Okkultismus im Gehäuse Anna Lux,Sylvia Paletschek,2016-11-07 „Okkultismus im Gehäuse untersucht die wissenschaftliche Beschäftigung mit dem Paranormalen und ihre Institutionen im 20. Jahrhundert. Wo waren die Orte einer parapsychologischen Wissensproduktion? Welche Formen, Grenzen und Möglichkeiten der Institutionalisierung gab es? Ausgehend von einem breiten Verständnis von Institutionalisierung werden universitäre und außeruniversitäre Einrichtungen sowie erfolgreiche wie gescheiterte Versuche von Akademisierung untersucht. Weiterhin kommen organisierte Gegenbewegungen, praktische Anwendungsfelder, populärkulturelle Verwertungen sowie persönliche Erfahrungen in den Blick. Dargestellt werden die Entwicklungen anhand von Fallbeispielen aus Deutschland (BRD und DDR), Frankreich, Großbritannien, Russland, Ungarn sowie den Niederlanden und den USA. Die Beiträge zeigen, dass die Frage um Ort und „Gehäuse der Parapsychologie permanenten Aushandlungen unterworfen war. Die Geschichte des Fachs beleuchtet so beispielhaft die Entwicklung nicht-hegemonialer Wissensbestände sowie grundsätzliche Prozesse von Disziplinbildung und Institutionalisierung.

Intelligent Problem Solving. Methodologies and Approaches Rasiah Logananthara,Günther Palm,Moonis Ali,2003-07-31 The focus of the papers presented in these proceedings is on employing various methodologies and approaches for solving real-life problems. Although the mechanisms that the human brain employs to solve problems are not yet completely known, we do have good insight into the functional processing performed by the human mind. On the basis of the understanding of these natural processes, scientists in the field of applied intelligence have developed multiple types of artificial processes, and have employed them successfully in solving real-life problems. The types of approaches used to solve problems are dependant on both the nature of the problem and the expected outcome. While knowledge-based systems are useful for solving problems in well-understood domains with relatively stable environments, the approach may fail when the domain knowledge is either not very well understood or changing rapidly. The techniques of data discovery through data mining will help to alleviate some problems faced by knowledge-based approaches to solving problems in such domains. Research and development in the area of artificial intelligence are influenced by opportunity, needs, and the availability of resources. The rapid advancement of Internet technology and the trend of increasing bandwidths provide an opportunity and a need for intelligent information processing, thus creating an excellent opportunity for agent-based computations and learning. Over 40% of the papers appearing in the conference proceedings focus on the area of machine learning and intelligent agents - clear evidence of growing interest in this area.

We are Risen 1 Grant Barlow,2008-07-18 This book is here for reproof. I have written this book for the deceived church trapped in doctrines of dead men and beliefs held in the mind of separation. This book will not be welcomed by those determined to say they are sinners against God but will be welcomed by those who want to remember how we are created in truth as innocent powerful offspring of the living God. This book will heal your mind once you give yourself permission to read it and forget what sinners say about you for doing so. This book will set your mind free to hear the One Voice and to make the One choice continuously. Your time is UP and you simply must know your SELF the way you are known of God. You are a Miracle waiting to happen.

The Dawning of the Golden Age of Aquarius: (Redefining the Concepts of God, Man, and the Universe) Albert Amao Ph. D.,2012 We are at the threshold of a transitional period from the Age of Pisces to the Age of Aquarius. What should we expect from this coming New Era? What are its signs? What is the fate of human spirituality? What will the new concepts of God and of religion be? This book attempts to answer these questions based on well researched sources complemented and endorsed by cosmology, archeology, psychology, religion, Near East studies, and mythology, among other scientific disciplines. The book also intends to clarify the confusion created by some Protestant religious leaders and sensationalistic writers who have misinterpreted the signs of the transitional period as the end of the world. The truth is that we are witnessing a shift of ages, that is, the slow evolution from the Piscean Era to the commencing of a new worldwide social order, a new chapter in human history called the Aquarian dispensation. The huge conspiracy propounded by false prophets and some New Age writers, whether overtly or covertly, feeds the fear and anxiety of ordinary people with unfounded apocalyptic propaganda. This book attempts to give the reader an accurate perspective regarding the planetary transformations that are taking place; it offers hope and inspiration as we approach the Golden Age.

Ennobling Japan's Savage Northeast Nathan Hopson,2020-10-26 Ennobling Japan's Savage Northeast is the first comprehensive account in English of the discursive life of the Tōhoku region in postwar Japan from 1945 through 2011. The Northeast became the subject of world attention with the March 2011 triple disaster of earthquake, tsunami, and nuclear meltdown. But Tōhoku's history and significance to emic understandings of Japanese self and nationhood remain poorly understood. When Japan embarked on its quest to modernize in the mid-nineteenth century, historical prejudice, contemporary politics, and economic calculation together led the state to marginalize Tōhoku, creating a "backward" region in both fact and image. After 1945, a group of mostly local intellectuals attempted to overcome this image and rehabilitate the Northeast as a source of new national values. This early postwar Tōhoku recuperation movement has proved to be a critical source for the new Kyoto school's neoconservative valorization of native Japanese identity, fueling that group's antimodern, anti-Western discourse since the 1980s. Nathan Hopson unravels the contested postwar meanings of Tōhoku to reveal the complex and contradictory ways in which that region has been incorporated into Japan's shifting self-images since World War II.

Dictionary of the c Inscriptions (2 vols) Hoftijzer, Karel Jongeling, 2015-11-02 The North-West Semitic epigraphic contributes considerably to our understanding of the Old Testament and of the Ugaritic texts and to our knowledge of the North-West Semitic languages as such. This dictionary is concerned with the North-West Semitic material found in inscriptions, papyri and ostraca in Phoenician, Punic, Hebrew, various forms of Aramaic, Ammonite, Edomite, the language of Deir Alla et cetera. The material covers the period from ca. 1000 B.C. to ca. 300 A.D. Besides translations, the entries include discussions and full references to scholarly literature. The book is a translated, updated and considerably augmented edition of Jean & Hoftijzer, Dictionnaire des inscriptions sémitiques de l'ouest. The additions concern newly found texts as well as references to new scholarly literature. The book is an indispensable tool for research in North-West Semitic epigraphy, on the Old Testament and on Ugaritic texts, and for Semitic linguistics. Please note that this version is an unrevised reprint of the original version published in 1995.

Antwerp Royal Museum Annua l2013-2014 Paul Vandenbroeck, 2016-12-28 At various points over the course of the 20th century, the Belgian State and its various ministries and provinces consciously chose to subsidise not only the fine arts but also the applied and decorative arts, and in particular the art of weaving tapestry. On the one hand, orders were placed for World Exhibitions and for Belgian embassies, and on the other competitions were held for tapestries to be hung in important locations such as the United Nations and NATO headquarters, and the exhibitions that were organized by the various ministries over the years. They provided an overview of the ways in which this branch of the arts was changing as well as representative work by the best tapestry designers. The exhibitions organized by the provincial authorities give quite a different image. There were the highly conventional exhibitions of Brabantine tapestries to promote the craftsmanship of the province and there were the more innovative textile exhibitions. Taken as a whole, the commissions, competitions and exhibitions give a good overview of what was happening in Belgium in the field of tapestry over the period 1945-1980. They also make it clear what image was being projected abroad: that of a country with rich traditions, master craftsmanship in weaving, and in the 1970s some affiliation to the latest developments in European textile art.

12 Rules for Life Jordan B. Peterson, 2018-01-23 #1 NATIONAL BESTSELLER #1 INTERNATIONAL BESTSELLER What does everyone in the modern world need to know? Renowned psychologist Jordan B. Peterson's answer to this most difficult of questions uniquely combines the hard-won truths of ancient tradition with the stunning revelations of cutting-edge scientific research. Humorous, surprising and informative, Dr. Peterson tells us why skateboarding boys and girls must be left alone, what terrible fate awaits those who criticize too easily, and why you should always pet a cat when you meet one on the street. What does the nervous system of the lowly lobster have to tell us about standing up straight (with our shoulders back) and about success in life? Why did ancient Egyptians worship the capacity to pay careful attention as the highest of gods? What dreadful paths do people tread when they become resentful, arrogant and vengeful? Dr. Peterson journeys broadly, discussing discipline, freedom, adventure and responsibility, distilling the world's wisdom into 12 practical and profound rules for life. 12 Rules for Life shatters the modern commonplaces of science, faith and human nature, while transforming and ennobling the mind and spirit of its readers.

All Set Free Matthew J. Distefano, 2015-09-30 What is the ending to the human drama? Will all be reconciled to God in the end? Does God demand an altar, a corpse, and blood? Or, rather, is the Christian God set apart from all the other gods throughout history? All Set Free sets out to answer some of the more difficult questions Christians today are faced with. It will challenge the Augustinian understanding of hell and the Calvinist understanding of the atonement; replacing them with a more Christ-centered understanding of both doctrines. This book will also use the work of Rene Girard in order to reshape how many understand what it means to be human. Then and only then should we ask: Who is God? Come explore what has become Matthew's theological pilgrimage to this point. Come discover the God of peace.

The Evangelical Universalist Gregory MacDonald, 2012-11-15 Can an orthodox Christian, committed to the historic faith of the Church and the authority of the Bible, be a universalist? Is it possible to believe that salvation is found only by grace, through faith in Christ, and yet to maintain that in the end all people will be saved? Can one believe passionately in mission if one does not think that anyone will be lost forever? Could universalism be consistent with the teachings of the Bible? In The Evangelical Universalist the author argues that the answer is 'yes!' to all of these questions. Weaving together philosophical, theological, and biblical considerations, he seeks to show that being a committed universalist is consistent with the central teachings of the biblical texts and of historic Christian theology.

Semantics in Business Systems Dave McComb, 2004 The book illustrates how this applies to the future of application system development, especially how it informs and affects Web services and business rule-based approaches, and how semantics will play out with XML and the semantic Web. The book also contains a quick reference guide to related terms and technologies.
