Building digital safety for journalism Henrichsen, Jennifer R.,Betz, Michelle,Lisosky, Joanne M.,2015-03-30 In order to improve global understanding of emerging safety threats linked to digital developments, UNESCO commissioned this research within the Organization's on-going efforts to implement the UN Inter-Agency Plan on the Safety of Journalists and the Issue of Impunity, spearheaded by UNESCO. The UN Plan was born in UNESCO's International Programme for the Development of Communication (IPDC), which concentrates much of its work on promoting safety for journalists.

The Extreme Right in Europe Uwe Backes,Patrick Moreau,2011-12-07 The present work deals not only with the well-organized right extremism in modern Europe as well as with its function in proper political parties, but equally includes two additional, broader approaches: the militant branches and subcultures that exist, including some paramilitary phenomena in Eastern Europe; and the broad realm of their political ideas and cultural trends and the influence they exert on European political culture.

**Ancient Graffiti in Context** Jennifer Baird,Claire Taylor,2010-10-18 Graffiti are ubiquitous within the ancient world, but remain underexploited as a form of archaeological or historical evidence. They include a great variety of texts and images written or drawn inside and outside buildings, in public and private places, on monuments in the city, on objects used in daily life, and on mountains in the countryside. In each case they can be seen as

actively engaging with their environment in a variety of ways. *Ancient Graffiti in Context* interrogates this cultural phenomenon and by doing so, brings it into the mainstream of ancient history and archaeology. Focusing on different approaches to and interpretations of graffiti from a variety of sites and chronological contexts, Baird and Taylor pose a series of questions not previously asked of this evidence, such as: What are graffiti, and how can we interpret them? In what ways, and with whom, do graffiti communicate? To what extent do graffiti represent or subvert the cultural values of the society in which they occur? By comparing themes across time and space, and viewing graffiti in context, this book provides a series of interpretative strategies for scholars and students of the ancient world. As such it will be essential reading for Classical archaeologists and historians alike.

*Gender and Christianity in Medieval Europe* Lisa M. Bitel,Felice Lifshitz,2013-03-26 In *Gender and Christianity in Medieval Europe*, six historians explore how medieval people professed Christianity, how they performed gender, and how the two coincided. Many of the daily religious decisions people made were influenced by gender roles, the authors contend. Women's pious donations, for instance, were limited by laws of inheritance

and marriage customs; male clerics' behavior depended upon their understanding of masculinity as much as on the demands of liturgy. The job of religious practitioner, whether as a nun, monk, priest, bishop, or some less formal participant, involved not only professing a set of religious ideals but also professing gender in both ideal and practical terms. The authors also argue that medieval Europeans chose how to be women or men (or some complex combination of the two), just as they decided whether and how to be religious. In this sense, religious institutions freed men and women from some of the gendered limits otherwise imposed by society. Whereas previous scholarship has tended to focus exclusively either on masculinity or on aristocratic women, the authors define their topic to study gender in a fuller and more richly nuanced fashion. Likewise, their essays strive for a generous definition of religious history, which has too often been a history of its most visible participants and dominant discourses. In stepping back from received assumptions about religion, gender, and history and by considering what the terms woman, man, and religious truly mean for historians, the book ultimately enhances our understanding of the gendered implications of every pious thought and ritual gesture of medieval Christians. Pirates of Pensacola Keith Thomson, 2005-04 The Cooke and Hood families have been at each other's throats since the Spanish Main days. The latest chapter in their piratic rivalry takes place in 2004, when an old treasure map turns up. None of this seems to matter to Morgan Cooke, a cowardly, landlubbing accountant entirely ignorant of his heritage until his estranged father, Isaac, in need of crewmen, kidnaps him and thrusts him into the fray. When Morgan wakes up on a boat in the middle of the Caribbean, he learns that piracy still flourishes, albeit with far more discretion than in the old days--pirates disguise their fast boats as shrimpers or tugs--but with no less bloodshed. Judging even a shot at riches vastly preferable to a return to his lonely, fluorescent-lit work station existence, Morgan pierces his ear, dons the eye patch and peg leg, and set sail for glorious adventure.

*Team Geek* Brian W. Fitzpatrick, Ben Collins-Sussman, 2012-07-06 In a perfect world, software engineers who produce the best code are the most successful. But in our perfectly messy world, success also depends on how you work with people to get your job done. In this highly entertaining book, Brian Fitzpatrick and Ben Collins-Sussman cover basic patterns and anti-patterns for working with other people, teams, and users while trying to develop

software. This is valuable information from two respected software engineers whose popular series of talks—including Working with Poisonous People—has attracted hundreds of thousands of followers. Writing software is a team sport, and human factors have as much influence on the outcome as technical factors. Even if you've spent decades learning the technical side of programming, this book teaches you about the often-overlooked human component. By learning to collaborate and investing in the soft skills of software engineering, you can have a much greater impact for the same amount of effort. Team Geek was named as a Finalist in the 2013 Jolt Awards from Dr. Dobb's Journal. The publication's panel of judges chose five notable books, published during a 12-month period ending June 30, that every serious programmer should read.

*120 Banned Books* Nicholas J. Karolides, Margaret Bald, Dawn B. Sova, 2022 From the Bible to The Hate U Give: a completely updated look at the history of censorship in world literature. Throughout history, nations, peoples, and governments have censored writers and their works on political, religious, sexual, and social grounds. Although the literary merit of the majority of these books has been proven time and time again, censorship efforts are still in place today. From Animal Farm to The Grapes of Wrath, The Koran to The Talmud, Beloved to the Harry Potter series, The Canterbury Tales to Catch-22, this revised edition examines the many struggles these books faced in order to be read--

## How to Pass OSCP Series: Windows Privilege Escalation Step-By-Step Guide

Alan Wang, 2020-11-13 This book is the first of a series of How To Pass OSCP books and focus on techniques used in Windows Privilege Escalation. This is a step-by-step guide that walks you through the whole process of how to escalate privilege in Windows environment using many common techniques. We start by gathering as much information about the target as possible either manually or using automated scripts. Next, we search for misconfigured services or scheduled tasks, insufficient file permission on binaries or services, vulnerable kernel, vulnerable software running with high privileges, sensitive information stored on local files, credential saved in the memory, registry settings that always elevate privileges before executing a binary, hard-coded credential contained in the application configuration files, and many more.

*Rape and Sexual Assault* White House Council on Women and Girls, 2014-10-31  
This book analyzes the most recent, reliable data about rape and sexual assault in our country. It identifies those most at risk of being victims of these crimes, examines the cost of this violence (both to survivors and our communities), and describes the response, too often inadequate, of the criminal justice system. The report catalogues steps this Administration has taken to combat rape and sexual assault, and identifies areas for further action. An overview of the problem: Women and girls are the vast majority of victims: nearly 1 in 5 women - or nearly 22 million - have been raped in their lifetimes. Men and boys, however, are also at risk: 1 in 71 men - or almost 1.6 million - have been raped during their lives. Women of all races are targeted, but some are more vulnerable than others: 33.5% of multiracial women have been raped, as have 27% of American Indian and Alaska Native women, compared to 15% of Hispanic, 22% of Black, and 19% of White women. Most victims know their assailants. The vast majority (nearly 98%) of perpetrators are male. Young people are especially at risk: nearly half of female survivors were raped before they were 18, and over one-quarter of male

survivors were raped before they were 10. College students are particularly vulnerable: 1 in 5 women has been sexually assaulted while in college. Repeat female victimization is common: over a third of women who were raped as minors were also raped as adults. Other populations are also at higher risk of being raped or sexually assaulted, including people with disabilities, the LGBT community, prison inmates (of both genders), and the homeless. Undocumented immigrants face unique challenges, because their abusers often threaten to have them deported if they try to get help.
