**Advances in Computer Games** Mark H.M. Winands,H. Jaap van den Herik,Walter A. Kusters,2017-12-21 This book constitutes the refereed conference proceedings of the 15th International Conference, ACG 2017, held in Leiden, The Netherlands, in July 2017.The 19 revised full papers were selected from 23 submissions and cover a wide range of computer games. They are grouped in four classes according to the order of publication: games and puzzles, go and chess, machine learning and MCTS, and gaming.

*The Armenian Massacres in Ottoman Turkey* Guenter Lewy,2005-11-30 Avoiding the sterile was-it-genocide-or-not debate, this book will open a new chapter in this contentious controversy and may help achieve a long-overdue reconciliation of Armenians and Turks.

Effects-based Approaches to Operations Canada. Department of National Defence,2008 Distributed by the Government of Canada Depository Services Program.

**Team Geek** Brian W. Fitzpatrick,Ben Collins-Sussman,2012-07-06 In a perfect world, software engineers who produce the best code are the most successful. But in our perfectly messy world, success also depends on how you work with people to get your job done. In this highly entertaining book, Brian Fitzpatrick and Ben Collins-Sussman cover basic patterns and anti-patterns for working with other people, teams, and users while trying to develop software. This is valuable information from two respected software engineers whose popular series of talks—including Working with Poisonous People—has attracted hundreds of thousands of followers. Writing software is a team sport, and human factors have as much influence on the outcome as technical factors. Even if you’ve spent decades learning the technical side of programming, this book teaches you about the often-overlooked human component. By learning to collaborate and investing in the soft skills of software engineering, you can have a much greater impact for the same amount of effort. Team Geek was named as a Finalist in the 2013 Jolt Awards from Dr. Dobbs's Journal. The publication's panel of judges chose five notable books, published during a 12-month period ending June 30, that every serious programmer should read.

*Reconfigurations* Stefanie Knauss,Alexander D. Ornella,2007 From Once Upon a Time in the West to Moulin Rouge, from Ghanaian video-movies to Japanese Manga, from Christian symbolism in advertising to the mythic significance of female messiah figures, from the relationship of the arts and theology to the role of the audience in the meaningmaking process, the book provides a feast for anyone wanting to explore the interconnectivity of religion, media and society -Robert Johnston, Fuller Theological Seminary

China's Belt and Road Vision S. Mahmud Ali,2020-01-23 This book examines the evolution and major elements of China's Belt-and-Road Initiative (BRI), a trillion-dollar project for the revival and refinement of ancient terrestrial and maritime trade routes. The author analyses the foreign policy and economic strategy behind the initiative as well as the geoeconomic and geopolitical impact on the region. Furthermore, he assesses whether the BRI has to be considered as a challenge to the US-led order, leading to a Sinocentric order in the 21st century. Offering two case studies on the China-Pakistan Economic Corridor (CPEC) and the 21st Century Maritime Silk Road (MSR), the book reveals the drivers motivating China and its partners in executing BRI projects, such as security of commodity-shipments, energy supplies, and explores trade volumes as well as the anxiety these trigger among critics. The book juxtaposes these to non-Chinese, specifically multilateral institutional and Western corporate, inputs into Beijing's developmental planning-processes. It also identifies the role of combined Chinese-foreign stimuli in generating the policy priorities precipitating the BRI vision, and the geoeconomic essence of BRI's implementation.

**World Social Science Report 2010** United Nations Educational, Scientific and Cultural Organization,2010-01-01 Social science from Western countries continues to have the greatest global influence, but the field is expanding rapidly in Asia and Latin America, particularly in China and Brazil. In sub-Saharan Africa, social scientists from South Africa, Nigeria and Kenya produce 75% of academic publications. In South Asia, barring some centres of excellence in India, social sciences as a whole have low priority. These are a few of the findings from World Social Science Report, 2010: Knowledge divides. Produced by the International Social Science Council (ISSC) and co-published with UNESCO, the Report is the first comprehensive overview of the field in over a decade. Hundreds of social scientists from around the world contributed their expertise to the publication. Gudmund Hernes, President of the ISSC, Adebayo Olukoshi, Director of the United Nations African Institute for Economic Development and Planning (IDEP), Hebe Vessuri, Director, Venezuelan Institute for Scientific Research (IVIC), and François Héran, Director of Research, National Institute for Demographic Studies (INED), France, are among the experts who presented the Report during its official launch at UNESCO Headquarters in Paris on 25 June 2010.

*Route 66* Michael Wallis,1990 Tells the story of the legendary road, Route 66, begun in the early 1920s that covered 2400 miles from Chicago to Los Angeles.

*Environmental Crime and Social Conflict* Avi Brisman,Nigel South,Rob White,2016-03-09 This impressive collection of original essays explores the relationship between social conflict and the environment - a topic that has received little attention within criminology. The chapters provide a systematic and comprehensive introduction and overview of conflict situations stemming from human exploitation of environments, as well as the impact of social conflicts on the wellbeing and health of specific species and ecosystems. Largely informed by green criminology perspectives, the chapters in the book are intended to stimulate new understandings of the relationships between humans and nature through critical evaluation of environmental destruction and degradation associated with social conflicts occurring around the world. With a goal of creating a typology of environment-social conflict relationships useful for green criminological research, this study is essential reading for scholars and academics in criminology, as well as those interested in crime, law and justice.

Riding the Innovation Wave John Bessant,2017-11-17 This book draws on a detailed history of a large German company (HELLA ), now active in over 35 countries, employing 4,000 people and with a sales turnover of around
