Arabic Language and Its Linguistics N.U. AHMED,2018-02-05 Arabic Language and its Linguistics is an important book for knowing the source of Arabic language and its linguistic aspect as well. Arabic is the youngest living representative of Semitic languages and it has occupied a vital role in the linguistic scenario of the present world. It carries information of robust culture in the Middle East, Africa and Asia. Importance of Arabic increased to a great extent for its being a commercial language in the international markets of the world. In fact, Arabic achieved the status of official and working language on December 18, 1973, in the domain of the United Nations. Affords are also made in this book to highlight the common linguistics along with the Arabic language and its linguistics in a befitting manner.

Essentials of Quranic Arabic: Volume 2 Masood Ranginwala,2013-05-18 This second volume is a continuation of study from the first volume. It focuses on several advanced and intermediate Arabic grammar important in a higher level of Qur'inic study. This includes topics in Morphology, Irregular Verbs, and other topics found in Intermediate Arabic Grammar study. Similar to the first volume, numerous examples from the Qur'an have been given so that our focus is maintained. Review Questions are included in the back of this book on the chapters that have been detailed. The last three chapters are focused on more advanced discussions relative to Qur'anic Arabic such as Eloquence (Balagha) and the Inimitability of the Qu'ran.

Cyber Worship in Multifaith Perspectives Mohamed Taher,2006 Cyber Worship in Multifaith Perspectives, as is implied by its name, explores worship (i.e., Prayer, Praise, Scripture, Sacrament, Rituals, Confessions, Eucharist, Rites, Pilgrimages, Reflection, Contemplation, etc.) on the Internet. It is not an 'everything you need to know' guide about the subjects of faith and belief, religions-online, religions on the Net, or religions in cyberspace. Rather, it is a book about religious and spiritual experience under the rubric, cyber worship, which is the variety of ways religious devotion is performed and carried out on the Internet. The term 'Cyber Worship' is a catchall phrase, which includes variants such as online worship, virtual worship, electronic prayer, cyber puja, cyber synagogue, and so on. Dr. Mohamed Taher has thus assembled a quick reference for two groups: those communities that are involved in Cyber Worship and business Webs that collaborate in sustaining wired environments. As such, this book provides an interesting and current perspective on a practice that will continue to grow in the future.

Arabic and Chinese Handwriting Recognition David Doermann,Stefan Jaeger,2008-03-13 In the fall of 2006, the University of Maryland, along with various government and industrial sponsors, invited leading researchers from all over the world to a two-day Summit on Arabic and Chinese Handwriting Recognition (SACH 2006). The event acted as a complement to the biennial Symposium on Document Image Understanding Technology (SDIUT), providing a focused glimpse into the state of the art in Arabic and Chinese handwriting recognition. It offered a forum for interaction with prominent researchers at the forefront of the scientific community and provided an opportunity for participants to help explore possible directions of the field. This book is a result of the expansion, peer review, and revision of selected papers presented at this meeting. Handwriting recognition remains the Holy Grail of document analysis, and Arabic and Chinese scripts embrace many of the most significant challenges. We are pleased to have 16 scientific papers covering the original topics of handwritten Arabic and Chinese, as well as 2 papers covering other handwritten scripts. We asked each author to not only describe the techniques used in addressing the problem, but to attempt to identify the key research challenges and problems that the community faces. The result is an impressive collection of manuscripts that provide various detailed views of the state of research. In this book, six articles deal directly with Arabic handwriting. • Cheriet provides an overview of the problems of Arabic recognition and how systems can use natural language processing techniques to correct errors in lexicon-based systems.

Language Conflict and Language Rights William D. Davies,Stanley Dubinsky,2018-07-31 As the colonial hegemony of empire fades around the world, the role of language in ethnic conflict has become increasingly topical, as have issues concerning the right of speakers to choose and use their preferred language(s). Such rights are often asserted and defended in response to their being violated. The importance of understanding these events and issues, and their relationship to individual, ethnic, and national identity, is central to research and debate in a range of fields outside of, as well as within, linguistics. This book provides a clearly written introduction for linguists and non-specialists alike, presenting basic facts about the role of language in the formation of identity and the preservation of culture. It articulates and explores categories of conflict and language rights abuses through detailed presentation of illustrative case studies, and distills from these key cross-linguistic and cross-cultural generalizations.

Education and Curricular Perspectives in the Qur'an Sarah Risha,2014-12-11 Education and Curricular Perspectives in the Qur'an focuses on different perspectives of curriculum as presented in the central text of Islam. Relying heavily on the Qur'an itself, and sayings of the Prophet Mohammed when necessary, Risha addresses five aspects in particular to examine how the Qur'an connects to current academic curriculum studies.

The Undergraduate's Companion to Arab Writers and Their Web Sites Dona S. Straley,2004-08-30 This companion provides information on the lives and works of about 150 authors who write primarily in Arabic, covering the first known works of Arabic literature in the 5th and 6th centuries A.D. to the present day. While concentrating on literary authors, writers from the fields of history, geography, and philosophy are also represented. The individuals represented were chosen primarily from the Encyclopedia of Arabic Literature. Among the major authors are Najib Mahfuz, the 1988 Nobel laureate; Nawal Saadawi, the Egyptian physician who is the leading female literary author in the Arab world and the most frequently translated into English; Abu al-Ala' al-Ma'arri, the 11th century poet whose verses are taught to every Arab schoolchild; and Avicenna, the great physician and philosopher, transmitter and interpreter of Aristotle, whose work on medicine was long the standard not only in the Middle East but also (in Latin translation) in Europe. In addition, entries will be included for the anonymous romances so common in Arabic literature, such as The Arabian Nights, a cycle of stories perhaps even better known in the West than in the Arab world. Interest in the history and culture of the Arab world at U.S. universities has taken a quantum leap since the events of September 11, 2001. In this book, the author demonstrates that at least three major, distinct literary and cultural traditions are included within the fields of Middle Eastern and Islamic studies—Arabic, Persian, and Turkic. The Arabic tradition is the oldest, largest, and most widely dispersed. Undergraduate courses in Arabic literature and culture are now being taught at both lower- and upper-levels at many universities. Such courses are often used by undergraduates to fulfill basic educational requirements for their degrees. Students in such courses often have difficulty finding information on Arab writers, and this volume fills the void.

Religion in Contemporary Nigeria Y.A. Quadri,2016-04-30 The dynamism of religion all over the world presupposes that discourse on it generally is a continuous exercise. As religion influences the environment of its operation so also is the influence of the environment on the practice of religion. Nigeria, a multi-religious nation has experienced and is still experiencing the positive as well the negative aspects of religious practices in her socio-political, economic and cultural spheres. There is no doubt that religion is manipulated by some people, which portray it in bad light and makes it vulnerable to criticisms despite the unanimity about its potential to be a force for good in the society. Recent developments in Nigeria indicate that religion has a role in the survival or otherwise of the country. Such include the re-introduction of Sharicah penal code in some states in the northern part of the country, the emergence of Islamic banks, proliferation of private faith-based tertiary institutions, emergence of different factions and sects in religions and the challenge of

insurgency using religion as camouflage in the name of the Boko Haram. This book addresses contemporary issues in the use of religion in Nigeria. Its uniqueness lies in the calibre of notable scholars who contributed to it from various ethno-religious and geographical backgrounds. It contains the views of eminent scholars from Islam and Christianity and is jointly edited by experienced professors in the two faiths. The overall aim is to enhance better understanding of religion and to promote peaceful co-existence between and among adherents of the two religions.

Recent Innovations in Artificial Intelligence and Smart Applications Mostafa Al-Emran,Khaled Shaalan,2022-10-01 This book tackles the recent research trends on the role of AI in advancing automotive manufacturing, augmented reality, sustainable development in smart cities, telemedicine, and robotics. It sheds light on the recent AI innovations in classical machine learning, deep learning, Internet of Things (IoT), Blockchain, knowledge representation, knowledge management, big data, and natural language processing (NLP). The edited book covers empirical and reviews studies that primarily concentrate on the aforementioned issues, which would assist scholars in pursuing future research in the domain and identifying the possible future developments of AI applications.

Advances in Computer and Information Sciences and Engineering includes selected papers from the conference proceedings of the International Conference on Systems, Computing Sciences and Software Engineering (SCSS 2007) which was part of the International Joint Conferences on Computer, Information and Systems Sciences and Engineering (CISSE 2007).

Where Islam and Judaism Join Together Shai Har-El,2014-07-02 Introducing a framework to generate new conversations about inter-religious dialogue and create a community of religions, Shai Har-El argues that Islam and Judaism, sister religions, are closely related to one another with roots intertwined in the land, in the language, and in the memories of shared history.

Gusher of Lies Robert Bryce,2008-03-04 Everybody is talking about "energy independence." But is it really achievable—or even desirable? In this controversial, meticulously researched book, Robert Bryce exposes the false promises and political posturing behind the rhetoric. Gusher of Lies explains why the idea of energy independence appeals to voters while also showing that renewable sources like wind and solar cannot meet America's growing energy demand. Along the way, Bryce exposes the ethanol scam as one of the longest-running robberies ever perpetrated on American taxpayers. In a new foreword to this edition, he shows how energy independence rhetoric was used during the 2008 election, even as the heavily subsidized ethanol business fueled a growing global food crisis.

Intellectual Property and Development Rami M. Olwan,2013-03-15 The book examines the correlation between Intellectual Property Law – notably copyright – on the one hand and social and economic development on the other. The main focus of the initial overview is on historical, legal, economic and cultural aspects. Building on that, the work subsequently investigates how intellectual property systems have to be designed in order to foster social and economic growth in developing countries and puts forward theoretical and practical solutions that should be considered and implemented by policy makers, legal experts and the Word Intellectual Property Organization (WIPO).

Saudi Arabia Sherifa Zuhur,2012-01-05 This book describes all aspects of Saudi Arabia, including its government, economy, society, and culture, as well as its role in the Middle East and its position internationally. In this comprehensive introduction to the Kingdom of Saudi Arabia, author Sherifa Zuhur reveals the fascinating people, culture, politics, and economic development of the largest Arab country of the Middle East. The book provides a detailed summary of Arabian history from the earliest settlements on the Arabian peninsula to the present day, with a focus on the rise of the current Saudi regime. It provides essential background on the oil politics of the Kingdom dating back to the discovery of oil in the late 1930s, an account of Saudi Arabia's subsequent economic advancement, and explanations of emerging societal issues such as labor importation and the changing roles of women. Saudi Arabia also details the Kingdom's cultural and religious milieu, including its music, poetry, architecture, legal system, and prominence in the Islamic world.

Babel und Bibel 3 Leonid E. Kogan,Natalia Koslova,Sergey Loesov,Serguei Tishchenko,2007-06-23 This is the third volume of Babel & Bibel, an annual of ancient Near Eastern, Old Testament, and Semitic studies. The principal goal of the annual is to reveal the inherent relationship between Assyriology, Semitics, and biblical studies—a relationship that our predecessors comprehended and fruitfully explored but that is often neglected today. The title Babel & Bibel is intended to point to the possibility of fruitful collaboration among the three disciplines, in an effort to explore the various civilizations of the ancient Near East. The tripartite division of Babel & Bibel corresponds to its three principal spheres of interest: ancient Near Eastern, Old Testament, and Semitic studies. Contributions are further subdivided into articles, short notes, and reviews.

Recovering the Female Voice in Islamic Scripture Georgina L. Jardim,2016-04-08 Protest is an activity not associated with the pious and collectively-minded, but more often seen as an activity of the liberal and rebellious. Judaism, Christianity and Islam are commonly understood as paragons of submission and obedience following Abraham's example. Yet, the scriptures of all three faiths are founded in the prophets protesting wrongs in the social order. The Qur'an claims that men and women, and the relations between them are a sign from God. The question is to what extent are women silenced in the text, and do they share with men in shaping the prophetic scriptures? This book finds that far from silencing women, the Qur'an affirms the female voice as protester for justice and as questioner of Theology. In this reading of the female role in divine revelation in the Islamic text, Georgina Jardim returns to the scriptures of the Judeo-Christian counterpart of the Abrahamic faiths, to investigate whether the Bible may claim women as brokers of revelation. The result is an enriched understanding of divine communication in the Abrahamic scriptures and a commonplace for reasoning about the female voice as speaker in the Word of God.

Holy Places in the Israeli-Palestinian Conflict Marshall J. Breger,Yitzhak Reiter,Leonard Hammer,2009-12-16 This book addresses the major generators of conflict and toleration at shared holy places in Palestine and Israel. Examining the religious, political and legal issues, the authors show how the holy sites have been a focus of both conflict and cooperation between different communities. Bringing together the views of a diverse group of experts on the region, Holy Places in the Israeli-Palestinian Conflict provides a new and multifaceted approach to holy places, giving an in-depth analysis of relevant issues. Themes covered include legal regulation of holy places; nationalization and reproduction of holy space; sharing and contesting holy places; identity politics; and popular legends of holy sites. Chapters cover in detail how recognition and authorization of a new site come about; the influence of religious belief versus political ideology on the designation of holy places; the centrality of such areas to the surrounding political developments; and how historical background and culture affect the perception of a holy site and relations between conflicting groups. This new approach to the study of holy places and the Israeli-Palestinian conflict has great significance for a variety of disciplines, and will be of great interest in the fields of law, politics, religious studies, anthropology and sociology.
