### **Rethinking Youth Citizenship After the Age of Entitlement**

Lucas Walsh,Rosalyn Black,2018-03-22 Rethinking Youth Citizenship After the Age of Entitlement provides a primer for exploring hard questions about how young people understand, experience and enact their citizenship in uncertain times and about their senses of membership and belonging. It examines how familiar modes of exclusion are compounded by punitive youth policies in ways that are concealed by neoliberal discourses. It considers the role of key institutions in constructing young people's citizenship and looks at the ways in which some young people are opting out of established enactments of citizenship while creating new ones. Critically reflecting on recent scholarly interest in the geographical, relational, affective and temporal dimensions of young people's experiences of citizenship, it also reinvigorates the discussion about citizenship rights and entitlements, and what these might mean for young people. The book draws on global research and theories of citizenship but has a particular focus on Australia, which provides a unique example of a country that has fared well economically yet is mimicking the austerity measures of the United Kingdom and Europe. It concludes with an argument for a rethinking of citizenship which recognises young people's rights as citizens and the ways in which these interact

with their lived experience at a time that has been characterised as 'the end of the age of entitlement'.

Entrepreneurship Heidi M. Neck,Christopher P. Neck,Emma L. Murray,2016-11-30 From Heidi Neck, one of the most influential thinkers in entrepreneurship education today, Chris Neck, an award-winning professor, and Emma Murray, business consultant and author, comes this ground-breaking new text. *Entrepreneurship: The Practice and Mindset* catapults students beyond the classroom by helping them develop an entrepreneurial mindset so they can create opportunities and take action in uncertain environments. Based on the world-renowned Babson Entrepreneurship program, this new text emphasizes practice and learning through action. Students learn entrepreneurship by taking small actions and interacting with stakeholders in order to get feedback, experiment, and move ideas forward. Students walk away from this text with the entrepreneurial mindset, skillset, and toolset that can be applied to startups as well as organizations of all kinds. Whether your students have backgrounds in business, liberal arts, engineering, or the sciences, this text will take them on a transformative journey.

**It IS About Islam** Glenn Beck,2015-08-18 Glenn Beck, the New York Times bestselling author of *The Great Reset*, exposes the real truth behind the roots of Islamic extremism in Muslim teachings in this sharply insightful handbook that debunks commonly held assumptions about Islam and the dream of a renewed caliphate. From

the barbarians of ISIS to the terror tactics of Al-Qaeda and its offshoots, to the impending threat of a nuclear Iran, those motivated by extreme fundamentalist Islamic faith have the power to endanger and kill millions. The conflict with them will not end until we face the truth about those who find their inspiration and justification in the religion itself. Drawing on quotes from the Koran and the hadith, as well as from leaders of ISIS, Al Qaeda, and the Muslim Brotherhood, Glenn Beck seeks to expose the true origins of Islamic extremism as well as the deadly theological motivations behind these agencies of destruction. Using the same unique no-holds-barred style from his bestselling books *Control and Conform*, Glenn Beck offers straight facts and history about the fundamental beliefs that inspire so many to kill.

*The Abolition of Woman* Fiorella Nash, 2018 For the great majority on both sides of the abortion debate, the idea of a pro-life feminist is the ultimate contradiction in terms. Abortion has become so central to feminist thinking that women who affirm their belief in both women's empowerment and the inalienable right to life can find themselves viewed with suspicion and hostility from both sides. Yet the author of this book is indeed a pro-life feminist, and her insightful analysis of contemporary issues can provide the basis for common ground between those defending human rights. This book unashamedly calls mainstream feminists, journalists and Western politicians to account for their silence and – in some cases – vocal justification of the persecution of women because of an absolutist loyalty to abortion. It asks uncomfortable questions to those who claim to believe in women's empowerment: Where is their passionate outrage when Chinese women are forcibly aborted and sterilised? Where is their concern for the thousands of baby girls killed by abortion every year because their lives are held as worthless simply

for being female? What about the thousands of women used as surrogates for wealthy Western couples, treated as chattels and denied their most basic human rights? But the book also tackles difficult issues for the pro-life side—the need for a sensitive, realistic approach to problematic pregnancies and the importance of confronting the continued exploitation and abuse of women within a sexualised society. Pro-life feminism is not only possible; it is vital if the complex struggles facing women are to be adequately met. The Abolition of Woman is a rallying cry to feminists to stand with the pro-life movement, fighting to build a society in which women are equal and every human life is protected.

Innovation and Entrepreneurship John R. Bessant,Joe Tidd,2015-06-08 Innovation and Entrepreneurship 3rd Edition is an accessible text on innovation and entrepreneurship aimed specifically at undergraduate students studying business and management studies, but also those on engineering and science degrees with management courses. The text applies key theories and research on innovation and entrepreneurship and then reviews and synthesises those theories and research to apply them in a much broader and contemporary context, including the corporate and public services, emerging technologies and economies, and sustainability and development and creating and capturing value from innovation and entrepreneurship. In this third edition the authors continue to adopt an explicit process model to help organise the material with clear links between innovation and

entrepreneurship. This text has been designed to be fully integrated with the Innovation Portal at [www.innovation-portal.info](http://www.innovation-portal.info), which contains an extensive collection of additional resources for both lecturers and students, including teaching resources, case studies, media clips, innovation tools, seminar and assessment activities and test questions.

*No Path Home* Elizabeth Cullen Dunn, 2018-01-15 For more than 60 million displaced people around the world, humanitarian aid has become a chronic condition. *No Path Home* describes its symptoms in detail. Elizabeth Cullen Dunn shows how war creates a deeply damaged world in which the structures that allow people to occupy social roles, constitute economic value, preserve bodily integrity, and engage in meaningful daily practice have been blown apart. After the Georgian war with Russia in 2008, Dunn spent sixteen months immersed in the everyday lives of the 28,000 people placed in thirty-six resettlement camps by official and nongovernmental organizations acting in concert with the Georgian government. She reached the conclusion that the humanitarian condition poses a survival problem that is not only biological but also existential. In *No Path Home*, she paints a moving picture of the ways in which humanitarianism leaves displaced people in limbo, neither in a state of emergency nor able to act as normal citizens in the country where they reside.

*Fundamentals of 6G Communications and Networking* Xingqin Lin, Jun Zhang, Yuanwei Liu, Joongheon Kim, 2024-01-12 This book begins with a historical overview of the evolution of mobile technologies and addresses two key questions: why do we need 6G? and what will 6G be? The remaining chapters of this book are organized into three parts: Part I covers the foundation of an end-to-end 6G system by presenting 6G vision, driving forces, key

performance indicators, and societal requirements on digital inclusion, sustainability, and intelligence. Part II presents key radio technology components for the 6G communications to deliver extreme performance, including new radio access technologies at high frequencies, joint communications and sensing, AI-driven air interface, among others. Part III describes key enablers for intelligent 6G networking, including network disaggregation, edge computing, data-driven management and orchestration, network security and trustworthiness, among others. This book is relevant to researchers, professionals, and academics working in 5G/6G and beyond.

**Risky Business in China** J. Gordon, 2014-08-29 Risk is a major reason that companies fail in, or fail to enter, China. Packed with case studies, this unique book demonstrates how correctly applied due diligence can not only reduce business risk in China, but also provide excellent business intelligence to support negotiations and business relationships.

*Transferred Illusions* Marilyn Deegan, Kathryn Sutherland, 2016-02-24 This is a study of the forms and institutions of print - newspapers, books, scholarly editions, publishing, libraries - as they relate to and are changed by emergent digital forms and institutions. In the early 1990s hypertext was briefly hailed as a liberating writing tool for non-linear creation. Fast forward no more than a decade, and we are reading old books from screens. It is, however, the newspaper, for around two hundred years print's most powerful mass vehicle, whose economy persuasively shapes its electronic remediation through huge digitization initiatives, dominated by a handful of centralizing service providers, funded and wrapped round by online advertising. The error is to assume a culture of total replacement. The Internet is just another information space,

sharing characteristics that have always defined such spaces - wonderfully effective and unstable, loaded with valuable resources and misinformation; that is, both good and bad. This is why it is important that writers, critics, publishers and librarians - in modern parlance, the knowledge providers - be critically engaged in shaping and regulating cyberspace, and not merely the passive instruments or unreflecting users of the digital tools in our hands.

Knowledge Management in Electronic Government Maria A. Wimmer, 2003-08-03 The importance of Knowledge Management (KM) is increasingly recognized in business and public sector domains. The latter is particularly suitable for KM implementations since it deals with information and knowledge resources at a large scale: much of the work of public authorities deals with the elaboration of data, information and knowledge on citizens, businesses, society, markets, the environment, law, politics, etc. Even most products of public administration and government work are delivered in the shape of information and knowledge themselves. This especially applies to policies, management, and the regulation and monitoring of society, markets and the environment. Governments expect advanced support from KM concepts and tools to exploit these huge knowledge and information resources in an efficient way. Not only does the trend towards a knowledge society call for KM solutions, but current e government developments also significantly influence the public sector. Ample access to remote information and knowledge resources is needed in order to facilitate: Citizen and businesses oriented service delivery, including one stop service provision; interorganizational co operation between governmental agencies; cross border support for complex administrative decision making; e government integration of dislocated information and knowledge sources into a fabric of global

virtual knowledge.

**Creating European Citizens** Willem Maas, 2007-02-03 Exploring a key aspect of European integration, this clear and thoughtful book considers the remarkable experiment with common rights and citizenship in the EU. Explaining this innovation—why states cede their sovereignty and eradicate or redefine the boundaries of the political community by including foreigners—Willem Maas analyzes the development of European citizenship within the larger context of the evolution of rights. More than simply a free trade market, the goal of building a community among peoples—creating European citizens—has informed European integration since its origins. The author argues that its success or failure will not only determine the future of Europe but provide lessons for political integration elsewhere.

**When Good Companies Go Bad** Donald W. Beachler, Thomas Shevory, 2014-09-09 Covering the entire world of business from heavy industry to the financial houses of Wall Street, this book shines a spotlight on 100 of the most infamous cases of misconduct and malfeasance in corporate history. Corporations are in the business of making money. But when companies forget ethics, take operational shortcuts, or willingly endanger customers and the general public in their quest for profits, disasters of enormous magnitude can result. This book examines 100 of the worst cases of corporate greed and irresponsibility and poses the questions: Is it necessary or desirable to conduct business in this manner? Do the penalties and other punishments levied against these companies go far enough? And what is the government's responsibility for keeping corporate misdeeds in check? Coauthored by distinguished public policy experts, *When Good Companies Go Bad: 100 Corporate Miscalculations and Misdeeds*

presents a representative sample of cases on a variety of topics, such as the financial sector, health care, environmental protection, product liability, and copyright. This broad introduction to the dark side of the corporate world focuses on events and scandals that resulted in substantial financial penalties, regulatory actions, or criminal convictions. The cases are presented in a readable and engaging format, making the book an illuminating and informative read for high school and college students as well as businesspeople, lawyers, journalists, and professors who teach American politics, public law, or public policy.

*Working Towards Sustainable Development* International Labour Office, 2012 A green economy is necessary if sustainable development is to be realised. However, as this report emphasizes, a green economy can also, if accompanied by the right policy mix, create more and better jobs, lift people out of poverty and promote social inclusion. In fact, the growth model of the past few decades has been inefficient, not only economically, but also from environmental, employment and social perspectives. It overuses natural resources, is environmentally unsustainable and has failed to meet the aspirations of a large proportion of society seeking productive, decent work and dignified lives. A new development model - one which puts people, fairness and the planet at the core of policy-making - is urgently needed, and is eminently achievable. More fundamentally, this report demonstrates that employment and social inclusion must be integral parts of any sustainable development strategy and must be included in policies that address climate change and ensure the preservation of the environment. In particular, the report assesses the sectoral, employment and income implications of the transition to a green economy. It highlights the necessary conditions, policy prescriptions

and good practices required to ensure that the green economy is characterized by gains in job quality, reductions in poverty and improvements in social inclusion.
