**Blindsight** Peter Watts, 2006-10-03 Hugo and Shirley Jackson award-winning Peter Watts stands on the cutting edge of hard SF with his acclaimed novel, *Blindsight* Two months since the stars fell... Two months of silence, while a world held its breath. Now some half-derelict space probe, sparking fitfully past Neptune's orbit, hears a whisper from the edge of the solar system: a faint signal sweeping the cosmos like a lighthouse beam. Whatever's out there isn't talking to us. It's talking to some distant star, perhaps. Or perhaps to something closer, something en route. So who do you send to force introductions with unknown and unknowable alien intellect that doesn't wish to be met? You send a linguist with multiple personalities, her brain surgically partitioned into separate, sentient processing cores. You send a biologist so radically interfaced with machinery that he sees x-rays and tastes ultrasound. You send a pacifist warrior in the faint hope she won't be needed. You send a monster to command them all, an extinct hominid predator once called vampire, recalled from the grave with the voodoo of recombinant genetics and the blood of sociopaths. And you send a synthesist—an informational topologist with half his mind gone—as an interface between here and there. Pray they can be trusted with the fate of a world. They may be

more alien than the thing they've been sent to find. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

**Analytical Methods in Petroleum Upstream Applications** Cesar Ovalles, Carl E. Rechsteiner Jr., 2015-04-02 Effective measurement of the composition and properties of petroleum is essential for its exploration, production, and refining; however, new technologies and methodologies are not adequately documented in much of the current literature. *Analytical Methods in Petroleum Upstream Applications* explores advances in the analytical methods and instrumentation that allow more accurate determination of the components, classes of compounds, properties, and features of petroleum and its fractions. Recognized experts explore a host of topics, including: A petroleum molecular composition continuity model as a context for other analytical measurements A modern modular sampling system for use in the lab or the process area to collect and control samples for subsequent analysis The importance of oil-in-water measurements and monitoring The chemical and physical properties of heavy oils, their fractions, and products from their upgrading Analytical measurements using gas chromatography and nuclear magnetic resonance (NMR) applications Asphaltene and heavy ends analysis Chemometrics and modeling approaches for understanding petroleum composition

and properties to improve upstream, midstream, and downstream operations. Due to the renaissance of gas and oil production in North America, interest has grown in analytical methods for a wide range of applications. The understanding provided in this text is designed to help chemists, geologists, and chemical and petroleum engineers make more accurate estimates of the crude value to specific refinery configurations, providing insight into optimum development and extraction schemes.

**Practical Dojo Projects** Frank Zammetti, 2008-10-20 The era of professional JavaScript development has arrived! Gone are the days when writing all the client-side code for your applications by hand yourself was the norm. Gone are the days when scrounging around the Internet to find a snippet of code to do something you need could lead to either decent code or utter garbage that you'd surely regret using later. No, writing high-quality JavaScript these days is a whole lot easier with the advent of top-notch libraries that save you time and effort, and one that stands out from most others is Dojo. Dojo is a library like few others: written by some of the best JavaScript coders around today, providing nearly everything you'll need to write modern rich Internet applications, all in one place. game! By the time you've finished reading, you'll have a firm grasp on what Dojo is all about, and you'll have the preparation you need to begin to use it yourself in your own projects. See you inside!

**Icehenge** Kim Stanley Robinson, 2014-01-07 An early novel from Science Fiction legend Kim Stanley Robinson, now available for the first time in decades: Icehenge. On the North Pole of Pluto there stands an enigma: a huge circle of standing blocks of ice, built on the pattern of Earth's Stonehenge-but ten times the size, standing alone at the farthest reaches of the Solar System. What is it? Who came there to build it? The secret lies, perhaps, in the chaotic decades of the Martian Revolution, in the lost memories of those who have lived for centuries. Competition Policy and Intellectual Property in Today's Global Economy  
Robert D. Anderson, Nuno Pires de Carvalho, Antony Taubman, 2021-08-05 The fast-evolving relationship between the promotion of welfare-enhancing competition and the balanced protection of intellectual property (IP) rights has attracted the attention of policymakers, analysts and scholars. This interest is inevitable in an environment that lays ever greater emphasis on the management of knowledge and innovation and on mechanisms to ensure that the public derives the expected social and economic benefits from this innovation and the spread of knowledge. This book looks at the positive linkage between IP and competition in jurisdictions around the world, surveying developments

and policy issues from an international and comparative perspective. It includes analysis of key doctrinal and policy issues by leading academics and practitioners from around the globe and a cutting-edge survey of related developments across both developed and developing economies. It also situates current policy developments at the national level in the context of multilateral developments, at WIPO, WTO and elsewhere.

*NATO in Afghanistan* Sten Rynning, 2012-09-26 The war in Afghanistan has run for more than a decade, and NATO has become increasingly central to it. In this book, Sten Rynning examines NATO's role in the campaign and the difficult diplomacy involved in fighting a war by alliance. He explores the history of the war and its changing momentum, and explains how NATO at first faltered but then improved its operations to become a critical enabler for the U.S. surge of 2009. However, he also uncovers a serious and enduring problem for NATO in the shape of a disconnect between high liberal hopes for the new Afghanistan and a lack of realism about the military campaign prosecuted to bring it about. He concludes that, while NATO has made it to the point in Afghanistan where the war no longer has the potential to break it, the alliance is, at the same time, losing its own struggle to define itself as a vigorous and relevant entity on the world stage. To move forward, he argues, NATO allies must recover their common purpose as a Western alliance, and he outlines options for change.

**Surveillance and Control in Israel/Palestine** Elia Zureik, David Lyon, Yasmeen

Abu-Laban,2010-12-13 Surveillance is always a means to an end, whether that end is influence, management or entitlement. This book examines the several layers of surveillance that control the Palestinian population in Israel and the Occupied Territories, showing how they operate, how well they work, how they are augmented, and how in the end their chief purpose is population control. Showing how what might be regarded as exceptional elsewhere is here regarded as the norm, the book looks not only at the political economy of surveillance and its technological and military dimensions, but also at the ordinary ways that Palestinians in Israel and the occupied territories are affected in their everyday lives. Written in a clear and accessible style by experts in the field, this book will have large appeal for academic faculty as well as graduate and senior undergraduate students in sociology, political science, international relations, surveillance studies and Middle East studies.

**International Economic Law and National Autonomy** Susy Frankel,2010-10-14 International commitments may sit uneasily with national pressures in the best of times. This age of economic uncertainty brings these tensions into sharper relief. This volume draws together thirteen analyses of this tension in a wide array of contexts, including each of the three main pillars of the World Trade Organization, international investment law and arbitration, and the international financial institutions. The essays feature internationally recognised experts addressing topical examples of international economic law

obligations clashing with domestic political interests. For example, Professor Robert Howse, of New York University Law School, addresses issues of globalization and whether international and national interests can in today's world be considered separate, while Ko-Yung Tung, the former Director-General of the World Bank, looks at trends in investment treaty arbitration and considers what the future may hold in light of the recent financial crisis, the rise of China as an economic powerhouse, and other factors.

**African Border Disorders** Olivier J. Walther, William F.S. Miles, 2017-09-01  
Since the end of the Cold War, the monopoly of legitimate organized force of many African states has been eroded by a mix of rebel groups, violent extremist organizations, and self-defence militias created in response to the rise in organized violence on the continent. *African Border Disorders* explores the complex relationships that bind states, transnational rebels and extremist organizations, and borders on the African continent. Combining cutting edge network science with geographical analysis, the first part of the book highlights how the fluid alliances and conflicts between rebels, violent extremist organizations and states shape in large measure regional patterns of violence in Africa. The second part of the book examines the spread of Islamist violence around Lake Chad through the lens of the violent Nigerian Islamist group Boko Haram, which has evolved from a nationally-oriented militia group, to an internationally networked organization. The

third part of the book explores how violent extremist organizations conceptualize state boundaries and territory and, reciprocally, how do the civil society and the state respond to the rise of transnational organizations. The book will be essential reading for all students and specialists of African politics and security studies, particularly those specializing on fragile states, sovereignty, new wars, and borders as well as governments and international organizations involved in conflict prevention and early intervention in the region.

*Non-Resident Non-Person Position, Form #05.020* Sovereignty Education and Defense Ministry (SEDM), 2020-02-06 Describes and defends the Non-Resident Non-Person Position that is the foundation of this website.

Existentialism and Contemporary Cinema Jean-Pierre Boulé, Enda McCaffrey, 2011-10-30 At the heart of this volume is the assertion that Sartrean existentialism, most prominent in the 1940s, particularly in France, is still relevant as a way of interpreting the world today. Film, by reflecting philosophical concerns in the actions and choices of characters, continues and extends a tradition in which art exemplifies the understanding of existentialist philosophy. In a scholarly yet accessible style, the contributors exploit the rich interplay between Sartre's philosophy, plays and novels, and a number of contemporary films including *No Country for Old Men*, *Lost in Translation* and *The Truman Show*, with film-makers including the Dardenne brothers, Michael Haneke, and Mike Leigh. This volume will be of

interest to students who are coming to Sartre's work for the first time and to those who would like to read films within an existentialist perspective.
