Designing Your Website to Use Less Energy: Green Energy Websites Dale Stubbart, Designing Your Website to Use Less Energy explores simple changes you can make to your website that will cause it to use less energy. We don't often think about the amount of power being used to surf the Internet, but it's quite a lot. If all websites were designed to use less energy, we could save a lot of energy. One of the most important considerations when designing a website to use less energy is to make it load quickly. Part of that depends on where your website sits - your web host. Part of that depends on your images. Part depends on ads. Part depends on how simply your website is coded. In fact, Google will downgrade your web page in its search algorithm if your web page doesn't load quickly. Designing Your Website to Use Less Energy covers choosing a web host, performance, plug-ins and services, making your own plug-in, energy-saving colors, and printing. Performance covers lessening the impact of images, javascript, CSS, photo frameworks, and database queries, plus other tricks you can use to make your page load faster. If you're a big corporation, there are tools from Google, Facebook, and Twitter you can use. If you're not a large corporation and don't have a lot of time, this audiobook will help you get your website loading faster and will help you save energy. The more users you have who browse your website, the more energy you'll save. Listening ease: medium. Listening level: eighth grade. Maturity: general audience.

Computers Helping People with Special Needs, Part II Klaus Miesenberger, Joachim Klaus, Wolfgang Zagler, Arthur Karshmer, 2010-06-29 Welcome to the Proceedings of ICCHP 2010! We were proud to welcome participants from more than 40 countries from all over the world to this year's ICCHP. Since the late 1980s, it has been ICCHP's mission to support and reflect development in the field of "Assistive Technologies," eAccessibility and eInclusion. With a focus on scientific quality, ICCHP has become an important reference in our field. The 2010 conference and this collection of papers once again fulfilled this mission. The International Programme Committee, comprising 106 experts from all over the world, selected 147 full and 44 short papers out of 328 abstracts submitted to ICCHP. This acceptance ratio of about half of the submissions demonstrates our strict pursuit of scientific quality both of the programme and in particular of the proceedings in your hands. An impressive number of experts agreed to organize "Special Thematic Sessions" (STS) for ICCHP 2010. These STS help to bring the meeting into sharper focus in several key areas. In turn, this deeper level of focus helps to collate a state of the art and mainstream technical, social, cultural and political developments.

Single Page Web Applications Michael Mikowski, Josh Powell, 2013-09-19 Summary In Single Page Web Applications you'll learn to build modern browser-based apps that take advantage of stronger client platforms and more predictable bandwidth. You'll learn the SPA design approach, and then start exploring new techniques like structured JavaScript and responsive design. And you'll learn how to capitalize on trends like server-side JavaScript and NoSQL data stores, as well as new frameworks that make JavaScript more manageable and testable as a first-class language. About this Book If your website is a jumpy collection of linked pages, you are behind. Single page web applications are your next step: pushing UI rendering and business logic to the browser and communicating with the server only to synchronize data, they provide a smooth user experience, much like a native application. But, SPAs can be hard to develop, manage, and test. Single Page Web Applications shows how your team can easily design, test, maintain, and extend sophisticated SPAs using JavaScript end-to-end, without getting locked into a framework. Along the way, you'll develop advanced HTML5, CSS3, and JavaScript skills, and use JavaScript as the language of the web server and the database. This book assumes basic knowledge of web development. No experience with SPAs is required. Purchase of the print book includes a free eBook in PDF, Kindle, and ePub formats from Manning Publications. Behold a Pale Farce Bill Blunden,Violet Cheung,2014-04-01 This book presents a data-driven message that exposes the cyberwar media campaign being directed by the Pentagon and its patronage networks. By demonstrating that the American public is being coerced by a threat that has been blown out of proportion—much like the run-up to the Gulf War or the global war on terror—this book discusses how the notion of cyberwar instills a crisis mentality that discourages formal risk assessment, making the public anxious and hence susceptible to ill-conceived solutions. With content that challenges conventional notions regarding cyber security, *Behold a Pale Farce* covers topics—including cybercrime; modern espionage; mass-surveillance systems; and the threats facing infrastructure targets such as the Federal Reserve, the stock exchange, and telecommunications—in a way that provides objective analysis rather than advocacy. This book is a must-read for anyone concerned with the recent emergence of Orwellian tools of mass interception that have developed under the guise of national security.

Barrierefreiheit von Webinhalten Jens Gundermann,2010-07-19 Inhaltsangabe:Einleitung: 1.1, Motivation: Eine wesentliche Einflussnahme auf die Gesellschaft hatte schon immer die Entwicklung neuer Kommunikationsmedien. Auf der Grundlage neuartiger Technologien entstehen neue Verhaltensweisen, die unseren Alltag immer mehr erleichtern. Das Internet ist für die aktuelle Generation und deren Kinder zur Selbstverständlichkeit geworden. Der Zugang zu Informationen aus den unterschiedlichsten Bereichen, die Möglichkeit der weltweiten Kommunikation, Angebote von Dienstleistungen und der Unterhaltungssektor sind nicht mehr wegzudenken. Herausragend ist vor allem der soziale Wandel, der mit den Angeboten des Web 2.0 wahrgenommen wird. So entdecken sich immer mehr Menschen in der Rolle des Redakteurs, verfassen eigene Beiträge und bringen sich in verschiedenen Netzwerken ein. Für eine große Anzahl von Benutzergruppen sind diese Informationen und Angebote des Web 2.0 schwer zugänglich. Vorwiegend für Menschen mit Behinderungen und für ältere Menschen wird aufgrund ihrer Einschränkungen die Nutzung des Internets zu einer Herausforderung. Mit der Änderung des Artikel 3 des Grundgesetzes wurde 1996 folgendes festgeschrieben: Niemand darf wegen seiner Behinderung benachteiligt werden. Webdesigner werden vor die große Aufgabe gestellt, beim Entwurf von Webseiten nicht nur auf die Optik zu achten, sondern vielmehr auf die Zugänglichkeit der Inhalte. Gerade auch das Web 2.0 steckt hier voller Chancen für Menschen mit Behinderungen. Viele Barrieren können mit dem richtigen Einsatz der technischen Entwicklungen beseitigt werden, wenn die Bedürfnisse von Menschen mit unterschiedlichen Behinderungen beachtet werden. Für blinde Nutzer sind zum Beispiel Podcasts sehr geeignet, um sich informieren zukönnen oder unterhalten zu werden. Existiert eine Textversion des Podcasts auf der Webseite, würden auch Hörgeschädigte einen Nutzen davon haben. Menschen mit Lernschwierigkeiten oder motorischen Einschränkungen profitieren bei einer Suchfunktion von Wortvorschlägen, da hier keine perfekten Rechtschreibkenntnisse gebraucht werden und auch Tippfehler keine Rolle spielen. Richtlinien und Empfehlungen zu Techniken und Webstandards, welche der Zugänglichkeit und der Barrierefreiheit im Web 2.0 dienen, werden von der WAI (Web Accessibility Initiative) erstellt. Neben den WCAG 2.0 (Web Content Accessibility Guidelines) gilt besonderes Augenmerk der Reihe ARIA (Accessible Rich Internet Applications), in der festgelegt wird, wie Menschen [...]
