Sustainable Culinary Systems C. Michael Hall, Gossling Stefan, 2013-01-04 There is increasing public and academic interest in local and sustainable foods and food tourism. These interests have been reflected in such diverse elements as the growth of farmers markets, green restaurants, food miles, carbon and sustainability labelling, concerns over food supply and security, Slow Food, Fair Trade, and a desire to buy and 'eat locally'. Food related hospitality and tourism is integral to this process because of the way in which it simultaneously acts to globalise and localise food consumption and create new foodways and commodity chains. This book therefore aims to provide an integrated understanding of the contemporary interest in food and food tourism through the use of an international collection of illustrative case study chapters as well as the provision of a novel integrative framework for the book, a sustainable culinary system. This is the first volume to examine the concept of sustainable culinary systems, particularly with specific reference to tourism and hospitality. Divided into two parts, firstly the notion of the local is explored, reflecting the increased interest in the championing of local food production and consumption. Secondly treatment of sustainability in food and food tourism and hospitality in settings that reach beyond the local in a business and socio-economic sense is reviewed. The book therefore, reflects much of the contemporary public interest in the conscious or ethical consumption and production of food, as well as revealing the inherent tensions between local and broader goals in both defining and achieving sustainable culinary systems and the environmental, social and economic implications of food production and consumption. This book provides the reader with an integrated approach to understanding the subject of how culinary systems may be made more sustainable and will be valuable reading to all those interested in sustainable food and food tourism.

Toward an Integrative Medicine Hans A. Baer, 2004 Baer's exciting new book chronicles the transformation of the holistic health movement as it increasingly influences the delivery of health care in America. He describes the battle for legitimacy by alternative therapeutic practitioners, and the increasing interest by the biomedical profession in the possibilities of a complementary and integrative medical system. Baer shows ironically, how the holistic movement may ultimately become more limited as it gains acceptance and is integrated into mainstream medicine.

Alternative Systems for Piggery Effluent Treatment, 2000 FSA Environmental, was commissioned by the Environment Protection Agency (SA) and the Rural City of Murray Bridge to prepare a report on alternative effluent systems that are available that would reduce the odour impact from piggeries. Specifically the report needed to give an estimation of the economic impact of the systems, including the extra costs involved and an indication of what size the systems may prove to be economically viable.

Wizardry Michael Humphreys, 2011-03-03 Much of the credit for helping the Red Sox win the World Series went to a more scientific approach to baseball statistics, dubbed sabermetrics by its greatest proponent, Bill James. But one aspect of the game has defied quantification: the number of runs individual fielders save. Traditional fielding statistics count errors and plays made, but not hits fielders 'should' have reached. Major League teams have recently addressed this gap using proprietary records of the location of every batted ball, but the underlying data has been kept secret and will never exist for the first century of modern major league baseball history. Now, in *Wizardry*, comes the long-awaited breakthrough, Defensive Runs (or Regression) Analysis (DRA), created by Michael A. Humphreys. Drawing on entirely public information available to any fan, and using clear concrete examples, Humphreys demonstrates how to apply classic statistical methods to estimate runs saved by fielders going back to 1893. Humphreys tests

his results against other fielding measures, including published ratings based on proprietary batted ball location data, and explains their respective strengths and limitations. More than that, Humphreys introduces the first method for adjusting historical player ratings to take into account the expansion of baseball's talent pool due to population growth, integration, and international recruitment. From shortstop to left fielder, he presents and defends his list of the greatest fielders of all time with anecdote-rich essays. And he caps off this book with extensive on-line appendices, including downloadable files of single-season DRA ratings for every fielder since 1893. Sabermetrics changed baseball and introduced a generation of young people to the art of statistical inference. Now a seasoned analyst makes the case for the biggest changes in historical player valuations in decades, while opening up new approaches for further exploration.

Art and Visibility in Migratory Culture Mieke Bal,Miguel Á. Hernández-Navarro,2011-01-15 This book explores the idea that art can enact small-scale resistances against the status quo in the social domain. These acts, which we call “little resistances,” determine the limited yet potentially powerful political impact of art. From different angles, seventeen authors consider the spaces where art events occur as “political spaces,” and explore how such spaces host events of disagreements in migratory culture. The newly coined word “migratory” refers to the sensate traces of the movements of migration that characterize contemporary culture. In other words, movement is not an exceptional occurrence in an otherwise stable world, but a normal, generalized process in a world that cannot be grasped in terms of any given notion of stability. Thus the book offers fresh reflections on art’s power to move people, in the double sense of that verb, and shows how it helps to illuminate migratory culture’s contributions to this process.
