Blogwars David D. Perlmutter,2008-03-07 Political blogs have grown astronomically in the last half-decade. In just one month in 2005, for example, popular blog DailyKos received more unique visitors than the population of Iowa and New Hampshire combined. But how much political impact do bloggers really have? In *Blogwars*, David D. Perlmutter examines this rapidly burgeoning phenomenon, exploring the degree to which blogs influence--or fail to influence--American political life. Challenging the hype, Perlmutter points out that blogs are not that powerful by traditional political measures: while bloggers can offer cogent and convincing arguments and bring before their readers information not readily available elsewhere, they have no financial, moral, social, or cultural leverage to compel readers to engage in any particular political behavior. Indeed, blogs have scored mixed results in their past political crusades. But in the end, Perlmutter argues that blogs, in their wide dissemination of information and opinions, actually serve to improve democracy and enrich political culture. He highlights a number of the particularly noteworthy blogs from the specialty to the superblog-including popular sites such as Daily Kos, The Huffington Post, Powerlineblog, Instapundit, and Talking Points Memo--and shows how blogs are becoming part of the tool kit of political professionals, from presidential candidates to advertising consultants. While the political future may be uncertain, it will not be unblogged. For many Internet users, blogs are the news and editorial sites of record, replacing traditional newspapers, magazines, and television news programs. *Blogwars* offers the first full examination of this new and controversial force on America's political landscape.

Cyber Worship in Multifaith Perspectives Mohamed Taher,2006 *Cyber Worship in Multifaith Perspectives*, as is implied by its name, explores worship (i.e., Prayer, Praise, Scripture, Sacrament, Rituals, Confessions, Eucharist, Rites, Pilgrimages, Reflection, Contemplation, etc.) on the Internet. It is not an 'everything you need to know' guide about the subjects of faith and belief, religions-online, religions on the Net, or religions in cyberspace. Rather, it is a book about religious and spiritual experience under the rubric, cyber worship, which is the variety of ways religious devotion is performed and carried out on the Internet. The term 'Cyber Worship' is a catchall phrase, which includes variants such as online worship, virtual worship, electronic prayer, cyber puja, cyber synagogue, and so on. Dr. Mohamed Taher has thus assembled a quick reference for two groups: those communities that are involved in Cyber Worship and business Webs that collaborate in sustaining wired environments. As such, this book provides an interesting and current perspective on a practice that will continue to grow in the future.

Phoenix Rising Donald G. Lett,2008-02 In an age when the supply of gasoline to feed this modern American society has become both more expensive and more scarce questions are being pondered. Inquires like, How can a modern society scale back its dependence on gasoline as a motive source?' Are there genuine alternative power sources?' Are they the answer to a growing crisis?' Recent announcements of hybrids like those from Honda, Toyota, and Ford have really brought attention to this issue. Hybrids that use both gasoline engines and electric motors. Really, though, alternative power sources have been around for as long as the automobile has been. The battle between and among the steam car, the electric and the gas car was fought out in the first couple of decades of the twentieth century. This book explores the ins and outs of that battle. A struggle from which the gasoline car emerged completely victorious. To such an extent that steam cars and electric cars virtually disappeared from the scene for many decades. We will look over all three alternatives, exploring their advantages and disadvantages. We will also look over the obstacles to the steamers and the electrics. Barriers that still exist to a certain extent. Handicaps that caused their disappearance in the first place.
