Detection of Intrusions and Malware, and Vulnerability Assessment Thorsten Holz, Herbert Bos, 2011-06-30 This book constitutes the refereed proceedings of the 8th International Conference on Detection of Intrusions and Malware, and Vulnerability Assessment, DIMVA 2011, held in Amsterdam, the Netherlands, in July 2011. The 11 full papers presented together with two short papers were carefully reviewed and selected from 41 initial submissions. The papers are organized in topical sections on network security, attacks, Web security, and host security.

Photographing Nature Ralph A. Clevenger, 2009-10-29 25 years of nature photography instruction in one gorgeous, full-color, hands-on course Anyone can photograph nature—just step outside and you're on location. But becoming a good nature photographer takes expert training. In *Photographing Nature*, Ralph Clevenger, whose images have appeared in such publications as *Nature's Best* and *National Geographic*, shares the techniques he's been personally using and teaching to aspiring photographers for the last 25 years in his popular nature photography course at the elite Brooks Institute. In this stunning, four-color course-in-a-book, each chapter opens with a spectacular photo spread from the natural world that Clevenger uses to illustrate themes and techniques essential to mastering nature photography. Just as he does in his classroom at Brooks, Clevenger explains how each photo was captured, the tools and techniques used, and typical problems related to capturing such a photo, along with solutions. Chapters also include sample Q&A sessions as well as assignments you can try yourself. By the time you've worked through all of the techniques in this beautiful, yet informative book, you'll not only photograph the world differently, you'll see it differently as well. With a foreword by George Lepp, one of North America's best-known contemporary outdoor and nature photographers.

Inside China's Automobile Factories Lu Zhang, 2015 In *Inside China's Automobile Factories*, Lu Zhang explores the current conditions, subjectivity, and collective actions of autoworkers in the world's largest and fastest-growing automobile manufacturing nation. Based on years of fieldwork and extensive interviews conducted at seven large auto factories in various regions of China, Zhang provides an inside look at the daily factory life of autoworkers and a deeper understanding of the roots of rising labor unrest in the auto industry. Combining original empirical data and sophisticated analysis that moves from the shop floor to national political economy and global industry dynamics, the book develops a multilayered framework for understanding how labor relations in the auto industry and broader social economy can be expected to develop in China in the coming decades.

Who's Driving Electric Cars Marcello Contestabile, Gil Tal, Thomas Turrentine, 2020-03-17 This book offers a comprehensive yet accessible snapshot of the latest consumer research on the adoption and use of electric vehicles. It discusses the importance of developing a better understanding of consumer behavior in relation to electric vehicles, and the advantages that can be gained from the growing number of electric vehicle users, who can now be studied directly. In turn, it systematically analyzes the leading markets for electric vehicles in North America, Europe and Asia. Bringing together the experience and expertise of

authoritative researchers and practicing professionals, the book shares a wide range of empirical data obtained at the national level and summarizes the general lessons learned. The last part of the book discusses policy-relevant insights, forecasts the future evolution of the field in terms of methods and data availability, and addresses several key questions that policymakers and other stakeholders are currently facing.

The Decline of the Traditional Pension G. A. (Sandy) Mackenzie, 2010-06-21
The traditional (final or average salary) pension that employers have provided their employees has suffered a huge decline in labor force coverage in the United Kingdom and the United States, and less severe declines in Canada and elsewhere. The traditional pension provides a precious measure of retirement security by paying retirees an annuity for life. This study compares developments in the countries just named and in Australia, Denmark, Germany, Japan, Netherlands, Sweden, and Switzerland to explain the forces behind the decline of the traditional pension and to contrast the experience of public sector employer-provided plans, where it remains dominant. Given the great value of the longevity insurance that the traditional plan provides, and the risks its diminished coverage entails, the book proposes a set of measures that either stem the decline or endow defined contribution pensions with some of the attributes of the traditional plan.
