.

Specialized Gang Units Deborah Lamm Weisel,2011 This is a print on demand edition of a hard to find publication. Between 1980 and the mid-1990s, the number of specialized gang units (SGU) in law enforcement agencies increased substantially. The rise in SGU coincided with the widespread adoption of community policing (CP). This report examined whether CP and SGU are complementary or conflicting approaches. The research approach consisted of field observation of gang personnel in two CP agencies with SGU: Indianapolis, IN, and San Diego, CA. This report describes the specific types of activities engaged in by SGU -- documenting the time expended by SGU personnel on each. The results suggest that SGU can have an important role in modern policing. There is little evidence that SGU conflict with CU in principle or practice.

Management of Fecal Incontinence for the Advanced Practice Nurse Donna Z. Bliss,2018-07-30 The book describes the current management of fecal incontinence from an advanced practice nursing perspective. It fills a gap in nursing knowledge promoting and showcasing the expertise and significant contribution of advanced practice nurses whose role is so important in the health care system. Authors' objectives are to disseminate information about evidenced-based nursing care for the incontinent patient to improve outcomes and quality of life as well as to instruct nurses involved in continence care to practice at a high quality level. The book is structured in chapters, starting by explaining fecal incontinence and its impact on quality of life. The second chapter discusses advanced practice continence nursing. The epidemiology of fecal incontinence is reviewed to

provide an appreciation of the scope of the problem. Normal defecation and mechanisms to ensure continence are reviewed to improve understanding of the alterations resulting in fecal incontinence. The next chapters focus on assessment, diagnosis and management of fecal incontinence in various patient groups which parallels the delivery of care. Since surgery is a treatment option in some cases, a chapter explains surgical approaches and the postoperative nursing care. As skin damage is the most common complication of fecal incontinence there is a chapter about management of these associated problems. The last chapter addresses managing fecal incontinence in the patient with urinary continence also. Practice related chapters include a case study. All chapters highlight key information in a box or table. The intended readers are international advanced practice nurses who care for patients with incontinence as well as continence nurse specialists practicing at a general level. General nurses interested in continence care might also be interested in reading the book. Other disciplines who are part of the healthcare team may be interested in learning more about role of the advanced practice nurse.

The Day After Tomorrow Otaviano Canuto, Marcelo M. Giugale, 2010-09-27 This book is a vision of how economic policy will evolve in developing countries over the next three-to-five years, delivered by renown practitioners working at the world's leading development institution.

Organising Care in a Time of Covid-19 Justin Waring, Jean-Louis Denis, Anne Reff Pedersen, Tim Tenbensel, 2021-11-08 The COVID-19 pandemic has led to radical transformations in the organisation and delivery of health and care services across the world. In many countries, policy makers have rushed to re-organise care services to meet the surge demand of COVID-19, from re-purposing existing services to creating new 'field' hospitals. Such strategies signal important and sweeping changes in the organisation of both 'COVID' and 'non-COVID' care, whilst asking more fundamental questions about the long-term organisation of care 'after COVID'. In some contexts, the pandemic has exposed the fragilities and vulnerabilities of care systems, whilst in others, it has shown how services are organised to be more resilient and adaptive to unanticipated pressures. The COVID-19 pandemic presents a rare opportunity to examine empirically and to develop new theoretical frameworks on how and why health systems adapt to such unusual and intense pressures. International contributors consider how responses to COVID-19 are transforming the organisation and governance of health and care services and explore questions around strategic leadership at local, regional, national and transnational level. The book offers unique insight and analysis on the dynamics of policy-making, the organisation and governance of care organisations, the role of technologies in governing, the changing role of professionals and the possibilities for more resilient care systems.
