God's Gift, World's Deception Christos Retoulas, 2022-08 Situating former Harvard neurosurgeon Dr. Eben Alexander's Near-Death Experience within the ontological landscape of Romanity, or, the 'Byzantine'-Ottoman Continuum of Roman Ecumenicity, namely: Judaism, Christianity, and Islam, *God's Gift, World's Deception* is a unique exploration of this unique NDE, attesting to its vital and organic ties to those experiences of the New Testament Fathers of the 'Byzantine' Apostolic Catholic Orthodox Church (ἡ τῶν πάντων ἐνότης, the unity of all being/existents), which came to them via theosis. The book claims that Dr. Alexander's experience is indeed a continuation and completion of the theophanic visions of the Old Testament Prophets, and is linked to the imaginal divine becomings of the Koranic Ottoman vahdet-i vücud tasavvuf Masters ('the unity-of-Being' Sufism, in both Sunni and Alevi traditions); but also highlights the distorting effects of the interpretive resources available in the predominantly neo-Gnostic-cratic West (religious and secular), as well as its Globalist agenda, creating an unfit backdrop for an exegetical attempt at the Proof of Heaven Experience. Ultimately, *God's Gift, World's Deception* reconfirms the engendered existence of the Divine-human Ecumene as a historically spiritual-somatic reflection of the Divine Realm, and, above all, it shows the Theanthropic Lord Jesus Christ as the True Om, the Real Hakikat-ı Muhammediyye, and the Eternal Tao.

Toward a Cyberlegal Culture: Legal Research on the Frontier of Innovation, 2nd Edition Mirela Roznovschi, 2021-11-15 Although universal on-line access to legal information has vastly expanded the lawyer's practical resources, it does not come with a clear and reliable methodology. A fundamental shift in approach is necessary to understand its enormous transformation of the legal research process; using it requires a new set of procedures amounting to the assimilation of a new legal culture. Now for the first time this new 'cyberlegal' culture is fully set forth in a way that makes its great benefits available to all legal practitioners and law librarians. This volume provides an in-depth analysis of the new legal infrastructure inherent in the internationalisation of legal research via the internet. It presents dependable strategies for navigating efficiently in the virtual reality environment, with special attention to the librarian's role in shaping legal database interfaces. It thoroughly explains how the law library's mission is restructured, adding a teaching dimension to its traditional role as a reference service. The author describes the skills and managerial decisions that characterise the cyberlegal culture, showing the reader exactly how the cyberlegal information specialist conducts substantive legal research. She spells out the guiding principles on evaluating databases, other online legal research tools, and the 'linked thinking' capabilities of the internet.
