*Facebook Nation* Newton Lee,2014-10-16 Facebook's psychological experiments and Edward Snowden's NSA leaks epitomize a world of increasing information awareness in the social media ecosystem. With over a billion monthly active users, Facebook as a nation is overtaking China as the largest country in the world. President Barack Obama, in his 2011 State of the Union Address, called America "the nation of Edison and the Wright brothers" and "of Google and Facebook." U.S. Chief Information Officer Steven VanRoekel opines that America has become a "Facebook nation" that demands increased transparency and interactivity from the federal government. Ubiquitous social networks such as Facebook, Google+, Twitter, and YouTube are creating the technologies, infrastructures, and big data necessary for Total Information Awareness - a controversial surveillance program proposed by DARPA after the 9/11 attacks. NSA's secret PRISM program has reinvigorated WikiLeaks founder Julian Assange's accusation that "Facebook is the most appalling spying machine that has ever been invented." Facebook CEO Mark Zuckerberg once said, "We exist at the intersection of technology and social issues." This book offers discourse and practical advice on the privacy issue in the age of big data, business intelligence in social media, e-government and e-activism, as well as personal total information awareness. This expanded edition also includes insights from Wikipedian Emily Temple-Wood and Facebook ROI experts Dennis Yu and Alex Houg.

This book achieves a more nuanced understanding about the interplays of Christianity, gender, power and modern Chinese history. It reintroduces Chinese Christian women pioneers not only to women's history and the history of Chinese Christianity, but also to the history of global Christian mission and the global history of many modern professions, such as medicine, education, literature, music, charity, journalism, and literature.

*Tiger Girls* Minglu Chen,2012-03-29 The existing scholarship on women in China suggests that gender inequality still exists against the background of the country's reform and opening in recent years. However, the situation of women in enterprise ownership and leadership seems to indicate that despite such notions of disadvantage amongst women, some of them are playing a more active and significant role in China's economic development. Based on a series of interviews with female enterprise owners, wives of enterprise owners and women managers conducted in diverse locations in three difference provinces of China, *Tiger Girls* examines the deeper realities of women entrepreneurs in China, and by extension the role of leading women in the workforce. By analyzing information on these women's personal experiences, careers and families, this book investigates their status at work and at home, as well as their connections with local politics. The research results suggest that although traces of gender inequality can still be found in these women's lives, they appear to be actively engaged in the business establishment and operation and gradually casting off the leash of domestic responsibilities. This book will be of interest to students and scholars of Chinese Studies, Chinese Business, Chinese Economics and Asian Studies. Minglu Chen is ARC Postdoctoral Fellow in the Department of Government and International Relations at Sydney University, Australia.

**Music, Movies, Meanings, and Markets** Morris Holbrook,2012-01-25 Music, Movies, Meanings, and Markets focuses on macromarketing-related aspects of film music in general and on the cinemusical role of ambi-diegetic jazz in particular. The book examines other work on music in motion pictures which has dealt primarily with the traditional distinction between nondiegetic film music (background music that comes from off-screen and is not audible to the film's characters, to further the dramatic development of plot, character, or other themes) and diegetic music (source music produced on-screen and/or that is audible to the film's characters, adding to the realism of the mise-en-scène without contributing much to other dramatic meanings). This book defines, describes, and illustrates another hitherto-neglected type of film music –ambi-diegetic film music, which appears on-screen but which contributes to the dramatic development of plot, character, and other themes. Consistent with an interest in macromarketing, such ambi-diegetic film music serves as a kind of product placement (suitable for commercialization via the cross-promotion of soundtrack albums, for example) and plays a role in product design. It also provides one type of symbolic consumer behavior that indicates choices made by film characters when playing-singing-listening-or-dancing in ways that reveal their personalities or convey other cinemusical meanings. Morris Holbrook argues that ambi-diegetic film music sheds light on various social issues –such as the age-old tension between art and entertainment as it applies to the contrast between creative integrity and commercialization. Music, Movies, Meanings, and Markets explores the ways in which ambi-diegetic jazz contributes to the development of dramatic meanings in various films, many of which address the art-versus-commerce theme as a central concern.
