*An Analytical Concordance of the Verb, the Negation and the Syntax in Egyptian Coffin Texts (2 vols)* Rami van der Molen, 2004-12-01 The present volume is the long-awaited concordance of the Egyptian coffin texts. It forms the sequel to A Hieroglyphic Dictionary of Egyptian Coffin Texts by the same author. In 1961 A. de Buck published his important seven-volume corpus

Egyptian Coffin Texts. The importance of these texts is considerable for a variety of reasons; they are one of the most important literary texts of classical Egypt; the many variants greatly enlarge our understanding of grammar and linguistic structures; the coffin texts are magical texts, the effectiveness of which depended upon the exact reproductions of the original spells. In this concordance the various readings of each lemma are provided in transliteration into the Latin alphabet, which makes the concordance easily accessible for those unable to read hieroglyphs. The material is divided into the morphological categories of the verb; within each category the verbs are treated in alphabetical order.

**Choctaw Crime and Punishment, 1884-1907** Devon Abbott Mihesuah,2012-11-13 During the decades between the Civil War and the establishment of Oklahoma statehood, Choctaws suffered almost daily from murders, thefts, and assaults—usually at the hands of white intruders, but increasingly by Choctaws themselves. This book focuses on two previously unexplored murder cases to illustrate the intense factionalism that emerged among tribal members during those lawless years as conservative Nationalists and pro-assimilation Progressives fought for control of the Choctaw Nation. Devon Abbott Mihesuah describes the brutal murder in 1884 of her own great-great-grandfather, Nationalist Charles Wilson, who was a Choctaw lighthorseman and U.S. deputy marshal. She then relates the killing spree of Progressives by Nationalist Silan Lewis ten years later. Mihesuah draws on a wide array of sources—even in the face of missing court records—to weave a spellbinding account of homicide and political intrigue. She painstakingly delineates a transformative period in Choctaw history to explore emerging gulfs between

Choctaw citizens and address growing Indian resistance to white intrusions, federal policies, and the taking of tribal resources. The first book to fully describe this Choctaw factionalism, Choctaw Crime and Punishment is both a riveting narrative and an important analysis of tribal politics.

*Physical Principles of Chemical Engineering* Peter Grassmann, 2013-10-22

Physical Principles of Chemical Engineering covers the significant advancements in the understanding of the physical principles of chemical engineering. This book is composed of 12 chapters that describe chemical unit processes through analogy with the unit of operations of chemical engineering. The introductory chapters survey the concept and principles of mass and energy balances, as well as the application of entropy. The next chapters deal with the probability and kinetic theories of gases, the physical aspects of solids, the different dispersed systems, and the principles and application of fluid dynamics. Other chapters discuss the property dimension and model theory; heat, mass, and momentum transfer; and the characteristics of multiphase flow processes. The final chapters review the model of rheological bodies, the molecular-kinetic interpretations of rheological behavior, and the principles of reaction kinetics. This book will prove useful to chemical engineers.

Trust Or Consequences Al Golin, 2004 This book shows what makes such strategies work, and reveals the eye-opening results of a survey of over 700 business professionals. The recent rash of corporate scandals?and the ensuing financial ruin of companies and their stockholders -- proves that even the bluest of blue chip businesses cannot bank on the blind faith of consumers and investors. More than ever, corporations must rebuild, restore, and strengthen bonds of trust. Al Golin has helped create trust strategies for

global business leaders including The Walt Disney Company, Hewlett-Packard, McDonald's, Toyota, Owens-Corning, and many others. In *Trust or Consequences*, he reveals how to: create an effective trust strategy determine the impact of trust issues on stakeholders assess trust-building performance and calculate the difficulty of restoring trust create a trust bank for saving deposits of good will to draw on as needed This invaluable resource offers tools for identifying trust opportunities, as well as numerous inside accounts of trust-building successes and failures by high-profile organizations and leaders. Filled with provocative ideas about why many companies overlook trust issues, *Trust or Consequences* brings the subject to center stage -- where it must remain if companies are to regain stakeholder loyalty and competitive advantage.

*Dye-sensitized Solar Cells* K. Kalyanasundaram,2010-08-03 The dye-sensitized solar cell (DSC) is a photovoltaic converter that mimics natural photosynthesis. Like green plants and algae it uses a molecular absorber, the dye, to harvest sunlight and generate electric charges. Dye-sensitized solar cells are poised to replace existing technologies in «low density» solar-

energy applications, especially in contexts where mechanical robustness and light weight is required. This book offers the first comprehensive look at this promising technology and aims to provide a graduate level text that brings together the fundamentals of DSC from three perspectives (materials, performance, and mechanistic aspects), as well as to serve as an advanced monograph that summarizes the key advances and lists the technical challenges remaining to be solved.

**Untersuchungen zum Expeditionswesen des ägyptischen Alten Reiches** Eckhard Eichler,1993 Eckard Eichler befasst sich in seiner Studie mit 280 ägyptischen Inschriften des Alten Reiches (ca. 2650-2150 v.Chr.) aus den Wüstengebieten Ägyptens, des Sudan und dem Sinai. Diese Expeditionsinschriften stammen von ägyptischen Arbeitern, die in den Randzonen des Niltals mit der Beschaffung von Rohstoffen – Bausteinen, Schmucksteinen und Metallen – befasst waren. Eichler untersucht die räumliche und die zeitliche Verteilung der Expeditionen, die Herkunft der beteiligten Personen und die Gliederung dieser Unternehmungen. Nach der Erörterung verschiedener Theorien zur Analyse der Wirtschaft früher Hochkulturen werden der weitere Gang der Expeditionsprodukte und ihre Funktion für die altägyptische Wirtschaft und für die Gesellschaft erforscht. Ein Exkurs befasst sich mit dem Militärwesen der Epoche.

**On Ancient Grammars of Space** Silvia Kutscher, Daniel A. Werning, 2013-12-18  
This volume presents new research by the Topoi group The Conception of Spaces in Language on the expression of spatial relations in ancient languages. The six articles in this volume discuss static and dynamic aspects of the spatial grammars of Ancient to Medieval Greek, Akkadian, Hittite, and Hieroglyphic Ancient Egyptian, as well as field data on eight modern languages (Arabic, Hebrew, English, German, Russian, French, Italian, and Spanish). Among the grams discussed are spatial particles, motion verbs, case and, most prominently, spatial prepositions. All ancient language data are fully explained in linguistic word-by-word glosses and are therefore accessible to scholars who are not themselves experts on the respective languages. Taken together, these contributions extend the scope of research on spatial grammar back to the third millennium BCE.
