MySQL and JSP Web Applications James Turner,2002 JSP developers encounter unique problems when building web applications that require intense database connectivity. MySQL and JSP Web Applications addresses the challenges of building data-driven applications based on the JavaServer Pages development model. MySQL and JSP Web Applications begins with an overview of the core technologies required for JSP database development--JavaServer Pages, JDBC, and the database schema. The book then outlines and presents an Internet commerce application that demonstrates concepts such as receiving and processing user input, designing and implementing business rules, and balancing the user load on the server. Through the JDBC (Java DataBase Connector), the developer can communicate with most commercial databases, such as Oracle. The solutions presented in MySQL and JSP Web Applications center on the open source tools MySQL and Tomcat, allowing the reader an affordable way to test applications and experiment with the book's examples.

Keeping it in the Family John R. Baker,Matt Lobley,Ian Whitehead,2016-04-22 As the largest group of natural resource managers on the planet, farmers are at the interface of the changing relationship between humans and the environment. Typically organised around what might be considered the most basic of social units, for generations the family farm has survived wide-ranging exogenous challenges, frequently preserving the line of succession to the next of kin. Now as we face major questions about how we use land and the impact of our land use on the global environment, farming once again faces a challenging and uncertain future. This book draws on the experiences of farmers in Australia, New Zealand, North America, Japan and the EU to examine the special features of family farms and, in particular, the tradition of succession which has enabled them to continue to have such a strong presence in the world today.

NGO Accountability Lisa Jordan,Peter van Tuijl,2012-05-04 As the fastest growing segment of civil society, as well as featuring prominently in the global political arena, NGOs are under fire for being 'unaccountable'. But who do NGOs actually represent? Who should they be accountable to and how? This book provides the first comprehensive examination of the issues and politics of NGO accountability across all sectors and internationally. It offers an assessment of the key technical tools available including legal accountability, certification and donor-based accountability regimes, and questions whether these are appropriate and viable options or attempts to 'roll-back' NGOs to a more one-dimensional function as organizers of national and global charity. Input and case studies are provided from NGOs such as ActionAid, and from every part of the globe including China, Indonesia and Uganda. In the spirit of moving towards greater accountability the book looks in detail at innovations that have developed from within NGOs and offers new approaches and flexible frameworks that enable accountability to become a reality for all parties worldwide.

Globalization and Transformations of Local Socioeconomic Practices Ulrike Schuerkens,2008-04-18 This innovative volume provides a comprehensive overview of the transformation of socio-economic practices in the global economy. The contributors offer analytical and comparative insights at the world level, with regard to the current socio-economic practices as well as an assessment of the overall economic globalization phenomenon in the global world. Through empirical case studies of different civilizations or cultures that describe situations of intertwining of local socio-economic practices and global economic modernity, this volume assesses the overall situation in the world, looking at the world as an economic system where some countries act as winners, others as losers and some as both winners and losers of economic globalization. This exceptional book will appeal to sociologists, social and cultural anthropologists, and economists interested in development.

International IDEA Handbook on Democracy Assessment Iain Kearton,Sarah Bracking,Stuart Weir,David Beetham,2021-11-15 The International IDEA Handbook on Democracy Assessment is a robust and

sensitive guide to assessing the quality of democracy and human rights in any country around the world. The Handbook introduces an easy-to-use and universal methodology for assessing the condition of democracy in any country, or its progress in democratisation, that has been developed in a three-year action programme at IDEA, the inter-governmental Institute for Democracy and Electoral Assistance in Sweden. The Handbook provides a means to measure systematically the full range of values, institutions and issues relating to modern democracy that is sensitive to the underlying principles and democracy and the differences between democracies themselves. It is therefore both universal in application and capable of responding to particular aspects of any one nation's democratic arrangements. The animating principle of the Handbook is that only citizens of a nation themselves are qualified to assess the quality of their own democratic arrangements. Thus, it provides a self-help guide, which gives academics, lawyers, political practitioners, journalists and interested citizens the tools to assess the state of their democracy, or any key aspects of their democracy. The Handbook is above all a practical working document that draws on the actual experience of assessing democracy in different countries, comparative knowledge and research, and democratic principles and practice. It gives a step-by-step guide to the purposes and methods of democracy assessment; who to involve; how to use the research tools; how to validate the findings; what standards of practice to adopt; and how to present and publicise a finished assessment. It contains extracts from completed assessments, guidance on the use of qualitative and quantitative data, examples of codes of democratic practice and international and regional standards, and a vast list of accessible data sources. The methodology was created by a team of political scientists assembled from all regions of the world by International IDEA and has been tried and tested in a variety of countries, including Bangladesh, El Salvador, Italy, Kenya, Malawi, New Zealand, Peru, South Korea and the United Kingdom. International organisations like the World Bank and UNECA are adapting it for in-country use. The four main authors and editors have been directly involved from the inception of the project - in developing and refining the methodology and participating in and advising on the nine country studies that form the essential practical core of experience on which this invaluable Handbook is based.
