The “Hidden” Prehistory of European Research Networking

Olivier Martin,2012-06-18 The main purpose of this book, which mostly covers the period 1984-1993, is about the history of European research networking. In particular, it strives to throw some light on some lesser known, sometimes forgotten, aspects of the European research networking history, as the EARN and EASInet initiatives from IBM but also DEC (EARN/OSI), thanks to operational pan-European networks, which were built during the period 1984-1990 thus allowing the start of operational European academic and research networking services in a very effective and swift manner. A secondary purpose of this article is to make a critical assessment of the political and technical achievements of the European NRENs and especially those of DANTE, the company set up by these same NRENs to build and operate a pan-European backbone interconnecting their national networking infrastructures as well as establishing international connections to other NRENs worldwide.

Spiritual Healing Cheryl Gnagey,2011-05-17 Hearts divided between the flesh and the Spirit know only heartache, but spiritual

healing takes place when God knits your heart back together with His love. We are living in tumultuous days. God knows us and is with us. What does He see in His children? Does He see them walking in victory? Does He see hearts that have been transformed, making His Holy Spirit's dwelling place one of holiness? Victory, transformation, holiness—most believers have no life knowledge of these truths, but their heads are crammed to overflowing with what they can tell you about them. Today's believer deeply needs a message of the availability of victory, of true heart transformation, and of holiness that meets the demand of God's heart. Spiritual Healing is for the anemic believer; it is for the anemic church.

On First Principles Origen, 2013-12-09 Origen's *On First Principles* is a foundational work in the development of Christian thought and doctrine: it is the first attempt in history at a systematic Christian theology. For over a decade it has been out of print with only expensive used copies available; now it is available at an affordable price and in a more accessible format. *On First Principles* is the most important surviving text written by third-century Church father, Origen. Origen wrote in a time when fundamental doctrines had not yet been fully articulated by the

Church, and contributed to the very formation of Christianity. Readers see Origen grappling with the mysteries of salvation and brainstorming how they can be understood. This edition presents G. W. Butterworth's trusted translation in a new, more readable format, retains the introduction by Henri de Lubac, and includes a new foreword by John C. Cavadini. As St. Gregory of Nazianzus, Doctor of the Church, wrote: "Origen is the stone on which all of us were sharpened."

Buddhism, Conflict and Violence in Modern Sri Lanka Mahinda Deegalle, 2006-09-27 Interdisciplinary in its approach, this book explores the dilemmas that Buddhism faces in relation to the continuing ethnic conflict and violence in modern Sri Lanka. Prominent scholars in the fields of anthropology, history, Buddhist studies and Pali examine multiple dimensions of the problem. Buddhist responses to the crisis are discussed in detail, along with how Buddhism can help to create peace in Sri Lanka. Evaluating the role of Buddhists and their institutions in bringing about an end to war and violence as well as possibly heightening the problem, this collection puts forward a critical analysis of the religious conditions contributing to continuing hostilities.

The Nuts and Bolts of NASCAR Greg Engle, 2017-06-06 When

people think of NASCAR, many think of cars racing around a track. But those with a more intimate knowledge of the sport understand that there is much more to it. *The Nuts and Bolts of NASCAR* uncovers everything you need to know to properly watch and enjoy the sport. Author Greg Engle uncovers the history of the sport, as well as an explanation of the rules, flags, and key terms. He reveals the best practices for watching it on TV, how to experience a NASCAR race in person, and much more. Along the way, he weaves in interviews with key figures from the NASCAR community to offer insiders' perspectives on the ins and outs of NASCAR. Some of the many questions that this book answers include: •What does NASCAR stand for? •How did it get to where it is today? •What goes on at a pit stop? •What is it like to race 400 or 500 miles in just a few hours? •What is a wedge? •What is the best way to meet a driver? •How do you best enjoy a race in person? •And all the other things a new fan needs to know to understand and enjoy America's fastest sport, NASCAR!

The New Zealand Hobbit Crisis Jonathan Handel ,2012-11-22

All was not well in Middle-earth . . . After the third *Lord of the Rings* movie premiered in 2003, fans of the series eagerly anticipated production and release of its prequel, *The Hobbit*. It

turned out they had a while to wait, as a series of troubles delayed production for years. Then, in September 2010, when almost everything seemed resolved, U.S. and international actors unions issued a public alert advising their members not to accept work on this non-union production. Warner Bros. threatened to rip the troubled production from the country and events quickly spiraled out of control. New Zealand plunged into crisis. Saving the Hobbit was do or die for the local film industry, and the government scrambled to avoid disaster. Protests and rallies erupted and the island nation's currency fell on the possibility of losing the half-billion dollar project. Director Peter Jackson vowed to fight like hell to keep the shoot in New Zealand. But then studio executives flew in from Los Angeles like colonial masters ready to bring down the hammer. What happened next was almost unbelievable - and proved, if nothing else, that not all Hollywood drama is on the screen.

Creatures of the Same God Andrew Linzey,2009 I don't know why you're spending all your time on this. They re only animals--for heaven's sake That was the reaction of one of Andrew Linzey's fellow students at King s College, London, when he was studying theology in the 1970s. Since then, the now Rev. Dr. Andrew Linzey

has been arguing that animals aren't only anything, but rather that they matter to God, and should do so to us. In this collection of essays, Linzey counters with his customary wit, erudition, and insight, some contemporary (and perhaps surprising) challenges to animal rights--from ecotheologians, the Church, and politicians. He contends that far from the sometimes shallow judgments of those who think animals unworthy of theological consideration, the Christian tradition has a wellspring of sources and resources available to taking animals seriously. Instead of being marginal to the Christian experience, Linzey concludes, animals can take their rightful place alongside human beings as creatures of the same God. There is a long forgotten spiritual tradition that two children, both named Jesus, were born in Bethlehem to two sets of parents named Joseph and Mary. This tradition is supported by the different accounts of the nativity and life of Jesus Christ in the gospels of Matthew and Luke. Although the Church chose to ignore this tradition, something of it survived in early Christian art and symbolism. The full tradition was preserved only in the literature of esoteric sects such as Gnosticism, which remained outside the official teachings of institutionalized Christianity.

Standing Up with Ga'axsta'las Leslie A. Robertson, the the

Kwagu'l Gixsam Clan, 2012-10-07 Standing Up with Ga'axsta'las tells the remarkable story of Jane Constance Cook (1870-1951), a controversial Kwakwaka'wakw leader and activist who lived during a period of enormous colonial upheaval. Working collaboratively, Robertson and Cook's descendants draw on oral histories and textual records to create a nuanced portrait of a high-ranked woman, a cultural mediator, devout Christian, and aboriginal rights activist who criticized potlatch practices for surprising reasons. This powerful meditation on memory and cultural renewal documents how the Kwagu'l Gixsam have revived their long-dormant clan in the hopes of forging a positive cultural identity for future generations through feasting and potlatching.

A Companion to German Cinema Terri Ginsberg, Andrea Mensch, 2012-02-13 *A Companion to German Cinema* A Companion to German Cinema regards the shifting terrain of German filmmaking and film studies against their larger social contexts with twenty-two newly commissioned essays by well-established and younger scholars in the field. While several of these focus on classic topics such as Weimar cinema, Fifties cinema, New German Cinema and its legacy, and Holocaust film, the collection is distinguished by its focus on new developments

and the innovative light they may shed on earlier practices. A Companion to German Cinema includes essays on Berlin Film, Neue Heimat Film, New Comedy, post-Wall documentaries, the post-Wende RAF genre, and Rabenmutter imagery, as well as on the persistently overlooked and under-theorized Indianerfilme, post-AIDS documentaries, sexploitation films, and new multicultural and transnational films produced in Germany under the auspices of the European Union. Organized into three “movements” representing the significance of these developments for their aesthetic theorization, A Companion to German Cinema challenges its readers to address critical gaps in the field with the aim of opening it further onto new terrains of intellectual engagement.

Neither in Dark Speeches nor in Similitudes Barry L.

Stiefel,Hernan Tesler-Mabé,2016-12-08 Neither in Dark Speeches nor in Similitudes is an interdisciplinary collaboration of Canadian and American Jewish studies scholars who compare and contrast the experience of Jews along the chronological spectrum (ca. 1763

to the present) in their respective countries. Of particular interest to them is determining the factors that shaped the Jewish communities on either side of our common border, and why they differed. This collection equips Canadian and American Jewish historians to broaden their examination and ask new questions, as well as answer old questions based on fresh comparative data.

Religion as a Conversation Starter Ina Merdjanova, Patrice Brodeur, 2011-11-03 Religion as a Conversation Starter is the first comprehensive analysis of the present state of interreligious dialogue for peacebuilding in Southeast Europe. It is based on empirically grounded and policy-oriented research, carried out throughout the Balkans. The study maps recent interreligious relations in this part of the world, throwing light on both the achievements and challenges of interreligious dialogue for peacebuilding in particular, and offering a set of up-to-date policy recommendations, whilst contributing to a greater understanding of the local particularities and how they relate to broader trends transnationally. Interreligious dialogue has been a central tool in the continuous international efforts to promote peaceful living together in multicultural and multireligious societies. This fascinating monograph explores the place of interreligious dialogue

as a primary method in conflict resolution and peacebuilding, and will be of interest to scholars of religious and peace studies, as well as those who advocate and carry out organized interventions in religion-related spheres.

One God in One Man C. T. Benedict, 2007 This book aims to enlighten the readers to the reasons and arguments for believing in the existence of God, Jesus Christ is the true Messiah and to disprove the unfounded and blasphemous allegations made against Christ and the Universal Church by some fictional writers, who have attempted to ridicule Christ, and to reduce the standing of the Gospel to a product of political forces which allegedly operated, to determine as to which text should be included in the Canon and which should be edited out, rather than considering the Gospel as the literal work of God.

Balkans 2010 Edward C. Meyer,William L. Nash,Council on Foreign Relations,2002 During the 1990s, nowhere was the virus of militant ethnic nationalism more deadly than in the Balkans.

America and its allies ultimately played an indispensable role stopping atrocities and creating conditions for sustainable peace; now, after a decade of extensive involvement, the international community is looking to wind down its commitment in the region.

The Center for Preventive Action, a conflict prevention initiative of the Council on Foreign Relations, formed this Independent Task Force to develop tangible and practical recommendations to put the Balkan states irreversibly on the path toward integration with Europe, and to allow the international community to reduce its presence in an orderly fashion by 2010. The Task Force's key recommendations include: first, the European Union taking the lead

on the Balkans, but with American leadership and partnership to ensure that U.S. interests -- particularly in the areas of military reform and the combating of organized politico-criminal syndicates that undermine regional and even global security -- are safeguarded; second, shifting the priorities of international and local actors toward the standards of the European Union and NATO accession plans, and using conditionality -- carrots and sticks -- by the international community to achieve its priorities; third, increasing investment and trade in the Balkans through banking-sector reform, privatization of state- or publicly owned corporations, private-sector development, and legislative and judicial action on property rights. The Task Force included senior experts on the Balkans and U.S. foreign policy from a cross-section of think tanks, government, the military, international organizations, academia, and the business community. The Coevolution of Human Potential and Converging Technologies Mihail C. Roco, Carlo D. Montemagno, 2004 The convergence of nanoscience, biotechnology, information technology, and cognitive science (NBIC) offers immense opportunities for the improvement of human abilities, social

outcomes, the nation's productivity, and its quality of life; it also represents a major new frontier in research and development. This conclusion was reached at a December 2001 workshop held by the National Science Foundation and the Department of Commerce in which leading experts from government, the academic research community and the private sector explored the nature and size of the potential opportunities in NBIC convergence. The report that resulted from this workshop, asserting that NBIC convergence is a broad, cross-cutting, emerging and timely opportunity of interest to individuals, society and humanity in the long term, recommended that an R&D initiative focusing on enhancing human performance (while governed by respect for human welfare and dignity) should become a national priority. The NBIC Convergence 2003 conference was organized as a first step in realizing the vision of this report. In this volume, a panel of nationally recognized experts analyzes the opportunities NBIC convergence prese
