Names and Naming Guy Puzey, Laura Kostanski, 2016-02-02 This book explores international trends in naming and contributes to the growing field of onomastic enquiry. Naming practices are viewed here through a critical lens, demonstrating a high level of political and social engagement in relation to how we name people and places. The contributors to this publication examine why names are not only symbols of a person or place, but also manifestations of cultural, linguistic and social heritage in their own right. Presenting analyses of geographically and culturally diverse perspectives and case studies, the book investigates how names can represent deeper kinds of identity, act as objects of attachment and dependence, and reflect community mores and social customs while functioning as powerful mechanisms of inclusion and exclusion. The book will be of interest to researchers in onomastics, sociology, human geography, linguistics and history.

Subversive Archaism Michael Herzfeld, 2021-10-11 In *Subversive Archaism*, Michael Herzfeld explores how individuals and communities living at the margins of the modern nation-state use nationalist discourses of tradition to challenge state authority under both democratic and authoritarian governments. Through close attention to the claims and experiences of mountain shepherds in Greece and urban slum dwellers in Thailand, Herzfeld shows how these subversive archaists draw on national histories and past politics to claim legitimacy for their defiance of bureaucratic authority. Although vilified by government authorities as remote, primitive, or dangerous--often as preemptive justification for violent repression--these groups are not revolutionaries and do not reject national identity, but they do question the equation of state and nation. Herzfeld explores the political strengths and vulnerabilities of their deployment of heritage and the weaknesses they expose in the bureaucratic and ethnonational state in an era of accelerated globalization.
