Towards Tradable Water Rights Min Jiang, 2017-09-27 This book provides a first comprehensive legal examination of water rights arrangements and water rights trading in China. Although recent water reform in China has made substantial progress in policy development and practice, how its legal and institutional framework facilitates or hinders the application of tradable water rights remains less addressed in the existing scholarship. Against the backdrop of China's water reform and the wider international debate in water governance, this book aims to provide an innovative approach to the complex issue of water governance by critically analysing the recent legal and policy developments in China towards tradable water rights. It examines the deficiencies of the current systems for water rights arrangements and trading, explores how China may learn from and build on the international trends in water rights trading practice (mainly Australia and the US), and proposes legal and policy frameworks for defining and administering tradable water rights in China that underpin sustainable water use in the face of exacerbated water scarcity, variability, and uncertainty. All in all, the book proposes pragmatic strategies for China's water law and policy reform to move towards tradable water rights, which encompasses a comprehensive prescription from initialising and defining tradable water rights to administering water rights and trading. By reflecting on the deepening water reforms in both China and other jurisdictions, the book aims to contribute to the international water governance debate by exploring from a legal and policy perspective, how China, comparative to other cases around the world, can find a balanced combination of water allocation mechanisms to address its water challenges. It is hoped that the observations and proposed implications

for China's water reform will contribute to developing a better understanding of the way in which experiences in water markets can be shared from jurisdiction to jurisdiction.

China's Human Rights Lawyers Eva Pils, 2014-11-20 This book offers a unique insight into the role of human rights lawyers in Chinese law and politics. In her extensive account, Eva Pils shows how these practitioners are important as legal advocates for victims of injustice and how bureaucratic systems of

control operate to subdue and marginalise them. The book also discusses how human rights lawyers and the social forces they work for and with challenge the system. In conditions where organised political opposition is prohibited, rights lawyers have begun to articulate and coordinate demands for legal and political change. Drawing on hundreds of anonymised conversations, the book analyses in detail human rights lawyers' legal advocacy in the face of severe institutional limitations and their experiences of repression at the hands of the police and state security apparatus, along with the intellectual, political and moral resources lawyers draw upon to survive and resist. Key concerns include the interaction between the lawyers and their bureaucratic, professional and social environments and the forms and long term political impact of resistance. In addressing these issues, Pils offers a rare evaluative perspective on China's legal and political system, and proposes new ways to assess domestic advocacy's relationship with international human rights and rule of law promotion. This book will be of great interest and use to students and scholars of law, Chinese studies, socio-legal studies, political studies, international relations, and sociology. It is also of direct value to people working in the fields of human rights advocacy, law, politics, international relations, and journalism.

Legal Issues for Implementing the Clean Development Mechanism in China Xiaoyi Jiang, 2012-08-13 Today, climate change is among the most hotly-debated topics. The Clean Development Mechanism (CDM), one of the three financial mechanisms under the Kyoto Protocol open to developing and developed countries, was devised to assist in mitigation of global warming. This book discusses what China should do to make full use of the CDM to promote sustainable development and to meet the challenge of climate change from a legal perspective. The findings lead to the conclusion that the CDM has

limitations in promoting sustainable development in China, and thus should be regarded only as a complementary instrument in combating climate change. Legal strategies for improving the implementation of CDM projects under the legal framework in China are thus put forward, and some proposals for China to meet the challenge of climate change in the post-2012 era are made. This book offers new insights to academics and policymakers both in the public and private sector. It is intended for legal practitioners and researchers on carbon trading as well as policymakers interested in the role of developing countries in climate change law. In addition, it is of interest to stakeholders of CDM projects.

and other sources with detailed commentary. Aimed at undergraduates studying administrative law, it provides comprehensive coverage of the subject and brings together in one volume the best features of a textbook and a casebook. Rather than simply presenting administrative law as a straightforward body of legal rules, this engaging, critical text considers the subject as an expression of underlying constitutional and other policy concerns, which fundamentally shape the relationship between the citizen and the state. The result is a fascinating account of a subject of crucial importance.
