J. G. Ballard

Sports Math Roland B. Minton,2016-11-03 Can you really keep your eye on the ball? How is massive data collection changing sports? Sports science courses are growing in popularity. The author's course at Roanoke College is a mix of physics, physiology, mathematics, and statistics. Many students of both genders find it exciting to think about sports. Sports problems are easy to create and state, even for students who do not live sports 24/7. Sports are part of their culture and knowledge base, and the opportunity to be an expert on some area of sports is invigorating. This should be the primary reason for the growth of mathematics of sports courses: the topic provides intrinsic motivation for students to do their best work. From the Author: The topics covered in Sports Science and Sports Analytics courses vary widely. To use a golfing analogy, writing a book like this is like hitting a drive at a driving range; there are many directions you can go without going out of bounds. At the driving range, I pick out a small target to focus on, and that is what I have done here. I have chosen a sample of topics I find very interesting. Ideally, users of this book will have enough to choose from to suit whichever version of a sports course is being run. The book is very appealing to teach from as well as to learn from. Students seem to have a growing interest in ways to apply traditionally different areas to solve problems. This, coupled with an enthusiasm for sports, makes Dr. Minton's book appealing to me.—Kevin Hutson, Furman University

Moon-face and Other Stories Jack London,1906 JACK LONDON (1876-1916), American novelist, born in San Francisco, the son of an itinerant astrologer and a spiritualist mother. He grew up in poverty, scratching a living in various legal and illegal ways -robbing the oyster beds, working in a canning factory and a jute mill, serving aged 17 as a common sailor, and taking part in the Klondike gold rush of 1897. This various experience provided the material for his works, and made him a socialist. The son of the Wolf (1900), the first of his collections of tales, is based upon life in the Far North, as is the book that brought him recognition, The Call of the Wild (1903), which tells the story of the dog Buck, who, after his master's death, is lured back to the primitive world to lead a wolf pack. Many other tales of struggle, travel, and adventure followed, including The Sea-Wolf (1904), White Fang (1906), South Sea Tales (1911), and Jerry of the South Seas (1917). One of London's most interesting novels is the semi-autobiographical Martin Eden (1909). He also wrote socialist treatises, autobiographical essays, and a good deal of journalism.

J. G. Ballard Jeannette Baxter,2009-02-12 J.G. Ballard is one of the most significant British writers of the contemporary period. His award-winning novels are widely studied and read, yet the appeal of Ballard's idiosyncratic, and often controversial, imagination is such that his work also enjoys something of a cult status with the reading public. The hugely successful cinematic adaptations of *Empire of the Sun* (Spielberg, 1987) and *Crash* (Cronenberg, 1996) further confirm Ballard's unique place within the literary, cultural and popular imaginations. This guide includes new critical perspectives on Ballard's major novels as well as his short stories and journalistic writing covering issues of form, narrative and experimentation. Whilst offering fresh readings of dominant and recurring themes in Ballard's writing, including history, sexuality, violence, consumer capitalism, and urban space,the contributors also explore Ballard's contribution to major contemporary debates including those surrounding post 9/11 politics, terrorism, neo-imperialism, science, morality and ethics.

Memoirs of a Tory Radical Nigel Lawson,2011-10-31 A fully revised and updated edition of Nigel Lawson's extraordinary autobiography. A key minister for a full decade and Chancellor of the Exchequer, from 1983 to 1989, Nigel Lawson was one of the most powerful and effective of Margaret Thatcher's colleagues, and among the chief architects of Thatcherism. This abridged edition of Lord Lawson's memoirs - first published as *The View from No.11* in 1992 and acclaimed as one of the best political memoirs of the period - goes straight to the heart of economic policy-making at a time of crisis and creative change. It explains the workings of government with candour, clarity and depth, against the backdrop of the remarkable story of the rise and fall of his political collaboration with Margaret Thatcher, productive and successful for many years, but ending with his dramatic resignation in October 1989.The book includes a new final chapter reflecting on events from the perspective of 2010, also discussing the crisis in the banking sector and global warming.

The Dare Harley Laroux,2023-10-31 Jessica Martin is not a nice girl. As Prom Queen and Captain of the cheer squad, she'd ruled her school mercilessly, looking down her nose at everyone she deemed unworthy. The most unworthy of them all? The freak, Manson Reed: her favorite victim. But a lot changes after high school. A freak like him never should have ended up at the same Halloween party as her. He never should have been able to beat her at a game of Drink or Dare. He never should have been able to humiliate her in front of everyone. Losing the game means taking the dare: a dare to serve Manson for the entire night as his slave. It's a dare that Jessica's pride - and curiosity - won't allow her to refuse. What ensues is a dark game of pleasure and pain, fear and desire. Is it only a game? Only revenge? Only a dare? Or is it something more? The Dare is an 18+ erotic romance novella and a prequel to the Losers Duet. Reader discretion is strongly advised. This book contains graphic sexual scenes, intense scenes of BDSM, and strong language. A full content note can be found in the front matter of the book.

J.G. Ballard's Surrealist Imagination Jeannette Baxter, 2009 Making the case that J. G. Ballard's fiction must be read within the framework of Surrealism, Jeannette Baxter argues for a radical revisioning of Ballard that takes account of the political and ethical dimensions of his work. A very different portrait of Ballard emerges, one that has implications for our understanding of post-war history and culture, the role of the reader and the function of the written text within a predominantly visual culture.

Neo-historicism Robin Headlam Wells, Glenn Burgess, Rowland Wymer, 2000 Essays on English Renaissance culture make a major contribution to the debate on historical method. For nearly two decades, Renaissance literary scholarship has been dominated by various forms of postmodern criticism which claim to expose the simplistic methodology of 'traditional' criticism and to offer a more sophisticated view of the relation between literature and history; however, this new approach, although making scholars more alert to the political significance of literary texts, has been widely criticised on both methodological and theoretical grounds. The revisionist essays collected in this volume make a major contribution to the modern debate on historical method, approaching Renaissance culture from different gender perspectives and a variety of political standpoints, but all sharing an interest in the interdisciplinary study of the past. ROBIN HEADLAM WELLS is Professor of English, University of Surrey Roehampton; GLENN BURGESS is Professor of History, University of Hull; ROWLAND WYMER is Senior Lecturer in English at the University of Hull. Contributors: GLENN BURGESS, STANLEY STEWART, BLAIR WORDEN, ANDREW GURR, KATHARINE EISAMAN MAUS, ROWLAND WYMER, GRAHAM PARRY, MALCOLM SMUTS, STEVEN ZWICKER, HEATHER DUBROW, ROBIN HEADLAM WELLS.

Applied Ballardianism Simon Sellars, 2018-04-13 An existential odyssey weaving together lived experience and theoretical insight, this startling autobiographical hyperfiction surveys and dissects a world where everything connects and global technological delirium is the norm. The mediascapes of late capitalism reconfigure erotic responses and trigger primal aggression; under constant surveillance, we occupy simulations of ourselves, private estates on a hyperconnected globe; fictions reprogram reality, memories are rewritten by the future... Fleeing the excesses of 1990s cyberculture, a young researcher sets out to systematically analyse the obsessively reiterated themes of a writer who prophesied the disorienting future we now inhabit. The story of his failure is as disturbingly psychotropic as those of his magus—J.G. Ballard, prophet of the post-postmodern, voluptuary of the car crash, surgeon of the pathological virtualities pulsing beneath the surface of reality. Plagued by obsessive fears, defeated by the tedium of academia, yet still certain that everything connects to Ballard, his academic thesis collapses into a series of delirious travelogues, deranged speculations and tormented meditations on time, memory, and loss. Abandoning literary interpretation and renouncing all scholarly distance, he finally accepts the deep assignment that has run throughout his entire life, and embarks on a rogue fieldwork project: Applied Ballardianism, a new discipline and a new ideal for living. Only the darkest impulses, the most morbid obsessions, and the most apocalyptic paranoia can uncover the technological mutations of inner space. An existential odyssey inextricably weaving together lived experience and theoretical insight, this startling autobiographical hyperfiction surveys and dissects a world where everything connects and global technological delirium is the norm—a world become unmistakably Ballardian.

The Trauma Question Roger Luckhurst, 2013-06-17 In this book, Roger Luckhurst both introduces and advances the fields of cultural memory and trauma studies, tracing the ways in which ideas of trauma have become a major element in contemporary Western conceptions of the self. The Trauma Question outlines the origins of the concept of trauma across psychiatric, legal and cultural-political sources from the 1860s to the coining of Post-Traumatic Stress Disorder in 1980. It further explores the nature and extent of 'trauma culture' from 1980 to the present, drawing upon a range of cultural practices from literature, memoirs and confessional journalism through to photography and film. The study covers a diverse range of cultural works, including writers such as Toni Morrison, Stephen King and W. G. Sebald, artists Tracey Emin, Christian Boltanski and Tracey Moffatt, and film-makers David Lynch and Atom Egoyan. The Trauma Question offers a significant and fascinating step forward for those seeking a greater understanding of the controversial and ever-expanding field of trauma research.

Running Wild J. G. Ballard, 2018-07-03 Yet again J. G. Ballard's inimitable clairvoyance is on display in this timely, powerful story of a community shattered by a massive act of violence. A massacre rocks a suburban utopia—thirty-two adults murdered, and their children missing—in *Running Wild*, one of Ballard's most dazzlingly subversive works of fiction. "To Ballard, lack of choice . . . is a dangerous state of being. In *Running Wild*, it's not the children who are doing the running; it is the society that raised them" (San Francisco Chronicle).

Concrete Island J. G. Ballard, 2014-07-15 On a day in April, just after three o'clock in the afternoon, Robert Maitland's car crashes over the concrete parapet of a high-speed highway onto the island below, where he is injured and, finally, trapped. What begins as an almost ludicrous predicament soon turns into horror as Maitland—a wickedly modern Robinson Crusoe—realizes that, despite evidence of other inhabitants, this doomed terrain has become a mirror of his own mind. Seeking the dark outer rim of the everyday, Ballard weaves private catastrophe into an intensely specular allegory in *Concrete Island*.

Differential Equations with MATLAB Mark McKibben, Micah D. Webster, 2014-09-08 A unique textbook for an undergraduate course on mathematical modeling, *Differential Equations with MATLAB: Exploration, Applications, and Theory* provides students with an understanding of the practical and theoretical aspects of mathematical models involving ordinary and partial differential equations (ODEs and PDEs). The text presents a unifying picture inherent to the study and analysis of more than 20 distinct models spanning disciplines such as physics, engineering, and finance. The first part of the book presents systems of linear ODEs. The text develops mathematical models from ten disparate fields, including pharmacokinetics, chemistry, classical mechanics, neural networks, physiology, and electrical circuits. Focusing on linear PDEs, the second part covers PDEs that arise in the mathematical modeling of phenomena in ten other areas, including heat conduction, wave propagation, fluid flow through fissured rocks, pattern formation, and financial mathematics. The authors engage students by posing questions of all types throughout, including verifying details, proving conjectures of actual results, analyzing broad strokes that occur within the development of the theory, and applying the theory to specific models. The authors' accessible style encourages students to actively work through the material and answer these questions. In addition, the extensive use of MATLAB® GUIs allows students to discover patterns and make conjectures.
