Think Bayes Allen B. Downey,2021-05-18 If you know how to program, you're ready to tackle Bayesian statistics. With this book, you'll learn how to solve statistical problems with Python code instead of mathematical formulas, using discrete probability distributions rather than continuous mathematics. Once you get the math out of the way, the Bayesian fundamentals will become clearer and you'll begin to apply these techniques to real-world problems. Bayesian statistical methods are becoming more common and more important, but there aren't many resources available to help

beginners. Based on undergraduate classes taught by author Allen B. Downey, this book's computational approach helps you get a solid start. Use your programming skills to learn and understand Bayesian statistics Work with problems involving estimation, prediction, decision analysis, evidence, and Bayesian hypothesis testing Get started with simple examples, using coins, dice, and a bowl of cookies Learn computational methods for solving real-world problems

Immigration Policy and the Terrorist Threat in Canada and the United States A. Alexander Moens, Martin Collacott, 2008

In June 2007, the Fraser Institute held a conference in Toronto, Ontario, titled, Immigration Policy, Border Controls, and the Terrorist Threat In Canada and the United States. The chapters in this volume, which arose from this conference, raise fundamental questions

about weaknesses in Canada's current immigration policies and procedures. The contributors to this volume identify serious threats and weaknesses in the immigration, asylum, and border regimes from both Canadian and American perspectives. The authors are not opposed to effectively managed immigration or allowing genuine refugees who pose no security threat to enter the country through a well-vetted system. All believe that the vast majority of immigrants pose no danger, but are simply seeking to improve their freedom and prosperity. Nevertheless given the stakes raised by terrorist attacks, the entry of even a small number of potentially dangerous individuals should warrant major attention and policy review.--BOOK JACKET.

Perl & LWP Sean M. Burke,2002-06-20 Perl soared to popularity as a language for creating and

managing web content, but with LWP (Library for WWW in Perl), Perl is equally adept at consuming information on the Web. LWP is a suite of modules for fetching and processing web pages. The Web is a vast data source that contains everything from stock prices to movie credits, and with LWP all that data is just a few lines of code away. Anything you do on the Web, whether it's buying or selling, reading or writing, uploading or downloading, news to e-commerce, can be controlled with Perl and LWP. You can automate Web-based purchase orders as easily as you can set up a program to download MP3 files from a web site.

Perl & LWP covers:

- Understanding LWP and its design
- Fetching and analyzing URLs
- Extracting information from HTML using regular expressions and tokens
- Working with the structure of HTML documents using trees
- Setting and inspecting HTTP headers and response codes
- Managing cookies
- Accessing information that requires authentication
- Extracting links
- Cooperating with proxy caches
- Writing web spiders (also known as robots) in a safe fashion

Perl & LWP includes many step-by-step examples that show how to apply the various techniques. Programs to extract information from the web sites of BBC News, Altavista, ABEBooks.com, and the Weather

Underground, to name just a few, are explained in detail, so that you understand how and why they work. Perl programmers who want to automate and mine the web can pick up this book and be immediately productive. Written by a contributor to LWP, and with a foreword by one of LWP's creators, Perl & LWP is the authoritative guide to this powerful and popular toolkit.

Advances in Database Technology - EDBT 2004 Elisa Bertino, Stavros Christodoulakis, Dimitris Plexousakis, Christophides Vassilis, Manolis Koubarakis, Klemens Böhm, Elena Ferrari, 2004-02-12 The 9th International Conference on Extending Database Technology, EDBT 2004, was held in Heraklion, Crete, Greece, during March 14–18, 2004. The EDBT series of conferences is an established and prestigious forum for the exchange of the latest research results in data management. Held every two years in an attractive European location, the conference provides unique opportunities for database researchers, practitioners, developers, and users to explore new ideas, techniques, and tools, and to exchange experiences. The previous events were held in Venice, Vienna, Cambridge, Avignon, Valencia, Konstanz, and Prague. EDBT 2004 had the theme “new challenges for database

technology,” with the goal of encouraging researchers to take a greater interest in the current exciting technological and application advancements and to devise and address new research and development directions for database technology. From its early days, database technology has been challenged and advanced by new uses and applications, and it continues to evolve along with application requirements and hardware advances. Today’s DBMS technology faces yet several new challenges. Technological trends and new computation paradigms, and applications such as pervasive and ubiquitous computing, grid computing, bioinformatics, trust management, virtual communities, and digital asset management, to name just a few, require database technology to be deployed in a variety of environments and for a number of different purposes. Such an extensive deployment will also require trustworthy, resilient database systems, as well as easy-to-manage and flexible ones, to which we can entrust our data in whatever form they are.

International marketing and trade of quality food products Alessandra Castellini,Erika Pignatti,Roberta Spadoni,Maurizio Canavari,Nicola Cantore,2023-09-04 Due to increased purchasing power of certain consumer segments all over the world and the related growing demand for food specialties for differentiated goods in the international markets, agri-food trade and marketing is no longer focused on commodities only. Key concepts of 'Marketing', 'International Trade' and 'Quality' are

taking the forefront in the scientific debate among agricultural economists dealing with agricultural and food products markets. The need for scientific knowledge about several aspects of marketing for quality food products is growing. The aim of this book is to link these key concepts together and consider connections, overlaps, contradictions and complementarities between them. This book contains peer-reviewed articles covering a range of studies on international marketing and trade for quality food products and is edited with the support of the BEAN-QUORUM project, funded by the European Union's Asia Link Programme. The topics covered by the studies range from geographical indications to organic food; from fair trade to functional food; from knowledge about quality requirements to the impact of the quest for quality. The geographical scope of the studies is broad and the perspectives vary including the consumer, the producer and the supply chain side. The focal interest of the studies also range from competitiveness, to policy, to potential demand. The book is of interest to researchers and practitioners in international food networks of all types.

Social Transformations Of The Victorian Age T.H.S. Escott,1897

Parks, Recreation, and Open Space Alexander Garvin, 2000 What, exactly, is a park? What role have parks played in cities, and what will they need to be in the new economics and society of 21st century America? To answer these questions, noted planner and planning educator Alexander Garvin first describes the parks agenda of Frederick Law Olmsted, which dominated the design of American parks for over a century, until the last 50 years of suburbanization so radically changed the nation's landscape and society. Parks and open space, once thought of as essential to public life and an important government responsibility, are now often regarded as amenities that can be done without. In order to develop a new agenda that fits the economics, needs, and expectations of Americans in this century, Garvin studied the details of successful parks and open space projects throughout the country. He distilled a set of principles to guide the actions of public and private leaders in all aspects of park, recreation, and open space development. His ideas--many of which challenge existing practices and conventional wisdom--fit new times and circumstances in America. This beautiful report is extensively illustrated with plan drawings and the author's own color photographs of parks across

America. Parks, Recreation, and Open Space was sponsored in part by the City Parks Forum (CPF), a fellowship of mayors, their park advisors, and community leaders that encourages collaboration and exchange of ideas about the role of parks in communities. The CPF is administered by the American Planning Association and supported in part by the Wallace-Reader's Digest Funds and the Doris Duke Charitable Foundation. It is the first in a series of three reports by the City Parks Forum. The second report is Parks and Economic Development (PAS 502) by John L. Crompton.

Lost Boys James Garbarino, 2000-08-15 Remarkable. What sets *Lost Boys* apart from the ordinary lament is the author's palpable sense of care and compassion.--The Washington Post Book World Our national consciousness has been altered by haunting images of mass slaughters in American high schools, carried out by troubled young boys with guns. It's now clear that no matter where we live or how hard we try as parents, our children are likely to be going to school with boys who are capable of getting guns and pulling triggers. What has caused teen violence to spread from the urban war-zones of large cities right into the country's heartland? And what can we do to stop this terrifying trend? James Garbarino, Ph.D., Cornell University professor and nationally noted psychologist, insists that there are things that we, both as individuals and as a society, can do. In a richly anecdotal style he outlines warning signs that parents and teachers can recognize, and suggests steps that can be taken

to turn angry and unhappy boys away from violent action. Full of insight, vivid individual portraits, practical advice and considered hope, this is one of the most important and original books ever written about boys.
