Tapping State Government Information Sources Lori L. Smith,Daniel C. Barkley,Daniel D. Cornwall,Eric W. Johnson,J. Louise Malcomb,2003-11-30 Each state government produces large varieties and quantities of useful information that are largely unknown outside their state of origin. This book leads the public to the most useful information sources produced by each state, as well as to depository libraries that will facilitate more effective research. For each of the 50 states, important publications are detailed, along with information on how to obtain them. The publications' topics range from crime statistics to vital statistics, business statistics, health information, statistical abstracts, education directories, state budgets, economic indicators, state laws and legal information, and more. *Tapping State Government Information Sources* has a broader focus than previously published books in this subject area, most of which have focused solely on depository laws, useful state publications, or indexes to state publications. This book covers all three. The first chapter describes print and electronic sources that provide information about all 50 states. Each state's resources are then described in individual chapters. When possible, information about how to order a copy of the source is given, as are Web addresses for titles that are available online. At the beginning of each state chapter, the state's legal definition of public document or its equivalent is given, which may be of interest to librarians in states that are reexamining their own depository laws.

Hot, Hot Chicken Rachel Louise Martin,2021-03-15 These days, hot chicken is a “must-try” Southern food. Restaurants in New York, Detroit, Cambridge, and even Australia advertise that they fry their chicken “Nashville-style.” Thousands of people attend the Music City Hot Chicken

Festival each year. The James Beard Foundation has given Prince's Chicken Shack an American Classic Award for inventing the dish. But for almost seventy years, hot chicken was made and sold primarily in Nashville's Black neighborhoods—and the story of hot chicken says something powerful about race relations in Nashville, especially as the city tries to figure out what it will be in the future. Hot, Hot Chicken recounts the history of Nashville's Black communities through the story of its hot chicken scene from the Civil War, when Nashville became a segregated city, through the tornado that ripped through North Nashville in March 2020.

The History of Public Library Access for African Americans in the South David M. Battles, 2009 The story of African Americans' long struggle to attain civil rights, particularly in the South, is well documented. The story of the public library movement in America is also well documented. However, the story of the African American struggle to access public libraries in the South is limited; much of what has been written was told in piecemeal fashion in short studies or confined to a particular southern state.

The Development of Propulsion Technology for U.S. Space-Launch Vehicles, 1926-1991 J. D. Hunley, 2013-03-15 In this definitive study, J. D. Hunley traces the program's development from Goddard's early rockets (and the German V-2 missile) through the Titan IVA and the Space Shuttle, with a focus on space-launch vehicles. Since these rockets often evolved from early missiles, he pays considerable attention to missile technology, not as an end in itself, but as a contributor to launch-vehicle technology. Focusing especially on the engineering culture of the program, Hunley communicates this very human side of technological development by means of anecdotes, character sketches, and case studies of problems faced by rocket engineers. He shows how such a highly adaptive approach enabled the evolution of a hugely complicated technology that was impressive—but decidedly not rocket science. Unique in its single-volume coverage of the evolution of launch-vehicle technology from 1926 to 1991,

this meticulously researched work will inform scholars and engineers interested in the history of technology and innovation, as well as those specializing in the history of space flight.

Olympic National Park Tim McNulty, 2018-04-10 Renowned for its old-growth rain forest, wilderness coast, and glaciated peaks, Olympic National Park is a living laboratory for ecological renewal, especially as the historic Elwha River basin regenerates in the wake of dam removal. In this classic guide to the park, Tim McNulty invites us into the natural and human history of these nearly million acres, from remote headwaters to roadside waterfalls, from shipwreck sites to Native American historical settlements and contemporary resource stewardship, along the way detailing the park's unique plant and animal life. McNulty reminds us that though "the mountains and rivers remain 'timeless,' our understanding of the lifeforms that inhabit them—and the effects our actions have on their future—is an ongoing, ever deepening story." Color photographs Practical advice on how to make the most of your visit Handy flora and fauna species checklists Inspiring descriptions of endangered species recovery Detailed look at Elwha River restoration after dam removal

Archaeology in America [4 volumes] Linda S. Cordell, Kent Lightfoot, Francis McManamon, George Milner, 2008-12-30 The greatness of America is right under our feet. The American past—the people, battles, industry and homes—can be found not only in libraries and museums, but also in hundreds of archaeological sites that scientists investigate with great care. These sites are not in distant lands, accessible only by research scientists, but nearby—almost every locale possesses a parcel of land worthy of archaeological exploration. Archaeology in America is the first resource that provides students, researchers, and anyone interested in their local history with a survey of the most important archaeological discoveries in North America. Leading scholars, most with an intimate knowledge of the area, have written in-depth essays on over 300 of the most important archaeological sites that explain the importance of the site, the history of the people who left the artifacts, and the nature of the ongoing research. Archaeology in America divides its coverage into 8 regions: the Arctic and Subarctic, the Great Basin and Plateau, the Great Plains and Rocky Mountains, the Midwest, the Northeast, the Southeast, the Southwest, and the West Coast. Each entry provides readers with an accessible overview of the archaeological site as well as books and articles for further research.

Cotton Stephen Yafa, 2006-06-27 In the tradition of Mark Kurlansky's *Cod* and *Salt*, this endlessly revealing book reminds us that the fiber we think of as ordinary is the world's most powerful cash crop, and that it has shaped the destiny of nations. Ranging from its domestication 5,500 years ago to its influence in creating Calvin Klein's empire and the Gap, Stephen Yafa's *Cotton* gives us an intimate look at the plant that fooled Columbus into thinking he'd reached India, that helped start the Industrial Revolution as well as the American Civil War, and that made at least one bug—the boll weevil—world famous. A sweeping chronicle of ingenuity, greed, conflict, and opportunism, *Cotton* offers a barrage of fascinating information (Los Angeles Times).
