

Adoc.htm

Frederick Koon-Shing Leung,Klaus-D. Graf,Francis J. Lopez-Real

South Sudan Matthew Arnold, Matthew LeRiche, 2013 In July 2011 the Republic of South Sudan achieved independence, concluding what had been Africa's longest running civil war. The process leading to independence was driven by the Sudan Peoples' Liberation Movement, a primarily Southern rebel force and political movement intent on bringing about the reformed unity of the whole Sudan. Through the Comprehensive Peace Agreement of 2005, a six year peace process unfolded in the form of an interim period premised upon 'making unity attractive' for the Sudan. A failed exercise, it culminated in an almost unanimous vote for independence by Southerners in a referendum held in January 2011. Violence has continued since, and a daunting possibility for South Sudan has arisen - to have won independence only to descend into its own civil war, with the regime in Khartoum aiding and abetting factionalism to keep the new state weak and vulnerable. Achieving a durable peace will be a massive challenge, and resolving the issues that so inflamed Southerners historically - unsupportive governance, broad feelings of exploitation and marginalisation and fragile ethnic politics - will determine South Sudan's success or failure at statehood. A story of transformation and of victory against the odds, this book reviews South Sudan's modern history as a contested region and assesses the political, social and security dynamics that will shape its immediate future as Africa's newest independent state.

Network Centric Warfare and Coalition Operations Paul T. Mitchell, 2009-02-05 This book argues that Network Centric Warfare (NCW) influences how developed militaries operate in the same fashion that an operating system influences the development of computer software. It examines three inter-related issues: the overwhelming military power of the United States; the growing influence of NCW on military thinking; and the centrality of coalition operations in modern military endeavours. Irrespective of terrorist threats and local insurgencies, the present international structure is remarkably stable - none of the major powers seeks to alter the system from its present liberal character, as demonstrated by the lack of a military response to US military primacy. This primacy privileges the American military doctrine and thus the importance of NCW, which promises a future of rapid, precise, and highly efficient operations, but also a future predicated on the 'digitization' of the battle space. Participation in future American-led military endeavours will require coalition partners to be networked: 'interoperability' will therefore be a key consideration of a partner's strategic worth. Network Centric Warfare and Coalition Operations will be of great interest to students of strategic studies, international security, US foreign policy and international relations in general.

African Indigenous Knowledges in a Postcolonial World Olajumoke Yacob-Haliso, Ngozi Nwogwugwu, Gift Ntiwunka, 2020-11-29 This book argues that ancient and modern African indigenous knowledges remain key to Africa's role in global capital, technological and knowledge development and to addressing her marginality and postcoloniality. The contributors engage the unresolved problematics of the historical and contemporary linkages between African knowledges and the African academy, and between African and global knowledges. The book relies on historical and comparative political analysis to explore the global context for the application of indigenous knowledges for tackling postcolonial challenges of knowledge production, conflict and migration, and women's rights on the continent in transcontinental African contexts. Asserting the enduring potency of African indigenous knowledges for the transformation of policy, the African academy and the study of Africa in the global academy, this book will be of interest to scholars of African Studies, postcolonial studies and decolonisation and global affairs.

How Chinese Learn Mathematics Lianghuo Fan, 2004 - Represents a concerted research effort in mathematics education of Chinese learners, the first of its kind - Contains contributions from the world's leading scholars and most active researchers in this area and beyond - Provides comprehensive coverage and insiders' perspectives on relevant issues

Mathematics Education in Different Cultural Traditions- A Comparative Study of East Asia and the West Frederick Koon-Shing Leung, Klaus-D. Graf, Francis J. Lopez-Real, 2006-08-02 The idea of the ICMI Study 13 is outlined as follows: Education in any social environment is influenced in many ways by the traditions of these environments. This study brings together leading experts to research and report on mathematics education in a global context. Mathematics education faces a split phenomenon of difference and correspondence. A study attempting a comparison between mathematics education in different traditions will be helpful to understanding this phenomenon.

Accessing Multilingual Information Repositories Cross-Language Evaluation Forum. Workshop, Carol Peters, 2006-09-20 This book constitutes the thoroughly refereed postproceedings of the 6th Workshop of the Cross-Language Evaluation Forum, CLEF 2005. The book presents 111 revised papers together with an introduction. Topical sections include multilingual textual document retrieval, cross-language and more, monolingual experiments, domain-specific information retrieval, interactive cross-language information retrieval, multiple language question answering, cross-language retrieval in image collections, cross-language speech retrieval, multilingual Web track, cross-language geographical retrieval, and evaluation issues.

The First Sourcebook on Asian Research in Mathematics Education - 2 Volumes Bharath Sriraman, Jinfa Cai, Kyeonghwa Lee, Lianghuo Fan, Yoshinori Shimizu, Chap Sam Lim, K. Subramaniam, 2015-08-01 Mathematics and Science education have both grown in fertile directions in different geographic regions. Yet, the mainstream discourse in international handbooks does not lend voice to developments in cognition, curriculum, teacher development, assessment, policy and implementation of mathematics and science in many countries. Paradoxically, in spite of advances in information technology and the "flat earth" syndrome, old distinctions and biases between different groups of researcher's persist. In addition limited accessibility to conferences and journals also contribute to this problem. The International Sourcebooks in Mathematics and Science Education focus on under-represented regions of the world and provides a platform for researchers to showcase their research and development in areas within mathematics and science education. The First Sourcebook on Asian Research in Mathematics Education: China, Korea, Singapore, Japan, Malaysia and India provides the first synthesized treatment of mathematics education that has both developed and is now prominently emerging in the Asian and South Asian world. The book is organized in sections coordinated by leaders in mathematics education in these countries and editorial teams for each country affiliated with them. The purpose of unique sourcebook is to both consolidate and survey the established body of research in these countries with findings that have influenced ongoing research agendas and informed practices in Europe, North America (and other countries) in addition to serving as a platform to showcase existing research that has shaped teacher education, curricula and policy in these Asian countries. The book will serve as a standard reference for mathematics education researchers, policy makers, practitioners and students both in and outside Asia, and complement the Nordic and NCTM perspectives.

Reforms and Issues in School Mathematics in East Asia , 2010-01-01 Collectively, the book extends beyond what we can learn about exemplary practices in individual education systems in East

Asia. It helps us develop a better understanding of the interplay between various measures for the pursuit of excellence in mathematics curriculum and teacher education on the one hand, and the different system contexts on the other.

Ironwood Forest National Monument (N.M.), Resource Management Plan ,2011

Arizona's Deadliest Gunfight Heidi J. Osselaer,2018-05-03 On a cold winter morning, Jeff Power was lighting a fire in his remote Arizona cabin when he heard a noise, grabbed his rifle, and walked out the front door. Someone in the dark shouted, "Throw up your hands!" Shots rang out from inside and outside the cabin, and when it was all over, Jeff's sons, Tom and John, emerged to find the sheriff and his two deputies dead, and their father mortally wounded. Arizona's deadliest shoot-out happened not in 1881, but in 1918 as the United States plunged into World War I, and not in Tombstone, but in a remote canyon in the Galiuro Mountains northeast of Tucson. Whereas previous accounts have portrayed the gun battle as a quintessential western feud, historian Heidi J. Osselaer explodes that myth and demonstrates how the national debate over U.S. entry into the First World War divided society at its farthest edges, creating the political and social climate that lead to this tragedy. A vivid, thoroughly researched account, Arizona's Deadliest Gunfight describes an impoverished family that wanted nothing to do with modern civilization. Jeff Power had built his cabin miles from the nearest settlement, yet he could not escape the federal government's expanding reach. The Power men were far from violent criminals, but Jeff had openly criticized the Great War, and his sons had failed to register for the draft. To separate fact from dozens of false leads and conspiracy theories, Osselaer traced the Power family's roots back several generations, interviewed descendants of the shoot-out's participants, and uncovered previously unknown records. What happened to Tom and John Power afterward is as stirring and tragic a story as the gunfight itself. Weaving together a family-based local history with national themes of wartime social discord, rural poverty, and dissent, Arizona's Deadliest Gunfight will be the authoritative account of the 1918 incident and the memorable events that unfolded in its wake.

Waging War on the Autistic Child Andrew J. Wakefield,2016-09-13 As the number of children diagnosed with autism spectrum disorders grows each year, new discoveries and controversies arise. Andrew Wakefield explores many of these in his thorough investigation of the recent trial case of the "Arizona 5," which destroyed an Arizona family. Two parents, with five children on the spectrum, were accused of Munchausen syndrome by proxy—a rare form of child abuse—and were ganged up on by physicians, child protective services, and the courts, who alleged that the parents fabricated medical symptoms in all five children. However, Wakefield now presents ample evidence that was disregarded and that would have proven the parents' innocence. Families affected by autism suffer great hardship and prejudice, particularly as they navigate the uncertain waters of diagnosis, treatment, and education. The shocking story of the Arizona 5 family delves into the tremendous challenges some parents have to face, especially if their views on how to treat the syndrome don't align with the medical world's standards. Wakefield also includes numerous studies and research trials that support the controversial yet significant roles that vaccines and diet play in autism, factors many medical professionals wrongfully dismiss.
