Corruption in Commercial Enterprise Liz Campbell,Nicholas Lord,2018-04-17 This edited collection analyses, from multiple disciplinary perspectives, the issue of corruption in commercial enterprise across different sectors and jurisdictions. Corruption is commonly recognised as a major 'social bad', and is seriously harmful to society, in terms of the functioning and legitimacy of political-economic systems, and the day-to-day lives of individuals. There is nothing novel about bribes in brown envelopes and dubious backroom deals, ostensibly to grease the wheels of business. Corrupt practices like these go to the very heart of illicit transacting in both legal markets – such as kickbacks to facilitate contracts in international commerce – and illegal markets – such as payoffs to public officials to turn a blind eye to cross-border smuggling. Aside from the apparent pervasiveness and longevity of corruption in commercial enterprise, there is now renewed policy and operational attention on the phenomenon, prompting and meriting deeper analysis. Corruption in commercial enterprise, encompassing behaviours often associated with corporate and white-collar crime, and corruption in criminal commercial enterprise, where we see corruption central to organised crime activities, are major public policy issues. This collection gives us insight into their nature, organisation and governance, and how to respond most appropriately and effectively.

Charter Schools in Action Chester E. Finn, Jr.,Bruno V. Manno,Gregg Vanourek,2001-07-30 Can charter schools save public education? This radical question has unleashed a flood of opinions from Americans struggling with the contentious challenges of education reform. There has been plenty of heat over charter schools and their implications, but, until now, not much light. This important new book supplies plenty of illumination. Charter schools--independently operated public schools of choice--have existed in the United States only since 1992, yet there are already over 1,500 of them. How are they doing? Here prominent education analysts Chester Finn, Bruno Manno, and Gregg Vanourek offer the richest data available on the successes and failures of this exciting but controversial approach to education reform. After studying one hundred schools, interviewing hundreds of participants, surveying thousands more, and analyzing the most current data, they have compiled today's most authoritative, comprehensive explanation and appraisal of the charter phenomenon. Fact-filled, clear-eyed, and hard-hitting, this is the book for anyone concerned about public education and interested in the role of charter schools in its renewal. Can charter schools boost student achievement, drive educational innovation, and develop a new model of accountability for public schools? Where did the idea of charter schools come from? What would the future hold if this phenomenon spreads? These are some of the questions that this book answers. It addresses pupil performance, enrollment patterns, school start-up problems, charges of inequity, and smoldering political battles. It features close-up looks at five real--and very different--charter schools and two school districts that have been deeply affected by the charter movement, including their setbacks and triumphs. After outlining a new model of education accountability and describing how charter schools often lead to community renewal, the authors take the reader on an imaginary tour of a charter-based school system. Charter schools are the most vibrant force in education today. This book suggests that their legacy will consist not only of helping millions of families obtain a better education for their children but also in renewing American public education itself.

Reply to Faustus the Manichæan St. Augustine,A M Overett,2018-08-04 Written about the year 400. [Faustus was undoubtedly the acutest, most determined and most unscrupulous opponent of orthodox Christianity in the age of Augustin. The occasion of Augustin's great writing against him was the publication of Faustus' attack on the Old Testament Scriptures, and on the New Testament so far as it was at variance with Manichæan error. Faustus seems to have followed in the footsteps of Adimantus, against whom Augustin had written some years before, but to have gone considerably beyond Adimantus in the recklessness of his statements. The incarnation of Christ, involving his birth from a woman, is one of the main points of attack. He makes the variations in the genealogical records of the Gospels a ground for rejecting the whole as spurious. He supposed the Gospels, in their present form, to be not the works of the Apostles, but rather of later Judaizing falsifiers. The entire Old Testament system he treats with the utmost contempt, blaspheming the Patriarchs, Moses, the Prophets, etc., on the ground of their private lives and their teachings. Most of the objections to the morality of the Old Testament that are now current were already familiarly used in the time of Augustin. Augustin's answers are only partially satisfactory, owing to his imperfect view of the relation of the old dispensation to the new; but in the age in which they were written they were doubtless very effective. The writing is interesting from the point of view of Biblical criticism, as well as from that of polemics against Manichæism.--A.H.N.]

Rethinking European Spatial Policy as a Hologram Valeria Fedeli,2017-03-02 Bringing together case studies from several European countries, this book provides an in-depth examination of the evolution of European spatial policy. Contributors focus on changes to the design and implementation of European policies at both national and local levels and examine institutional change, particularly Europeanization, European governance and EU enlargement. Rhetorical, discursive and representational dimensions are also interlinked to explore synergies and conflicts. The volume offers an experimentation of new interpretative approaches to spatial planning which will prove essential to the international debate.

Governing Financial Services in the European Union Lucia Quaglia,2010-02-25 The global financial crisis that reached its peak in late 2008 has brought the importance of financial services regulation and supervision into the spotlight. This book examines the governance of financial services in the EU, asking who governs financial services in the EU, how and why, and explaining where the power lies in the policy-making process. It covers the main financial services: banking, securities, payments systems, clearing and settlement. Addressing the politics and public policy aspects of financial market integration, regulation and supervision in the European Union, this book conducts a theoretically-informed and empirically-grounded analysis of financial services governance from the establishment of Economic and Monetary Union (1999) and the launch of the Financial Services Action Plan (1999), to date. It also assesses the EU responses to the global financial crisis. Providing a reliable and unique insight into the politics of financial services regulation in the EU based on an extensive programme of interviews with policy makers and stakeholders across Europe, the book will be of great topical interest to students and scholars of European Union studies, political science and political economy.

Blindsight Peter Watts,2006-10-03 Hugo and Shirley Jackson award-winning Peter Watts stands on the cutting edge of hard SF with his acclaimed novel, *Blindsight* Two months since the stars fell... Two months of silence, while a world held its breath. Now some half-derelict space probe, sparking fitfully past Neptune's orbit, hears a whisper from the edge of the solar system: a faint signal sweeping the cosmos like a lighthouse beam. Whatever's out there isn't talking to us. It's talking to some distant star, perhaps. Or perhaps to something closer, something en route. So who do you send to force introductions with unknown and unknowable alien intellect that doesn't wish to be met? You send a linguist

with multiple personalities, her brain surgically partitioned into separate, sentient processing cores. You send a biologist so radically interfaced with machinery that he sees x-rays and tastes ultrasound. You send a pacifist warrior in the faint hope she won't be needed. You send a monster to command them all, an extinct hominid predator once called vampire, recalled from the grave with the voodoo of recombinant genetics and the blood of sociopaths. And you send a synthesist—an informational topologist with half his mind gone—as an interface between here and there. Pray they can be trusted with the fate of a world. They may be more alien than the thing they've been sent to find. At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

On First Principles Origen, 2013-12-09 Origen's *On First Principles* is a foundational work in the development of Christian thought and doctrine: it is the first attempt in history at a systematic Christian theology. For over a decade it has been out of print with only expensive used copies available; now it is available at an affordable price and in a more accessible format. *On First Principles* is the most important surviving text written by third-century Church father, Origen. Origen wrote in a time when fundamental doctrines had not yet been fully articulated by the Church, and contributed to the very formation of Christianity. Readers see Origen grappling with the mysteries of salvation and brainstorming how they can be understood. This edition presents G. W. Butterworth's trusted translation in a new, more readable format, retains the introduction by Henri de Lubac, and includes a new foreword by John C. Cavadini. As St. Gregory of Nazianzus, Doctor of the Church, wrote: "Origen is the stone on which all of us were sharpened."

Encyclopedia of Information Assurance - 4 Volume Set (Print) Rebecca Herold, Marcus K. Rogers, 2010-12-22 Charged with ensuring the confidentiality, integrity, availability, and delivery of all forms of an entity's information, Information Assurance (IA) professionals require a fundamental understanding of a wide range of specializations, including digital forensics, fraud examination, systems engineering, security risk management, privacy, and compliance. Some Developments in Research in Science and Mathematics in Sub-Saharan Africa Lorna Holtman, 2008 Much attention in late-developing countries is given to providing access to studies which allow school leavers to enter science and technology-related careers. This book reviews research related to the crucial dimension of epistemological

access to the disciplines of import, which students need as much as institutional access in order to improve their chances of success. A significant feature of this collection's research studies is that their empirical bases are highly localised, covering areas such as research methods, access, curriculum, instruction and assessment, and the relevance of science and mathematics education in Zimbabwe, Uganda, Swaziland, South Africa, Namibia, Malawi, Ghana and Lesotho. It is the outcome of a doctoral research capacity-development project, the Graduate Studies in Science, Mathematics and Technology Education (GRASSMATE).
