The Reference Collection William J. Frost, 2005 Stay up-to-date with the growing amount of reference resources available online How important is the World Wide Web to information retrieval and communication? Important enough that information professionals have seen students exit from their libraries en masse when Internet service was lost. Internet providers dominate the indexing and abstracting of periodical articles as major publishers now offer nearly all of their reference titles in digital form. Libraries spend increasing amounts of funding on electronic reference materials, and librarians devote an increasing amount of time to assisting in their use. *The Reference Collection: From the Shelf to the Web* is an essential guide to collection development for electronic materials in academic and public libraries. *The Reference Collection: From the Shelf to the Web* tracks

the continuing evolution of electronic reference resources-and how they're accessed in a variety of settings. Librarians representing university, elementary school, and public libraries in the United States and Australia examine how reference collections have evolved over time (and may soon be a thing of the past); how public and school libraries have dealt with the changes; why library research assignments have become more difficult for teachers to make and for students to complete; how to organize online reference sources; and why the nature of plagiarism has changed in the electronic era. The book also examines the use of electronic references from a publisher's perspective and looks at the most important Web-accessible reference tools both free and subscription in the areas of humanities, medicine, the social sciences, business, and education. The Reference Collection: From the Shelf to the Web also examines: issues of authority, accessibility, cost, comfort, and user education in evaluating electronic resources the formation of purchasing consortia to facilitate the transfer of reference materials from print to online formats current literature and research findings on the state of digital versus print reference collections what electronic publishing means to smaller reference books (dictionaries, almanacs, etc.) the need for increased information literacy among students the nature, extent, and causes of cyber plagiarism the use of federated search tools and includes a selected list of the top 100 free Internet reference sites The Reference Collection: From the Shelf to the Web is an essential resource for all reference and collection development librarians, and an invaluable aid for publishing professionals.

Research Collaboration between Europe and Latin America Rigas

Arvanitis, Jacques Gaillard, 2014-02-19 International collaboration has become increasingly important in carrying out research activities. This book, written by a large group of scholars from Europe and Latin America, maps, analyses and discusses research collaboration between the two continents during the last twenty years. The empirical material underlines the richness and the variety of the links that bind the two continents, well beyond the simplified views of science, either as the brainchild of global networking or as a result of dependence. The book also develops an innovative methodological approach, combining bibliometric analysis, social surveying, in-depth interviews, and a careful analysis of research programmes and policies. While arguing that the asymmetry of relations that once existed in cooperation has turned into a more equal partnership between the two continents, it deciphers some of the reasons behind this more balanced cooperation. It also challenges the view of science as a global self-organising system through collective action at the level of researchers themselves. On the contrary, the importance of policy, institutions, and previously developed research is highlighted and recognised

Scholarly Journals in the New Digital World Gérard Boismenu, Guylaine

Beaudry, 2004 The world of scholarly and not-for-profit publishing is facing many challenges at the start of the twenty-first century, from technical and organisational factors to prevailing social and economic conditions. If scholarly journals, in particular, are to survive, the publishers of these journals are going to have to make dramatic changes to the ways they create and distribute them. Work is already underway at some university presses who have developed creative solutions to overcome these challenges in producing print journals. These early innovators represent an opportunity for all publishers to build on the advantages of e-publishing and possibly reach even larger audiences. This work demystifies the current state of scholarly journal publishing as well as offering a glimpse of hope for journals in the digital world. It will appeal not only to students and researchers, but to anyone who has an interest in the future of publishing.

Fysos BENJAMIN DAVID. LUNT, 2016-07-04 This book is Volume 6 of the series, FYSOS: Operating System Design, and will show the reader how to create a Graphical User Interface, with all the bells and whistles that go along with it. It will show how to draw to the video screen, create windows and objects such as, buttons, menus, bitmaps, progress bars, and other objects. It will show how to send event messages so that other windows can communicate with the root object, such as when a button is pressed, a text edit is changed, or any other change in the GUI system. All of this is done with minimal outside help, such as operating system calls, though a few calls to the BIOS are needed to retrieve the video hardware information. The reader will learn how to communicate with the video directly, reading and writing pixels to the screen to achieve these tasks. The companion CD-ROM contains complete source code of each example within the book, showing how to accomplish these tasks, and is heavily commented. The source code is a must to be able to follow along with the book, and is freely available once proof of book purchase is provided. This book, and its companion series of books, does not expect you to build the next great wonder of the computer world. It simply will help you with your interest in controlling the computer's hardware, from the point the BIOS releases execution to your boot code to the point of a fully working Graphical User Interface. It is not required that you know much about operating system design, though a good knowledge of C Programming Language and a moderate knowledge of an Intel(R)/AMD(R) x86 computer's hardware is expected to use this book.

Frauenstudium und Hochschulkarrieren in der Türkei Çiğdem Borchers, 2013 Die Türkei war laut einer Studie des European Technology Assessment Network (ETAN) von 2001 das Land mit dem weltweit höchsten Anteil an Lehrstuhlinhaberinnen. In Deutschland betrug dieser damals nur 5,9 Prozent aller Professuren, in der Türkei hingegen 21,5 Prozent. Um den Ursachen hierfür auf den Grund zu gehen, wird in diesem Buch ein historischer Bogen gespannt, der von den Anfängen weiblicher Bildungsbeteiligung im 19. Jahrhundert bis zur heutigen Situation reicht, die - unabhängig von ideologischen Strömungen - gekennzeichnet ist von einem kontinuierlich wachsenden Frauenanteil auf allen Hochschulebenen. Auf der Suche nach Frauen fördernden bzw. hemmenden Faktoren werden in allen Epochen soziopolitische Gegebenheiten rekonstruiert sowie Frauenbewegung und Hochschulgeschichte des Landes durchleuchtet. Die Anteile der Frauen unter den Studierenden und Lehrenden werden, aufgegliedert nach verschiedenen Wissenschaftsbereichen und Karriereebenen, danach ausgewertet. In einem abschließenden Kapitel wird die Entwicklung von Frauenstudium und Hochschulkarrieren in Deutschland summarisch gegenübergestellt, wobei Unterschiede bzw. Gemeinsamkeiten im Ländervergleich Türkei - Deutschland ermittelt werden. Çiğdem Borchers (geb. GÜR, 1967),

türkisches 'Gastarbeiterkind', besuchte in beiden Ländern die Schule. Nach Abschluss ihres Germanistikstudiums in Istanbul kam sie zurück nach Deutschland und studierte Pädagogik und Germanistik an der Ruhr Universität Bochum. Am Lehrstuhl für Vergleichende Erziehungswissenschaft, wo sie auch als wissenschaftliche Mitarbeiterin und Dozentin arbeitete, beendete sie ihr Studium mit der Promotion. Zu ihren Arbeitsschwerpunkten zählen Themen der Frauenforschung, vergleichende Hochschulforschung sowie interkulturelle Pädagogik.
