Empire and Black Images in Popular Culture Joshua K. Wright,2018-05-07 FOX's musical drama Empire has been hailed as the savior of broadcast television, drawing 15 million viewers a week. A hip-hopera inspired by Shakespeare's King Lear and 1980s prime-time soap Dynasty, the series is at the forefront of a black popular culture Renaissance--yet has stirred controversy in the black community. Examining the evolution and potency of black images in popular culture, the author explores Empire's place in a diverse body of literature and media, data and discussions on respectability.

American Politics and the African American Quest for Universal Freedom Hanes Walton, Jr,Robert C. Smith,Sherri L. Wallace,2017-03-30 This dynamic and comprehensive text from nationally renowned scholars continues to demonstrate the profound influence African Americans have had -- and continue to have -- on American politics. Through the use of two interrelated themes -- the idea of universal freedom and the concept of minority-majority coalitions -- the text demonstrates how the presence of Africans in the United States affected the founding of the Republic and its political institutions and processes. The authors show that through the quest for their own freedom in the United States, African Americans have universalized and expanded the freedoms of all Americans. New to the Eighth Edition A new co-author, Sherri L. Wallace, is renowned for her teaching, scholarship, and participation in APSA's American government textbook assessment for coverage of race, ethnicity, and gender. She is the perfect addition following an election year that included female presidential candidates as well as candidates of color and issues focusing on racial tension and inequality. Offers a new Media Integration Guide for the first time. Provides the first overall assessment of the Obama administration in relation to domestic and foreign policy and racial politics in particular. Updated through the 2016 elections, connecting the Obama years with the new administration. Looks at candidates Hillary Clinton and Ben Carson in particular in relation to the themes of the book. Adds a new section on State Politics and Elections. Includes new sections on intersectionality dealing with issues of race, gender and sexuality; LGBT issues as another

manifestation of the struggle for universal freedom; a discussion of the Black Lives Matter movement; and a new section focusing on the changing character of black ethnicity as result of increased immigration from Africa and the Caribbean. Discusses the way in which race contributed to the polarization of American politics; the connections to the Tea Party; and the Obama Presidency and the 2016 presidential campaign as the most polarized since the advent of polling. Previews the impact of the Trump Administration on matters of race and ethnicity.

Black Images in the Comics Fredrik Strömberg, 2012 Turning the spotlight on over 100 comic strips, books and graphic novels to feature black characters from all over the world over the last century, resulting in a fascinating journey to enlightenment away from the hideous caricatures of yore. Beginning with the habitually appalling images of blacks as ignorant 'coons' in the earliest syndicated strips, continuing with the colonialist images of Tintin in the Congo through to the 1960s attempts at integration as well as the first wave of black strips. Each comic is spotlighted with an essay and illustration.

Expanding the Black Film Canon Lisa Doris Alexander, 2019-08-30 If the sheer diversity of recent hits from *Twelve Years a Slave* and *Moonlight* to *Get Out*, *Black Panther*, and *BlacKkKlansman* tells us anything, it might be that there's no such thing as black film per se. This book is especially timely, then, in expanding our idea of what black films are and, going back to the 1960s, showing us new and interesting ways to understand them. When critics and scholars write about films from the Blaxploitation movement—such as *Cotton Comes to Harlem*, *Shaft*, *Superfly*, and *Cleopatra Jones*—they emphasize their importance as films made for black audiences. Consequently, Lisa Doris Alexander points out, a film like the highly popular, Oscar-nominated *Blazing Saddles*—costarring and co-written by Richard Pryor—is generally left out of the discussion because it doesn't fit the profile of what a black film of the period should be. This is the kind of categorical thinking that Alexander seeks to broaden, looking at films from the 60s to the present day in the context of their time. Applying insights from black feminist thought and critical race theory to one film per decade, she analyzes what each can tell us about the status of black people and race relations in the United States at the time of its release. By teasing out the importance of certain films excluded from the black film canon, Alexander hopes to expand that canon to include films typically relegated to the category of popular entertainment—and to show how these offer more nuanced representations of black characters even as they confront, negate, or parody the controlling images that have defined black filmic characters for decades.

Knowing Bodies, Moving Minds Liora Bresler, 2013-11-11 This book aims to define new theoretical, practical, and methodological directions in educational research centered on the role of the body in teaching and learning. Based on our phenomenological experience of the world, it draws on perspectives from arts-education and aesthetics, as well as curriculum theory, cultural anthropology and ethnomusicology. These are arenas with a rich untapped cache of experience and inquiry that can be applied to the notions of schooling, teaching and learning. The book provides examples of state-of-the-art, empirical research on the body in a variety of educational settings. Diverse art forms, curricular settings, educational levels, and cultural traditions are selected to demonstrate the complexity and richness of embodied knowledge as they are manifested through institutional structures, disciplines, and specific practices.

White on Black Jan Nederveen Pieterse, 1992-01-01 *White on Black* is a compelling visual history of the development of European and American stereotypes of black people over the last two hundred years. Its purpose is to show the pervasiveness of prejudice against blacks throughout the western world as expressed in stock-in-trade racist imagery and caricature. Reproducing a wide range of illustrations--from engravings and lithographs to advertisements, candy wrappings, biscuit tins, dolls, posters, and comic strips--the book challenges the hidden assumptions of even those who view themselves as unprejudiced. Jan Nederveen Pieterse sets Western images of Africa and blacks in a chronological framework, including representations from medieval times, from the colonial period with its explorers, settlers, and missionaries, from the era of slavery and abolition, and from the multicultural societies of the present day. Pieterse shows that blacks have been routinely depicted throughout the West as servants, entertainers, and athletes, and that particular countries have developed their own comforting black stereotypes about blacks: Sambo and Uncle Tom in the United States, Golliwog in Britain, Bamboula in France, and Black Peter in the Netherlands. Looking at conventional portrayals of blacks in the nursery, in sexual arenas, and in commerce and advertising, Pieterse analyzes the conceptual roots of the stereotypes about them. The images that he presents have a direct and dramatic impact, and they raise questions about the expression of power within popular culture and the force of caricature, humor, and parody as instruments of oppression.

African American Female Leadership in Major Motion Pictures Tracy L.F. Worley, 2024-02-09 This book explores the factors contributing to the under-representation of African American female directors in mainstream cinema leadership. It also unmasks the potential strategies African American female film directors might pursue to reduce this inequity. Author Tracy L. F. Worley draws on research around ethics to conclude that there are specific consequences of the male gaze on women in cinema leadership, especially African American female directors of box office cinema. Combining extensive analysis of ethics and ethical stance relative to the motion picture industry with perspectives from working African American female directors, the text discusses the ethical considerations and historical inequities, including the male gaze, and uses those findings to define how the inequities can be opportunities. The efficacy model for cinematic leadership is presented as a mechanism for viewing obstacles through the lenses of gender, ethnicity, and culture so they become drivers for African American women to achieve success. Ideal for students of directing and filmmaking, as well as aspiring professional filmmakers wishing to gain a better understanding of the industry as it stands today.

Scully, 2012-10-30 *British Images of Germany* is the first full-length cultural history of Britain's relationship with Germany in the key period leading up to the First World War. Introduction to African American Studies Talmadge Anderson, James Benjamin Stewart, 2007 There is an ongoing debate as to whether African American Studies is a discipline, or multidisciplinary or interdisciplinary field. Some scholars assert that African American Studies use a well-defined common approach in examining history, politics, and the family in the same way as scholars in the disciplines of economics, sociology, and political science. Other scholars consider African American Studies multidisciplinary, a field somewhat comparable to the field of education in which scholars employ a variety of disciplinary lenses--be they anthropological, psychological, historical, etc., --to study the African world experience. In this model

the boundaries between traditional disciplines are accepted, and researches in African American Studies simply conduct discipline based an analysis of particular topics. Finally, another group of scholars insists that African American Studies is interdisciplinary, an enterprise that generates distinctive analyses by combining perspectives from d

The Mormon Image in the American Mind J.B. Haws,2013-12 What do Americans think about Mormons - and why do they think what they do?

This is a story where the Osmonds, the Olympics, the Tabernacle Choir, Evangelical Christians, the Equal Rights Amendment, Sports Illustrated, and even Miss America all figure into the equation. The book is punctuated by the presidential campaigns of George and Mitt Romney, four decades apart. A survey of the past half-century reveals a growing tension inherent in the public's views of Mormons and the public's views of the religion that inspires that body.
