Cyber Worship in Multifaith Perspectives Mohamed Taher,2006 Cyber Worship in Multifaith Perspectives, as is implied by its name, explores worship (i.e., Prayer, Praise, Scripture, Sacrament, Rituals, Confessions, Eucharist, Rites, Pilgrimages, Reflection, Contemplation, etc.) on the Internet. It is not an 'everything you need to know' guide about the subjects of faith and belief, religions-online, religions on the Net, or religions in cyberspace. Rather, it is a book about religious and spiritual experience under the rubric, cyber worship, which is the variety of ways religious devotion is performed and carried out on the Internet. The term 'Cyber Worship' is a catchall phrase, which includes variants such as online worship, virtual worship, electronic prayer, cyber puja, cyber synagogue, and so on. Dr. Mohamed Taher has thus assembled a quick reference for two groups: those communities that are involved in Cyber Worship and business Webs that collaborate in sustaining wired environments. As such, this book provides an interesting and current perspective on a practice that will continue to grow in the future.

The State of the American Empire Stephen Burman,2013-10-31 As the United States casts an increasingly dominant shadow in world affairs, resentment from the international community widens. In The State of the American Empire, Stephen Burman lays bare the global scope of the political, economic, cultural, and military might of a country that, paradoxically, was founded in a rebellion against imperialism. Combining forensic analysis with detailed full-color graphics, Burman provides a comprehensive overview of the countries that are dependent on U.S. trade or investment, or are inhabited by U.S. troops. Liberally illustrated with maps that display America's global footprint, from its military interventions to its trading partners, The State of the American Empire interrogates every aspect of this new empire to reveal its roots, its likely duration, and, most important, its impact on the rest of the world.

We are the oldest, most central discipline in the academy, and we are responsible for modernity. This is Philosophy: An Introduction expertly guides the student into this powerhouse of thought, giving them a solid grounding across a wide variety of key topics in philosophy. American Yachts in Naval Service Kenneth Howard Goldman,2020-11-09 Before there was a U.S. Navy, several Colonial navies were all-volunteer--both the crews and the vessels. From its beginnings through World War II, the Navy has relied on civilian sailors and their fast vessels to fill out its ranks of small combatants. Beginning with the birth of the yacht in the Netherlands in the 17th century , this illustrated history traces the development of yacht racing, the advent of combustion-engine power and the contribution privately owned vessels have made to national defense. Vessels conscripted during the Civil War served both the Union and Confederacy--sometimes changing sides after capture. The first USS Wanderer saw the slave trade from both sides of the law. Aboard the USS Sylph, Oscar-winning actor Ernest Borgnine fought the Third Reich's U-boats under sail. USS Sea Cloud made history as the first racially integrated ship in the Navy, three years before President Truman desegregated the military.

Quid Pro Quirk James McClinton, PhD,2014-04-28 Have you ever read a Bible passage that seemed to contradict other Scriptures, or simply didn't make sense? Have you ever wanted to answer a skeptic who insisted the Bible was full of errors, but didn't know how to respond? Do you hesitate to share your faith because you don't know what you believe—or why you believe it? Quid Pro Quirk seeks to resolve such issues and help you share the reason for the hope that is within you (1 Peter 3:15). In a legal context, the Latin phrase quid pro quo means to exchange “something for something,” or “this for that.” Quid Pro Quirk uses a courtroom setting to exchange plausible explanations for alleged Bible quirks. The compelling explanations can give you confidence as you add to your knowledge and understanding of God's Word. In Quid Pro Quirk, the prosecution begins with an opening statement establishing the background behind each alleged quirk and then finishes with a specific charge. The defense responds, using the Bible and other sources to dispute the charge. After considering all of the evidence, you act as judge and jury in rendering an informed verdict. Quid Pro Quirk's explanations are as brief and concise as possible, and yet remain faithful to the letter and spirit of God's Word in responding to a broad spectrum of charges. A handy reference source for the layman that avoids dry and endless rhetoric, Quid Pro Quirk focuses on the key facts that can bless you in your quest for God's truth.

Cognitive Requirements for Information Operations Training (CRIOT) ,1999 The advent of battlefield digitization increases the work trainers for live force-on-force exercises must do to control exercises and provide feedback to units, and it will pull trainers at platoon and company level out of the tactical information loop. The goal of this study was to describe instrumentation capabilities with the potential for reducing workloads and pulling trainers back into the information loop for exercises at the Army's maneuver combat training centers (CTCs) and at home stations. This study documents the experiences of approximately seventy of the National Training Center (NTC) observer/controllers (OCs) and analysts that participated in the training of the Army's first digitized brigade during the Force XXI Army warfighting Experiment (AWE). To gain a better understanding of what is required to support digital training, the study team reviewed emerging tactical doctrine from platoon through battalion task force level to develop a sample of potential digital training points and then designed displays that would help a trainer monitor unit performance with respect to these points. The team then defined the capabilities a workstation would need to create these displays. This report describes, defends and illustrates twenty workstation capabilities that support exercise control and feedback for digitized units.--DTIC.
