What Art Is Michelle Kamhi, Louis Torres, 2016-05-26 What is art? The arts establishment has a simple answer: anything is art if a reputed artist or expert says it is. Though many people are skeptical about the alleged new art forms that have proliferated since the early twentieth century, today's critics claim that all such work, however incomprehensible, is art. A groundbreaking alternative to this view is provided by philosopher-novelist Ayn Rand (1901–1982). Best known as the author of *The Fountainhead* and *Atlas Shrugged*, Rand also created an original and illuminating theory of art, which confirms the widespread view that much of today's purported art is not really art at all. In *What Art Is*, Torres and Kamhi present a lucid introduction to Rand's esthetic theory, contrasting her ideas with those of other thinkers. They conclude that, in its basic principles, her account is compelling, and is corroborated by evidence from anthropology, neurology, cognitive science, and psychology. The authors apply Rand's theory to a debunking of the work of prominent modernists and postmodernists—from Mondrian, Jackson Pollock, and Samuel Beckett to John Cage, Merce Cunningham, and other highly regarded postmodernist figures. Finally, they explore the implications of Rand's ideas for the issues of government and corporate support of the arts, art law, and art education. This is one of the most interesting, provocative, and well-written books on aesthetics that I know. While fully accessible to the general reader, *What Art Is* should be of great interest to specialists as well. Ayn Rand's largely unknown writings on art—especially as interpreted, released from dogma, and smoothed out by Torres and Kamhi—are remarkably refined. Moreover, her ideas are positively therapeutic after a century of artistic floundering and aesthetic quibbling. Anyone interested in aesthetics, in the purpose of art, or in the troubling issues posed by modernism and post modernism should read this book. —Randall R. Dipert Author of *Artifacts, Art Works*, and *Agency* Torres and Kamhi effectively situate Rand's long-neglected esthetic theory in the wider history of ideas. They not only illuminate her significant contribution to an understanding of the nature of art; they also apply her ideas to a trenchant critique of the twentieth century's 'advanced art.' Their exposure of the invalidity of abstract art is itself worth the price of admission. —Chris Matthew Sciabarra Author of *Ayn Rand: The Russian Radical* Rand's aesthetic theory merits careful study and thoughtful criticism, which Torres and Kamhi provide. Their scholarship is sound, their presentation is clear, and their judgment is refreshingly free from the biases that Rand's supporters and detractors alike tend to bring to considerations of her work. —Stephen Cox University of California, San Diego

Blurring The Boundaries Jack Levin, 2013-02-11 Over the decades, the lines separating young- middle-aged-, and older adults have blurred, as indicated by a broadening of the appropriate years for making life decisions. Not only are many people marrying later, but some are marrying earlier than ever. Overall, women giving birth later, but some are having children earlier in their lives. Older people are retiring later, but some are retiring at a younger age. The spread or variability (standard deviation) of age-based decisions has increased substantially, giving adults greater freedom from the traditional constraints of age. With these relaxed age norms has come a host of related social problems. The relaxation of age norms for adult decision-making has inadvertently blurred the boundaries between adults and teenagers, between teenagers and children. This generalization of the phenomenon throughout the life cycle is responsible for the adultification of childhood. Eight year old girls are, to an increasing extent, being treated as sexual objects; bullying peaks in the 6th grade; larger numbers of girls are having oral sex or sexual intercourse by the age of 15; the pregnancy rate for girls 13-15 is on the rise; we are in the process of dismantling the juvenile justice system in favor of adult forms of punishment; and more and more children are left without adult supervision in the afternoons, as though they were miniature adults who are capable of raising themselves. Jack Levin is the American Sociological Association's 2009 Winner of the "Public Understanding of Sociology" Award. This short book communicates the power and importance of sociological thinking to major, worldwide social trends. Ideal for use in undergraduate courses such as introductory sociology, social problems, and social change as well as more advanced courses in population, or sociology of aging.

Music and Fuzzy Logic Hanns-Werner Heister, 2021-02-21 This book unfolds the manifold, complex and intertwined relations between Fuzzy Logic and music in a first comprehensive overview on this topic: systematically as an outline, as completely as possible, in the aspects of Fuzzy Logic in this relation, and especially in music as a process with three main phases, five anthropological layers, and thirteen forms of existence of the art work (Classics, Jazz, Pop, Folklore). Being concerned with the ontological, gnoseological, psychological, and (music-) aesthetical status and the relative importance of different phenomena of relationship between music and Fuzzy Logic, the explication follows the four main principles (with five phenotypes) of Fuzzy Logic with respect to music: similarity, sharpening 1 as filtering, sharpening 2 as crystallization, blurring, and variation. The book reports on years of author's research on topics that have been only little explored so far in the area of Music and Fuzzy Logic. It merges concepts of music analysis with fuzzy logical modes of thinking, in a unique way that is expected to attract both specialists of music and specialists of Fuzzy Logic, and also non-specialists in both fields. The book introduces the concept of dialectic between sharpening and - conscious - “blurring”. In turn, some important aspects of this dialectic are discussed, placing them in an historical dimension, and ending in the postulation of a 'musical turn' in the sciences, with some important reflections concerning a “Philosophy of Fuzzy Logic”. Moreover, a production-oriented thinking is borrowed from fuzzy logic to musicology in this book, opening new perspectives in music, and possibly also in other artistic fields.

Blurring the Color Line Richard Alba, Richard D Alba, 2012-03-05 Richard Alba argues that the social cleavages that separate Americans into distinct, unequal ethno-racial groups could narrow dramatically in the coming decades. In *Blurring the Color Line*, Alba explores a future in which socially mobile minorities could blur stark boundaries and gain much more control over the social expression of racial differences.

Blurring Intelligence Crime Willem Bart de Lint, 2021-03-14 This book explores the conundrum that political fortune is dependent both on social order and big, constitutive crime. An act of outrageous harm depends on rules and protocols of crime scene discovery and forensic recovery,

but political authorities review events for a social agenda, so that crime is designated according to the relative absence or presence of politics. In investigating this problem, the book introduces the concepts ‘intelligence crime’ and ‘critical forensics.’ It also reviews as an exemplar of this phenomenon ‘apex crime,’ a watershed event involving government in the support of a contested political and social order and its primary opponent as the obvious offender, which is then subject to a confirmation bias. Chapters feature case study analysis of a selection of familiar, high profile crimes in which the motives and actions of security or intelligence actors are considered as blurred or smeared depending on their interconnection in transactional political events, or according to friend/enemy status.
