Journey of Perseverance and Accomplishments John S. Medley, PhD, 2014-02-07 John Medley's life took on new meaning on the day twenty-one trainee soldiers died. As a teenager, he embarked on the journey of his lifetime to become a fighting finance noncommissioned officer in the US Army. After infantry and paratrooper training, he showed early allegiance to the US Army Finance Corps. The loss of those twenty-one soldiers instilled in him a lifelong commitment to ensuring timely and accurate pay to soldiers and their dependents. Over his career, he learned to rely on his military training and education to help him face and resolve problematic conditions and situations. He also relied on the acquired, mission-related knowledge that he gleaned from one assignment to the next. His life and career were affected further by the urgency to respond to the families of 248 soldiers who had been killed in an air crash when returning from the Sinai. An encounter with a widow and her two toddlers would change his

life again. After the death of her soldier husband, she came to John's office in search of condolence and relief from her unbearable strife. There, the two spoke of her emotional and financial concerns for her family's future without her husband. Fortunately, John and his team were prepared to help these families through their darkest days. Join Dr. Medley as he brings you inside the workings of military finance operations and life in the civilian worlds of business, civil service, and academia.

Guidelines for Using Activated Sludge Models

Leiv Rieger, Sylvie Gillot, Guenter Langergraber, Takayuki Ohtsuki, Andrew Shaw, Imre Takacs, Stefan Winkler, 2012-09-14 Mathematical modelling of activated sludge systems is used widely for plant design, optimisation, training, controller design and research. The quality of simulation studies varies depending on the project objectives, finances and expertise available. Consideration has to be given to the model accuracy and the amount of time required carrying out a simulation study to produce the desired accuracy. Inconsistent approaches and insufficient documentation make quality assessment and comparison of simulation results difficult or almost impossible. A general framework for the application of activated sludge models is needed in order to overcome these obstacles. The genesis of the Good Modelling Practice (GMP) Task Group lies in a workshop held at the 4th IWA World Water Congress in Marrakech, Morocco where members of research groups active in wastewater treatment modelling came together to develop plans to

synthesize the best practices of modellers from all over the world. The most cited protocols were included in the work, amongst others from: HSG (Hochschulgruppe), STOWA, BIOMATH and WERF. The goal of the group is to set up an internationally accepted framework to deal with the ASM type models in practice. This framework shall make modelling more straightforward and systematic to use especially for practitioners and consultants. Additionally, it shall help to define quality levels for simulation results, a procedure to assess this quality and to assist in the proper use of the models. The framework will describe a methodology for goal-oriented application of activated sludge models demonstrated by means of a concise guideline about the procedure of a simulation study and some illustrative case studies. The case studies shall give examples for the required data quality and quantity and the effort for calibration/validation with respect to a defined goal. The final report will include an extended appendix with additional information and details of methodologies. Additional features in Guidelines for Using Activated Sludge Models include a chapter on modelling industrial wastewater, an overview on the history, current practice and future of activated sludge modelling and several explanatory case studies. It can be used as an introductory book to learn about Good Modelling Practice (GMP) in activated sludge modelling and will be of special interest for process engineers who have no prior knowledge of modelling or for lecturers who need a textbook for their students. The STR can also be used as a

modelling reference book and includes an extended appendix with additional information and details of methodologies. Scientific and Technical Report No. 22

Supermoms Activated Jacqueline

Toboroff, 2023-07-19 Moms—the largest voting bloc—have had enough. Democrats have sold them a bill of lies. They’ve had their parental rights stripped, gender mocked, bodily autonomy rejected, safety imperiled, voices silenced, and children turned against them by the educational system they fund. Moms are only loyal to one party: their kids. Supermoms Activated charts the journey of twelve mothers from across the nation from varying socioeconomic, religious, racial, and political party affiliations. From flipping school boards, bringing cases before the Supreme Court, running for office, lobbying, crafting policy, starting new schools, and changing how politicians campaign, the mom army is coming to save this nation. The mom crusade has come to protect children from the mainstreaming of “gender dysmorphia,” “privilege blocks,” and “furries.” Their movement has been so impactful that the big guns, hoping to silence and disavow them, have been summoned: mainstream and social media, teachers unions, educators, campaign consultants,

Hollywood, and even the president of the United States, Joe Biden. These groups have waged war against concerned moms, labeling them “domestic terrorists.” Supermoms Activated takes readers on a deep-dive into why moms woke up and risked everything. Through personal journeys, this book shows different approaches taken to fight back against Marxism on all fronts. There are wins and losses, but more than that, there’s a game plan moving forward. Personal agency is most important when it comes to stopping wokeism from taking over and one person can start a prairie fire. Join these moms in the American revival.

I Activate You To Affect Me Carlos

Cornejo, Giuseppina Marsico, Jaan

Valsiner, 2018-01-01 The second volume of Annals of Cultural Psychology is dedicated to the affective nature of human social relationships with the environment. The chapters here included explore the historical, theoretical and practical dimensions of the concept of affectivating originally introduced by one of us (Valsiner, 1999), as a potential tool of inquiry into the affective-sensitive dimension of psychological life within a cultural-psychological framework. The concept of affectivating involves two psychological dimensions often undervalued or even obliterated from contemporary cultural psychology, namely the affective involvement and the agentivity of people in their social encounters. Through several examples -- 'feeling-at-home', silence spaces and rituals, memorials, music and

poetry, among others-- we show individual's concrete actions in mundane everyday life aim to give an affective personal sense to the world around. This focuses on the primary affective nature of human meaning construction that guides the person in one's continuing feeling-into-the-world. At a theoretical level the notion of affectivation challenges contemporary Cultural Psychology to rescue subjectivity, not only symbolism. Affectivation propounds a return to the long, but partially forgotten, organismic tradition, represented in the history by thinkers like Wilhelm Dilthey, Jakob von Uexküll and Kurt Goldstein. Cultural psychology has to bring semiosis back to the vital background of human experience.

Human Error Reduction in Manufacturing José Rodríguez-Pérez, 2018-08-27 For many years, we considered human errors or mistakes as the cause of mishaps or problems. In the manufacturing industries, human error, under whatever label (procedures not followed, lack of attention, or simply error), was the conclusion of any quality problem investigation. The way we look at the human side of problems has evolved during the past few decades. Now we see human errors as the symptoms of deeper causes. In other words, human errors are consequences, not causes. The basic objective of this book is to provide readers with useful information on theories, methods, and specific techniques that can be applied to control human failure. It is a book of ideas, concepts, and examples from the manufacturing sector. It presents a comprehensive overview of the subject,

focusing on the practical application of the subject, specifically on the human side of quality and manufacturing errors. In other words, the primary focus of this book is human failure, including its identification, its causes, and how it can be reasonably controlled or prevented in the manufacturing industry setting. In addition to including a detailed discussion of human error (the inadvertent or involuntary component of human failure), a chapter is devoted to analysis and discussion related to voluntary (intentional) noncompliance. Written in a direct style, using simple "industry" language with abundant applied examples and practical references, this book's insights on human failure reduction will improve individual, organizational, and social well-being.

Activating China Setsuko Matsuzawa, 2019-01-04 This book examines the effects of the transnational social and environmental advocacy of foreign NGOs in China. Based on three case studies, including China's first participatory development project, its first successful case of transnational anti-dam activism, and its first national park project, the book challenges our

typical understanding that global forces shape local outcomes. Drawing on ethnographic fieldwork in China and archival work in the United States, Matsuzawa sheds light on the entrepreneurial behaviors of Chinese activists, researchers, and government officials. She shows that global projects are often substantially transformed by local actors, despite the original intentions of their foreign collaborators and even China's central government. Thus, it is argued that foreign NGOs are not as hegemonic or culturally imperialistic as is commonly viewed. Matsuzawa reveals that their goals may change profoundly as a result of their engagements with local actors on the ground. She offers a new theory of transnational advocacy together with an account of the Chinese party-state's rising concerns over the influence of foreign NGOs. Activating China will be of interest to sociologists and political scientists working in the fields of social movement studies and activism in China.

Activating Human Rights and Peace GÖH Bee Chen, Baden Offord, Rob Garbutt, 2016-03-16 Human rights and peace issues and concerns have come about at a critical time. The world has recently witnessed a plethora of turning points that speak of the hopes and vulnerabilities which are inherent in being human and demonstrate that change in the service of human rights and peace is possible. At the same time, however, other events indicate that wherever there is life, there is vulnerability in a world characterized by instability and endemic human suffering. On top of all this, the collapse of the global financial

system and the serious, rapid destruction of the environment have brought the world to a precarious state of vulnerability. Activating human rights and peace is, therefore, a project that is always in progress, and is never finally achieved. This enlightening collection of well thought through cases is aimed at academics and students of human rights, political science, law and justice, peace and conflict studies and sociology.

Spanish Sociedades Laborales–Activating the Unemployed Jens Lowitzsch, Sophie Dunsch, Iraj Hashi, 2017-11-19 This book investigates the potential of the Spanish Sociedades Laborales (SLs) as an instrument of active labour market policy for re-turning the unemployed to the labour market and also the transferability of the scheme to other EU Member States. Spanish Sociedades Laborales (SLs) – mostly small and micro enterprises – are a qualified form of conventional corporation, majority-owned by their permanent employees. Unemployed persons can capitalise their unemployment benefits as a lump sum to start a new SL or to recapitalise an existing SL by joining it. This makes SLs similar to start-up subsidies for the unemployed, an established instrument of active labour market policy across the EU. The new 2015 Law on Worker-Owned and Participatory Companies substantially modernised the concept of SLs 30 years after its inception. The book tackles two currently widely discussed policy issues at both the EU level as well as the national level, i.e., reactivating unemployed in the context of ALMP and encouraging employee co-ownership in the context of the economic reform agenda in

particular with regard to corporate governance, regional economic stimuli and distributive justice.

Handbook of Research on Activating Middle Executives' Agency to Lead and Manage During Times of Crisis Wilmot, Ann-Marie, Thompson, Canute Sylvester, 2022-06-24 The role of lead executives is demanding under normal circumstances, but more so during times of institutional crisis. The existence of ongoing internal organizational crises plus crises triggered by external events and shocks requires that leaders and managers be equipped with the tools to manage such crises. Therefore, further study is required that considers the difficulties of leading various organizations as well as best practices for future management. The Handbook of Research on Activating Middle Executives' Agency to Lead and Manage During Times of Crisis is a comprehensive reference source that offers practical applications, tools, and skills to equip middle leaders to meaningfully participate in crisis management and resolution in institutions for improved outcomes and discusses a multi-pronged framework for building middle leaders' crisis response efficacies. The book also invites top-tier educational and industry practitioners to reflect on how they have led during times of crisis. Covering topics such as mentoring, coping strategies, and sustainable development, this major reference work is ideal for educational leaders, managers, business owners, human resource professionals, scholars, researchers, academicians, instructors, and students.

Problem-Based Physiology E-Book Robert G.

Carroll, 2009-02-05 A fully problem-based, integrated physiology text, this new resource uses clinical case studies to promote interactive learning and to build a foundation of knowledge for clinical practice. Each case presents an unknown clinical disorder and examines differential diagnoses, treatments, and outcomes as well as relevant physiologic principles for a well-rounded review. Approximately 150 illustrations (most in full color) reinforce learning of the written material, while a practice test of USMLE-style questions—with explanations—aids in USMLE Steps 1 and 2 preparation. Features a problem-based approach to promote interactive learning and to build a foundation of knowledge for the USMLE Steps 1 and 2 as well as for clinical practice. Presents a summary of physiologic principles related to each unknown clinical disorder, along with differential diagnoses, treatments, and outcomes for a well-rounded review. Includes nearly 150 illustrations, most in full color, that reinforce learning of the written material.

Cases on Error Analysis in Foreign Language

Technical Writing Lebedeva, Nadezhda

Anatolievna, 2023-07-21 There is a clear tendency to consider the errors committed by learners in the process of learning a foreign language not as a negative aspect but as a natural process in the development of their language skills. In the past, teachers and researchers pondered these errors as something unfavorable, something to prevent from occurring at all costs. In order to regulate this

appearance of errors, many researchers in the field of foreign language technical teaching have started to study and track the errors made by these students. Knowing the most common types of errors is an important and necessary step to inform teachers about where to direct their efforts regarding the most problematic areas students face while producing their technical writing assignments in a foreign language. Cases on Error Analysis in Foreign Language Technical Writing provides relevant theoretical foundations and the latest empirical research findings in the area of error analysis in foreign language technical writing. This book also summarizes the experience of teaching a foreign language for professional purposes in various fields of higher education. Covering topics such as error analysis, lexical skills, and writing outputs, this casebook is an essential resource for preservice teachers, educators, administrators, librarians, researchers, and academicians.

Terrestrial Neutron-Induced Soft Errors in Advanced Memory Devices ,

Memristors for Neuromorphic Circuits and Artificial Intelligence Applications Jordi Suñé, 2020-04-09 Artificial Intelligence (AI) has found many applications in the past decade due to the ever increasing computing power. Artificial Neural Networks are inspired in the brain structure and consist in the interconnection of artificial neurons through artificial synapses. Training these systems requires huge amounts of data and, after the network is trained, it can recognize unforeseen data and provide useful

information. The so-called Spiking Neural Networks behave similarly to how the brain functions and are very energy efficient. Up to this moment, both spiking and conventional neural networks have been implemented in software programs running on conventional computing units. However, this approach requires high computing power, a large physical space and is energy inefficient. Thus, there is an increasing interest in developing AI tools directly implemented in hardware. The first hardware demonstrations have been based on CMOS circuits for neurons and specific communication protocols for synapses. However, to further increase training speed and energy efficiency while decreasing system size, the combination of CMOS neurons with memristor synapses is being explored. The memristor is a resistor with memory which behaves similarly to biological synapses. This book explores the state-of-the-art of neuromorphic circuits implementing neural networks with memristors for AI applications.
