Medical Emergency Teams Michael A. DeVita, Ken Hillman, Rinaldo Bellomo, 2007-07-03 Why Critical Care Evolved METs? In early 2004, when Dr. Michael DeVita informed me that he was considering a textbook on the new concept of Medical Emergency Teams (METs), I was surprised. At Presbyterian-University Hospital in Pittsburgh we introduced this idea some 15 years ago, but did not think it was revolutionary enough to publish. This, even though, our fellows in critical care medicine training were all involved and informed about the importance of "Condition C (Crisis)," as it was called to distinguish it from "Condition A (Arrest). "We thought it absurd to intervene only after cardiac arrest had occurred, because most cases showed prior deterioration and cardiac arrest could be prevented with rapid team work to correct precluding problems. The above thoughts were logical in Pittsburgh, where the legendary

Dr. Peter Safar had been working since the late 1950s on improving current resuscitation techniques, first ventilation victims of apneic from drowning, treatment of smoke inhalation, and so on. This was followed by external cardiac compression upon demonstration of its efficiency in cases of unexpected sudden cardiac arrest. Dr. Safar devoted his entire professional life to improvement of cardiopulmonary resuscitation. He and many others emphasized the importance of getting the CPR team to out-of-hospital victims of cardiac arrest as quickly as possible.

Maternal Child Nursing Care - E-Book Shannon E. Perry, Marilyn J. Hockenberry, Kitty Cashion, Kathryn Rhodes Alden, Ellen Olshansky, Deitra Leonard Lowdermilk, 2022-03-05 Master the essentials of maternity and pediatric nursing with this comprehensive, all-in-one text! Maternal Child Nursing Care, 7th Edition covers the issues and

concerns of women during their childbearing years and children during their developing years. It uses a family-centered, problem-solving approach to patient care, with guidelines supported by evidence-based practice. New to this edition is an emphasis on clinical judgment skills and a new chapter on children with integumentary dysfunction. Written by a team of experts led by Shannon E. Perry and Marilyn J. Hockenberry, this book provides the accurate information you need to succeed in the classroom, the clinical setting, and on the Next Generation NCLEX-RN® examination. Focus on the family throughout the text emphasizes the influence of the entire family in health and illness. Expert authors of the market-leading maternity and pediatric nursing textbooks combine to ensure delivery of the most accurate, up-to-date content. Information on victims of sexual abuse as parents and human trafficking helps prepare students to handle these delicate issues. Nursing Alerts highlight critical information that could lead to deteriorating or emergency situations. Guidelines boxes outline nursing procedures in an easy-to-follow format. Evidence-Based Practice boxes include findings from recent clinical studies. Emergency Treatment boxes describe the signs and symptoms of emergency situations and provide step-by-step interventions. Atraumatic Care boxes teach students how to manage pain and provide competent care to pediatric patients with the least amount of physical or psychological stress. Community Focus boxes emphasize community issues, provide resources and guidance, and illustrate nursing care in a variety

of settings. Patient Teaching boxes highlight important information nurses need to communicate to patients and families. Cultural Considerations boxes describe beliefs and practices relating to pregnancy, labor and birth, parenting, and women's health. Family-Centered Care boxes draw attention to the needs or concerns of families that students should consider to provide family-centered care.

Strategies to Improve Cardiac Arrest Survival

Institute of Medicine, Board on Health Sciences Policy, Committee on the Treatment of Cardiac Arrest: Current Status and Future

Directions, 2015-09-29 Cardiac arrest can strike a seemingly healthy individual of any age, race, ethnicity, or gender at any time in any location, often without warning. Cardiac arrest is the third leading cause of death in the United States, following cancer and heart disease. Four out of five cardiac arrests occur in the home, and more than 90 percent of individuals with cardiac arrest die before reaching the hospital. First and foremost, cardiac arrest treatment is a community issue - local resources and personnel must provide appropriate, high-quality care to save the life of a community member. Time between onset of arrest and provision of care is fundamental, and shortening this time is one of the best ways to reduce the risk of death and disability from cardiac arrest. Specific actions can be implemented now to decrease this time, and recent advances in science could lead to new discoveries in the causes of, and treatments for, cardiac arrest. However, specific barriers must first be addressed. Strategies to Improve Cardiac Arrest

Survival examines the complete system of response to cardiac arrest in the United States and identifies opportunities within existing and new treatments, strategies, and research that promise to improve the survival and recovery of patients. The recommendations of Strategies to Improve Cardiac Arrest Survival provide high-priority actions to advance the field as a whole. This report will help citizens, government agencies, and private industry to improve health outcomes from sudden cardiac arrest across the United States.

Concepts for Nursing Practice E-Book Jean Foret Giddens, 2019-11-22 Learn the core concepts of nursing care and apply them to the clinical setting! Concepts for Nursing Practice, 3rd Edition uses a simplified, intuitive approach to describe 57 important concepts relating to all areas of nursing practice. For easier understanding, this book also makes connections among related concepts and links you to other nursing textbooks. Exemplars for each concept provide useful examples and models, showing how concepts are successfully applied to practice. New to this edition are updated research evidence and a new Population Health concept. Written by conceptual learning expert Jean Giddens, this text will help you build clinical reasoning skills and prepare confidently for almost any clinical nursing situation. Authoritative content written by expert contributors and meticulously edited by concept-based learning expert Jean Giddens sets the standard for the rapidly growing concept-based curriculum movement. A total of 57 important nursing concepts are clearly defined and analyzed, spanning the areas of patient physiology, patient behavior, and the professional nursing environment. Case studies in each chapter make it easier to apply knowledge of nursing concepts to real-world situations. UNIQUE! Featured Exemplars sections describe selected exemplars related to each nursing concept, covering the entire lifespan and all clinical settings, and help you assimilate

concepts into practice. UNIQUE! Logical framework of concepts by units and themes helps you form immediate connections among related concepts --- a key to conceptual learning. UNIQUE! Interrelated Concepts illustrations provide visual cues to understanding and help you make connections across concepts. NEW! UPDATED content reflects the latest research evidence and national and international practice guidelines. NEW! Population Health concept reflects the future of nursing, in which health care organizations learn to deliver care that is high in quality, patient-centered, cost-effective, and evidence-based. NEW! Featured Exemplars sections provide a brief explanation of some of the most important exemplars. NEW! Discussion questions in case studies reinforce your understanding of each concept. NEW! UPDATED exemplar links connect you to concept exemplars in other RN- and LPN/LVN-level Elsevier nursing titles.

COM and .NET Component Services Juval Löwy, 2001
With COM and .NET Component Services, skilled COM developers can leverage their knowledge for the next generation of components to be built for Microsoft's new .NET framework. A primary goal of Microsoft's COM+ is to provide proven design solutions for scalable systems. Assuming experience with classic COM, COM and .NET Component Services focuses on the added services of COM+, including support for transactions, queued components, events, concurrency management, and security. Along the way, it ably demonstrates that COM+ is a masterpiece of design and usability from the ground up--truly a mature set of

component services oriented for the middle tier. COM+ provides a foundation for robust, enterprise-wide, mission-critical distributed applications. And it's not limited to Internet applications. You can use COM+ services in the same places as classic COM components: in-house two-tier information systems, client-tier controls, desktop applications, machine control components, and every other conceivable application of COM. COM and .NET Component Services is the first book to stress the importance of learning to use COM+ services for both .NET and COM component-based applications. Since most companies have considerable investment in existing code base and development skills, COM+ can serve as a migration path for companies and developers. Companies can start (or continue) their projects in COM, using COM+ as a supporting platform for component services, and then when the time comes to move to .NET, they can start plugging .NET components seamlessly into the same architecture, reusing and interacting with their existing COM components.

Ciottone's Disaster Medicine - E-Book Gregory R. Ciottone, 2023-03-07 While medical specialists in disaster mitigation, preparedness, and response are needed worldwide, the initial phase of disaster response is almost entirely dependent upon local resources—making it essential that all healthcare personnel have a working knowledge of the field and stand ready to integrate into the response system. Ciottone's Disaster Medicine, 3rd Edition, is the most comprehensive reference available to help accomplish these goals in every community. It thoroughly covers isolated domestic

events as well as global disasters and humanitarian crises. Dr. Gregory Ciottone and more than 200 worldwide authorities share their knowledge and expertise on the preparation, assessment, and management of both natural and man-made disasters, including lessons learned by the responders to contemporary disasters such as the COVID-19 pandemic, Australian and western U.S. wildfires, European heatwaves, the Beirut explosion, recent hurricanes and typhoons, and the global refugee crisis. Part 1 offers an A-to-Z resource for every aspect of disaster medicine and management, while Part 2 features an exhaustive compilation of every conceivable disaster event, organized to facilitate quick reference in a real-time setting. Covers basic concepts such as identification of risks, organizational preparedness, equipment planning, disaster education and training, and more advanced concepts such as disaster risk reduction, health in complex emergencies, building local disaster resiliency, psychological impact of disasters on children, and more. Contains new decision trees throughout that help guide you through the decision-making process in difficult situations. Uses an easy-to-follow, templated approach to historical perspectives, overviews of current practice including pre-incident and post-incident actions, medical treatment of casualties, and potential pitfalls. Includes updated sections on man-made disasters, including mass casualties, active shooter situations, integrated response to terrorist attacks, and chemical/biological/radiological/nuclear/high-

yield explosives disasters. Discusses the latest technologies, such as the use of mobile disaster applications, drone response systems, and virtual reality simulation training. Features thoroughly updated information on crisis leadership, practical applications of disaster epidemiology, disaster and climate change, and the integration of non-government agencies (NGOs) in disaster response—a critical topic for those responding to humanitarian needs overseas. Includes new chapters on Pandemic Preparedness and Response, Disaster Medicine in a Changing Climate, Disaster Response in Asia, Building Local Capacity and Disaster Resiliency, Civilian-Military Coordination in Disaster Response, Medical Simulation in Disaster Preparedness, Disaster Nursing, Crisis Meta-Leadership, Palliative Care in Disasters, Counter-Terrorism Medicine, SARS CoV (COVID-19 and SARS), and Disasters in Space Travel.

Electrical Diseases of the Heart Ihor Gussak, A. M. Wilde, P. A. Friedman, Charles Antzelevitch, M. J. Ackerman, W.-K. Shen, 2008-09-08 This book provides a unique contemporary and succinct distillation of the current status of recently delineated electrical diseases of the heart, emphasizing their common and diverse clinical features. The latest developments in the field of experimental and clinical cardiac electrophysiology, genetics, pharmacology and interventional therapies of various clinical arrhythmogenic entities are featured and discussed in terms of recent advances in basic and clinical science. The book is divided into seven major parts. Each part consists of chapters (total of

64) dealing with related topics.

The World Politics of Social Investment: Volume II Julian L. Garritzmann, Silja Häusermann, Bruno Palier, 2022 Around the turn of the 21st century, new social policies started to develop all around the world. Bolsa Familia in Brazil, Progresa in Mexico, Superémonos in Costa Rica, Juntos in Peru... almost all Latin American countries have developed conditional cash transfers (CCTs), a new type of social policy usually conditioning benefits for poor families on their children going to school or attending health checkups. At the same time, some old industrialized countries famously known for being the heaven of the male breadwinner model have introduced surprising innovation in their welfare systems: in Germany massive investment in preschool childcare (Kita) since the early 2000s and the introduction of two daddy months in a German parental leave scheme in 2007; in Japan a well-paid parental leave in 2014 and universalization of free preschool education for ages 3-5 in 2017; in South Korea childcare facilities for children below the age of five made free of charge in 2013. Policies aimed at investing in children's care and education and in mothers' labor market participation seem to have bloomed almost everywhere. Worldwide there has been a sharp increase in access to secondary and tertiary education. Youth training programs have spread in many Latin American countries, while European countries have introduced youth guarantees, an innovative inclusive policy for their NEETs (young people not in education, employment, or training)--

Activate Brand Purpose Scott Goodson, Chip Walker, 2021-03-03 SHORTLISTED: Business Book Awards 2022 - International Business Book category CATEGORY SILVER WINNER: Axiom Awards 2022 - Business Commentary Category The greatest challenge facing leaders is activating and actioning purpose based brands to the people who matter inside the company and out. Recent statistics prove that more than 87% of consumers would purchase a product because a company advocated for an issue they cared about, and more than two-thirds would refuse to do so if the company supported an issue contrary to their beliefs. We live in an age of activism - the conscious consumer is more socially aware than ever before, and this is reflected in their buying habits. Yet, activism on behalf of brands is lagging. While many claim to be 'purpose driven', far too often this purpose is relegated to a plaque above the CEO's desk, and never goes any further. Or, worse, the 'purpose' is transparently used as a marketing ploy, but never acted upon in any real way. Activate Brand Purpose shows readers how to transform their brand's purpose into meaningful action by sparking a company wide cultural movement, beginning internally and permeating externally. Regardless of whether your purpose is lofty and socially conscious, or all business, focus on galvanizing people, and they will respond if you can prove that you care about that purpose, and that you're working to realize it, rather than simply chasing the next dollar. This book contains a clearly explained, proven framework that will make this happen.

Passive and Active Measurement Robert

Beverly, Georgios Smaragdakis, Anja

Feldmann, 2018-03-01 This book constitutes the proceedings of the 19th International Conference on Passive and Active Measurement, PAM 2018, held in Berlin, Germany, in March 2018. The 20 full papers presented in this volume were carefully reviewed and selected from 50 submissions. The papers demonstrate the import and extent to which measurements pervade systems – from protocols to performance to security. They are organized in the following topical sections: models and inference; security and privacy; CDNs; DNS; certificates; interdomain routing; and analyzing protocols.
